The Stories Old Towns Tell Marek Kohn, 2023-04-25 A journey through Europe's old towns, exploring why we treasure them—but also what they hide about a continent's fraught history "[A] fascinating chronicle."—Benjamin Balint, Wall Street Journal Historic quarters in cities and towns across the middle of Europe were devastated during the Second World War—some, like those of Warsaw and Frankfurt, had to be rebuilt almost completely. They are now centers of peace and civility that attract millions of tourists, but the stories they tell about places, peoples, and nations are selective. They are never the whole story. These old towns and their turbulent histories have been key sites in Europe's ongoing theater of politics and war. Exploring seven old towns, from Frankfurt and Prague to Vilnius in Lithuania, the acclaimed writer Marek Kohn examines how they have been used since the Second World War to conceal political tensions and reinforce certain versions of history. Uncovering hidden stories behind these old and old-seeming façades, Kohn offers us a new understanding of the politics of European history-making—showing how our visits to old towns could promote belonging over exclusion, and empathy over indifference.

Three Cities After Hitler Andrew Demshuk, 2021-09-21 Three Cities after Hitler compares how three prewar German cities shared decades of postwar development under three competing post-Nazi regimes: Frankfurt in capitalist West Germany, Leipzig in communist East Germany, and Wrocław (formerly Breslau) in communist Poland. Each city was rebuilt according to two intertwined modern trends. First, certain local edifices were chosen to be resurrected as "sacred sites" to redeem the national story after Nazism. Second, these tokens of a reimagined past were staged against the hegemony of modernist architecture and planning, which wiped out much of whatever was left of the urban landscape that had survived the war. All three cities thus emerged with simplified architectural narratives, whose historically layered complexities only survived in fragments where this twofold "redemptive reconstruction" after Nazism had proven less vigorous, sometimes because local citizens took action to save and appropriate them. Transcending both the Iron Curtain and freshly homogenized nation-states, three cities under three rival regimes shared a surprisingly common history before, during, and after Hitler—in terms of both top-down planning policies and residents' spontaneous efforts to make home out of their city as its shape shifted around them.

The Heirs of the Roman West Joachim Henning, 2009-05-05 In this collection leading international authorities analyse the

structures and economic functions of non-agrarian centres between ca. 500 and 1000 A.D. – their trade, their surrounding settlements, and the agricultural and cultural milieu. The thirty-one papers presented at an international conference held in Bad Homburg focus on recent archaeological discoveries in Central Europe (Vol.1), as well as on those from southeastern Europe to Asia Minor (Vol. 2).

Tourism in the City Nicola Bellini, Cecilia Pasquinelli, 2016-08-29 This book critically explores the interconnections between tourism and the contemporary city from a policy-oriented standpoint, combining tourism perspectives with discussion of urban models, issues, and challenges. Research-based analyses addressing managerial issues and evaluating policy implications are described, and a comprehensive set of case studies is presented to demonstrate practices and policies in various urban contexts. A key message is that tourism policies should be conceived as integrated urban policies that promote tourism performance as a means of fostering urban quality and the well-being of local communities, e.g., in terms of quality spaces, employment, accessibility, innovation, and learning opportunities. In addition to highlighting the significance of urban tourism in relation to key urban challenges, the book reflects on the risks and tensions associated with its development, including the rise of anti-tourism movements as a reaction to touristification, cultural commodification, and gentrification. Attention is drawn to asymmetries in the costs and benefits of the city tourism phenomenon, and the supposedly unavoidable trade-off between the interests of residents and tourists is critically questioned.

Miniature Monuments Helmut Puff, 2014-09-23 Miniature Monuments: Modeling German History offers a series of essays on small-scale models of bombed out cities. Created between 1946 and the present, these plastic renderings of places provide eerie glimpses of destruction and devastation resulting from the air war. This study thus permits fresh angles on post-war responses to the compounded losses of WW II, and it does so through considering these “miniature monuments” (of, among others, Frankfurt, Munich, Schwetzingen, Heilbronn and Hiroshima) in a deep cultural history that interlaces the sixteenth, eighteenth, and twentieth centuries. Three-dimensional renderings in diminutive size have rarely been subjected to rigorous theoretical reflection. Conventionally, models, whether of ruins or intact spaces, have been assumed to be “easily legible”; that is, they have been assumed to be vehicles of the authentic. Yet rubble and other models should be theorized as complex simulacra of abstract realities and catalysts of memories. Miniature Monuments thus tackles a haunting paradox: building ruins. The book elucidates how utterly contingent processes of crumbling and collapse (the English words for the Latin *ruina*) came to command such great interest in modern Europe that tremendous efforts were taken to uncover, render, and, most of all, recreate ruins.
