The updated web study guide serves as an important learning tool to support the educational journey. With more than 100 engaging activities, it works directly with the text in guiding students to complete the related activities for each chapter and apply knowledge gained from the text. The study guide activities require students to do the following: • Use actual sport and exercise psychology instruments to assess their skills. • Determine how to respond to real-life scenarios (with short answers or essays). • Review research studies and experiments. • Search the Internet for relevant information. • Apply and test their understanding of principles and concepts of sport and exercise psychology. Many of the study guide activities offer compelling audio and video clips that provide an interactive look at how sport psychology consultants communicate with athletes and coaches to improve athletic experiences. These clips feature esteemed experts from the field discussing course concepts that they have studied and refined during their professional careers. To further emphasize practical application, portfolio activities can be integrated through a full semester, turning course units into a unified whole that builds upon itself for greater understanding of the field. To aid instructors, instructor ancillaries have been updated and expanded. The instructor guide, test package, and presentation package are now supplemented with an image bank, gradable chapter quizzes, and instructor videos, all available at www.HumanKinetics.com/FoundationsOfSportAndExercisePsychology. Sport Psychology Mark H. Anshel,1997 The purpose of this text is to link research in sport psychology with techniques to implement the research in real world settings. This is truly an introductory text and assumes the students have less of a background in sport psychology than many competing texts. In addition, the tone of this text is more informal than most competing texts. A strength of the text is that it describes, explains and applies each concept using real world examples. Anshel offers a very applied approach, supported by research. NOTE: Anshel points out that none of the competing texts include communications or counseling chapter (his does), an important selling feature. Also, these books lack, not surprisingly, a sense of humor. Ansel's is very well written, human, accessible book.
