**Hit the Ground Running** Jason Jennings,2009-03-19 Want to compete with the best of the best? Then hit the ground running. Here's how. The toughest job in business is taking over as a new leader. You have to quickly assess the situation, pull together a strong team, decide on a strategy, and inspire everyone to execute it. The stakes for new leaders are even higher. Whether you've been brought on to fix something that's broken, launch a product, move the company in a new direction, or head up a division, every new leader is under the gun to get up to speed and begin producing strong numbers? ASAP. In Hit the Ground Running, Jason Jennings introduces us to America's best performing new CEOs who pulled off the most impressive transformations of the decade. They doubled revenues, more than tripled earnings per share, and doubled their company's net profit margins. After interviewing and analyzing the stories of these top leaders, Jennings delivers their hard-earned, battle-tested strategies, which will inspire any new leader to take the helm and start delivering. When Richard and Tim Smucker were appointed co-CEOs of The J. M. Smucker Company, they shared their strategy with everyone and got them on board with their mission. Since then, Smucker's went on to dominate the markets and bring in billions of dollars of new business. Mike McCallister, the CEO of a twenty-billion-dollar health-services giant, decided to stop pretending and publicly admit that health insurance is broken. Humana began to replace a crippled, complex, and confusing system with one that works and has more than tripled revenues, earnings, and share price since McCallister took over. By processing change in bite-size pieces, Jeffrey Lorberbaum led Mohawk Industries through twenty successful acquisitions and turned his family's carpet-making business into the largest flooring company in the world. Filled with engaging stories and lessons from the cream of the crop, Hit the Ground Running will help new leaders at every level balance short- and long-term goals as well as the needs of shareholders, employees, customers, and the community.

**Preclassical Conflict of Laws** Nikitas E. Hatzimihail,2021-07-22 To better appreciate present-day private international law and its future prospects and challenges, we should consider the history and historiography of the field. This book offers an original approach to the study of conflict of laws and legal history that exposes doctrinal lawyers to historical context, and

legal historians to the intricacies of legal doctrine. The analysis is based on an in-depth examination of Medieval and Early Modern conflict of laws, focusing on the classic texts of Bartolus and Huber. Combining theoretical insights, textual analysis and historical perspectives, the author presents the preclassical conflict of laws as a rich world of doctrines and policies, theory and practice, context and continuity. This book challenges preconceptions and serves as an advanced introduction which illustrates the relevance of history in commanding private international law, while aspiring to make private international law relevant for history.

**Vision and Visual Perception** Duco A. Schreuder, 2014-12-03 Vision is about insight, and visual perception is about cognition - and they form the foundation of how we see the world. Duco A. Schreuder, a physicist and psychologist, explores the finer details of each in this groundbreaking book that explores human consciousness and perception. Sharing virtually everything he's learned over a varied career spanning more than sixty years, he examines a wide array of topics, including how we understand what we visually process, how we store and retrieve information, the role that neurons play in how what we see, and much more. While Schreuder isn't afraid to disagree with other leading thinkers, he relies on science and focuses on the facts behind it so you can understand lighting, visual perception, engineering design, and applied and experimental physics. Looking is about insight, whereas seeing is about knowledge, and you need to know how each one works to truly understand how humanity views the world. Whether you're an illuminating engineer considering the fundamentals of the trade or a student or professional in an allied discipline, you'll be well served by taking a closer look at Vision and Visual Perception.

**Golden Rules and Silver Rules of Humanity** Q. C. Terry, 2004 The Golden/Silver Rule precepts and associated maxims are the pillars upon which most major religious and philosophical traditions, moral and legal codes, are founded, that also relate to science. Dating back almost to the beginnings of civilized culture in ancient Africa over 5,000 years ago, and elsewhere, the rules are among the earliest oral civil precepts/codes to be committed to print regarding appropriate social conduct across most situations. This wisdom inquiry offers, some background, an integrative theory for most of the versions of the precepts found amongst the worlds cultures, in addition to, some newly created reciprocity labels, and maxims, based

on mutuality, generosity, altruism and ethical levels. A draft integration of some new mutuality rules, and interaction relations, for science, religion, and philosophy, are offered, along with some sample optimums for various life style types on an altruism-egoism ethics scale.

*Intolerance* Robert E. Tully, Bruce Chilton, 2017-07-14 Aristotle accurately characterized humans as political animals. Whether through birth or from choice, people naturally cluster into groups for protection, advancement, and the pursuit of well-being. But Aristotle's description does not hint at the powerful binary tension within this human tendency. Leaders enhance a social group's sense of identity by appealing to the members' commitments and shared traditions, to their hopes, strengths, sacrifices, and fears. Often, however, they cultivate not only an awareness of difference but even a sense of superiority, since for every social group there are those outsiders, the "them". Maintaining a group's solidarity can too easily lead to the righteousness of intolerance towards those who are excluded. The reinforcement of group-identity in this way runs so deep in human nature that holding up a mirror to ourselves inevitably reveals a split image: the people we want to see and the people we're glad we're not. *Intolerance: Political Animals and Their Prey* presents stark examples of how the "us" have treated the "them". The papers in this volume hold up various unflattering mirrors of intolerance from the areas of History, Law, Philosophy, Political Science, and Religion. The authors of these scholarly studies do not condemn. Rather, their research compels us to look at ourselves as the political animals we are. *Intolerance: Political Animals and Their Prey* is the product of a year-long multi-disciplinary collaboration between faculty members of Bard College and the United States Military Academy at West Point. The project involved parallel seminar courses at both institutions along with Joint Sessions, all focused on the central theme of intolerance, and culminated in a three-day academic Conference at Bard in the Spring of 2015. This volume inaugurates a new series being published by Hamilton Books under the general title, *Dialogues on Social Issues: Bard College and West Point*.
