Participatory Practice in Space, Place, and Service Design Kelly L. Anderson, Graham Cairns, 2022-10-18 'Participatory Practice in Space, Place, and Service Design' is premised on a belief in the importance of participatory practices in finding creative solutions to the plethora of problems we face today. It argues that engaging professions with the public in mutual exploration, analysis, and creative thinking is essential. It not only ensures better quality products, places, services, and a greater sense of civic agency but also facilitates fuller access to them and the life opportunities they can unleash. This book offers a uniquely varied perspective of the myriad ways in which participatory practices operate across disciplines and how they impact the worlds and communities we create and inhabit. This book suggests that participatory practices are multi-disciplinary and relevant in fields as diverse as design, architecture, education, health care, sustainability, and community activism, to name a few of those discussed here. How do designed objects and environments affect wellness, creativity, learning, and a sense of belonging? How do products and services affect everyday experience and attitudes towards issues such as sustainability? How does giving people a creative voice in their own education, services, and built environments open up their potential and strengthen identity and civic agency? Addressing these questions requires a rethinking of relations between people, objects, and environments; it demands attention to space, place, and services.

Analogue Deyan Sudjic, 2024-03-14 A celebration of all things analogue from reel-to-reel tape recorders and turntables to typewriters and telephones

Thinking: Objects: Contemporary Approaches to Product Design Tim Parsons, 2017-12-14 *Thinking: Objects: Contemporary Approaches to Product Design* discusses influences on modern product design such as globalization, technology, the media and the need for a sustainable future, and demonstrates how readers can incorporate these influences into their own work. The book also discusses how readers can learn to read the signals an object sends, interpret meaning and discover historical context. *Thinking: Objects* provides an essential reference tool that will enable you to find your own style and succeed in the industry.

Plastic Dreams Charlotte Fiell, Peter Fiell, 2009 *Plastic dreams* raises the aesthetic perception of plastics and celebrates their nobility as materials by bringing together an exquisite survey of landmark product designs in plastics, from Bakelite in the 1920s to the latest techno-polymers today. -- cover.

Design after Capitalism Matthew Wizinsky, 2022-03-15 How design can transcend the logics, structures, and subjectivities of capitalism: a framework, theoretical grounding, and practical principles. The designed things, experiences, and symbols that we use to perceive, understand, and perform our everyday lives are much more than just props. They directly shape how we live. In *Design after Capitalism*, Matthew Wizinsky argues that the world of industrial capitalism that gave birth to modern design has been dramatically transformed. Design today needs to reorient itself toward deliberate transitions of everyday politics, social relations, and economies. Looking at design through the lens of political economy, Wizinsky calls for the field to transcend the logics, structures, and subjectivities of capitalism—to combine design entrepreneurship with social empowerment in order to facilitate new ways of producing those things, symbols, and experiences that make up everyday life. After analyzing the parallel histories of capitalism and design, Wizinsky offers some historical examples of anticapitalist, noncapitalist, and postcapitalist models of design practice. These range from the British Arts and Crafts movement of the nineteenth century to contemporary practices of growing furniture or biotextiles and automated forms of production. Drawing on insights from sociology, philosophy, economics, political science, history, environmental and sustainability studies, and critical theory—fields not usually seen as central to design—he lays out core principles for postcapitalist design; offers strategies for applying these principles to the three layers of project, practice, and discipline; and provides a set of practical guidelines for designers to use as a starting point. The work of postcapitalist design can start today, Wizinsky says—with the next project.

Electric Dreams David Redhead, 2004

NATØ: Narrative Architecture in Postmodern London Claire Jamieson, 2017-01-20 Chronicling the last radical architectural group of the twentieth century – NATØ (Narrative Architecture Today) – who emerged from the Architectural Association at the start of the 1980s, this book explores the group’s work which echoed a wider artistic and literary culture that drew on the specific political, social and physical condition of 1980s London. It traces NATØ’s identification with a particular stream of post-punk, postmodern expression: a celebration of the abject, an aesthetic of entropy, and a do-it-yourself provisionality. NATØ has most often been documented in reference to Nigel Coates (the instigator of NATØ), which has led to a one-sided, one-dimensional record of NATØ’s place in architectural history. This book sets out a more detailed, contextual history of NATØ, told through photographs, drawings, and ephemera, restoring a truer polyvocal narrative of the group’s ethos and development.
