Teaching Law and Criminal Justice Through Popular Culture Julian Hermida, 2021-07-04 This volume shows how university and college professors can create an engaging environment that encourages students to take a deep approach to learning through the use of popular culture stories in law school and in criminal justice classrooms. The use of popular culture (films, TV shows, books, songs, etc.) can enhance the deep learning process by helping students develop cognitive skills, competencies, and practices that are essential for the professional practice of law and criminal justice and which are often neglected in traditional law school and criminal justice curricula. The book covers such topics as: critical thinking skills in legal and criminal justice education the role of popular culture in educating for rapid cognition factors that foster intrinsic motivation using storytelling in law and criminal justice teaching with popular culture stories popular culture and media literacy in the classroom lawyers and criminal justice agents and their dealings with the press influence of popular culture stories in the legal and criminal justice fields regulations for the use of media texts in the legal and criminal justice fields how stereotyping is influenced by popular media how to prepare a promising syllabus or course outline This unique book is the result of the author's many years of teaching as well as of many meaningful discussions in seminars and teaching and learning workshops that he facilitated. This very easy-to-read and entertaining volume will show readers how to enhance their classes by creating a motivating and engaging environment that will foster students' deep learning experiences.

Teaching and Learning on Screen Mark Readman, 2016-11-09 What stories are told about teaching and learning on TV and in film? And how do these stories reflect, refract and construct myths, anxieties and pleasures about teaching and learning? This collection looks at how pedagogy is represented on screen, and how TV programs and films translate pedagogic ideas into stories and relationships. International in scope, with case studies and analysis from the UK, US, Australia, Turkey and Brazil—the book adopts a critical stance in relation to the ways in which theories of learning and myths about education are mobilized on screen. *Teaching and Learning on Screen: Mediated Pedagogies* provides a stimulating addition to the field of media and cultural studies, while also promoting debate about particular pedagogic models and strategies that will contribute to the professional development of educators and those involved in teacher education.

The Abercrombie Age Myles Ethan Lascity, 2024-10-01 Be popular and good-looking—it's the key to a happy life. Luckily, with a bit of know-how and money, you, too, can have it all. At least, that's what teen pop culture was selling in surround

sound at the turn of the millennium. From movies like *Clueless* to TV's *Dawson's Creek* to the music videos on MTV's *Total Request Live* and the catalogs of Abercrombie & Fitch, a consumer-minded ethos drove pop culture storytelling as millennials came of age in the late 1990s and early 2000s. But in the long shadow of the Great Recession, the upwardly mobile aspirations fostered by the era's popular culture and media seem to have been thwarted. Many millennials today lack the wealth their parents had at the same age, and the gaps between rich and poor rival those of the Gilded Age. The Abercrombie Age reconsiders teen popular culture from the turn of the twenty-first century, revealing how it told young people that life not only could but surely would get better. Far from frivolous or forgettable, the era's superficial, materialistic culture sold millennials unrealistic expectations of what life could offer, setting up a stark juxtaposition with the realities of today.

You Can't Make "Fish Climb Trees" Lawrence Muganga, 2018-08-02 In our rapidly changing global environment where learning methods, styles and access vary dramatically it is increasingly necessary to stimulate conversation around drastically revolutionizing education. In *You Can't Make a Fish Climb Trees: Overcoming Educational Malpractice through Authentic Learning* author and scholar Lawrence Muganga advocates for educational transformation and exposes our archaic education systems modeled for nineteenth-century Europe, which has allowed governments and administrators to structure and deliver education as if it were an assembly line. The current model largely discounts students' individual differences and natural abilities impacting their ability to transition from the classroom into the workforce. While he focuses on the need for more dynamic education models in Sub-Saharan Africa, Muganga establishes applications for the presence of Authentic Learning—where teaching happens in a student-centered environment filled with real-world applications—throughout the global community. Drawing from the research of educational experts worldwide, he advocates for the kind of revolutionized education model that would see students' individuality used to empower them so that they can navigate their future and the workforce successfully.
