**Mohsin Khan**

*Love on the Brain* Ali Hazelwood, 2022-08-23 An Instant New York Times Bestseller A #1 LibraryReads and Indie Next Pick! From the New York Times bestselling author of *The Love Hypothesis* comes a new STEM-inist rom-com in which a scientist is forced to work on a project with her nemesis—with explosive results. Like an avenging, purple-haired Jedi bringing balance to the mansplained universe, Bee Königswasser lives by a simple code: What would Marie Curie do? If NASA offered her the lead on a neuroengineering project—a literal dream come true after years scraping by on the crumbs of academia—Marie would accept without hesitation. Duh. But the mother of modern physics never had to co-lead with Levi Ward. Sure, Levi is attractive in a tall, dark, and piercing-eyes kind of way. And sure, he caught her in his powerfully corded arms like a romance novel hero when she accidentally damseled in distress on her first day in the lab. But Levi made his feelings toward Bee very clear in grad school—archenemies work best employed in their own galaxies far, far away. Now, her equipment is missing, the staff is ignoring her, and Bee finds her floundering career in somewhat of a pickle. Perhaps it's her occipital cortex playing tricks on her, but Bee could swear she can see Levi softening into an ally, backing her plays, seconding her ideas...devouring her with those eyes. And the possibilities have all her neurons firing. But when it comes time to actually make a move and put her heart on the line, there's only one question that matters: What will Bee Königswasser do?

**Love on the Brain** Ali Hazelwood,

**The Scientific American Book of Love, Sex and the Brain** Judith Horstman, Scientific American, 2011-11-15 Who do we love? Who loves us? And why? Is love really a mystery, or can neuroscience offer some answers to these age-old questions? In her third enthralling book about the brain, Judith Horstman takes us on a lively tour of our most important sex and love organ and the whole smorgasbord of our many kinds of love-from the bonding of parent and child to the passion of erotic love, the affectionate love of companionship, the role of animals in our lives, and the love of God. Drawing on the latest neuroscience, she explores why and how we are born to love-how we're hardwired to crave the companionship of others, and how very badly things can go without love. Among the findings: parental love makes our brain bigger, sex and orgasm make it healthier, social isolation makes it miserable-and although the craving for romantic love can be described as an addiction, friendship may actually be the most important loving relationship of your life. Based on recent studies and articles culled from the prestigious Scientific American and Scientific American Mind magazines, *The Scientific American Book of Love, Sex, and the Brain* offers a fascinating look at how the brain controls our loving relationships, most intimate moments, and our deep and basic need for connection.

Love on the Brain Mohsin Khan, 2023-03-12 Love is a powerful and complex emotion that has fascinated humans for centuries. It is an essential part of our lives, shaping our relationships, our experiences, and even our sense of self. In this book, we will explore the many dimensions of love, from its biological and psychological foundations to its social and cultural influences. We will delve into the science of love, examining the ways in which our brains and bodies respond to this powerful emotion. We will explore the role of attachment, the impact of early childhood experiences on our capacity for love, and the psychological and neurological mechanisms that underpin romantic attraction and attachment. But love is not just a

biological phenomenon - it is also shaped by our social and cultural contexts. In this book, we will examine how love is portrayed in popular media, and how these depictions shape our expectations and experiences of love in real life. We will explore the ways in which societal norms and cultural expectations impact our relationships, and the ways in which love is expressed and experienced across different cultures. We will also consider the challenges and complexities of love. We will explore the impact of conflict and adversity on our relationships, and examine the role of forgiveness and resilience in navigating the ups and downs of love. We will look at the impact of technology on modern relationships, and consider the unique challenges faced by LGBTQ+ couples in a society that has historically marginalized their relationships. Finally, we will explore the transformative power of love. We will examine the ways in which love can inspire personal growth and self-discovery, and how it can be harnessed to create positive change in the world. We will consider the ways in which love can bring us closer to others, deepen our sense of connection and meaning, and ultimately, bring us greater fulfillment and happiness.
