**Implementing Sustainability in the Curriculum of Universities** Walter Leal Filho, 2017-11-17 This book presents sustainable development themes across universities and introduces methodological approaches and projects to the teaching staff. It has been prepared against this background, to identify ways to better teach about sustainability issues in a university context. It contains a set of papers presented at a Symposium with the same title, held at Manchester Metropolitan University (UK) in March 2017. The event was attended by a number of institutions of higher education active in this field. It involved researchers in the field of sustainable development in the widest sense, from business and economics, to arts and fashion, administration, environment, languages and media studies. Sustainability is seldom systematically embedded in the curriculum at higher education institutions. Yet, proper provisions for curricular integration of sustainability issues as part of teaching programmes across universities are an important element towards curriculum greening. The aims of this book are: (i) to provide teaching staff at universities active and/or interested in teaching sustainable development themes with an opportunity to document and disseminate their works (i.e. curriculum innovation, empirical work, activities, case studies practical projects); (ii) to promote information, ideas and experiences acquired in the execution of teaching courses, especially successful initiatives and good practice; (iii) to introduce methodological approaches and projects which aim to offer a better understanding of how matters related to sustainable development can be tackled in university teaching. Last

but not least, a further aim of this book, prepared by the Inter-University Sustainable Development Research Programme (IUSDRP) and the World Sustainable Development Research and Transfer Centre (WSD-RTC), is to catalyse a debate on the need to promote sustainable development teaching today.

*Strategic Leadership of Change in Higher Education* Stephanie Marshall, 2025-06-25 The fully updated third edition of Strategic Leadership of Change in Higher Education provides a clear overview of the basic principles of effective leadership and management of change, and assists strategic leaders to better contextualise – both globally and more locally – the external environment in which they are operating. It provides case studies and stories from exemplary globally strategic leaders who have led their universities through the complexities of the pandemic, have come out the other side stronger and more resilient, and who continue to adapt. This third edition has been updated with consideration of the significant changes in global factors, including the pandemic; it: Reflects on the ways in which the pandemic was a watershed moment for higher education institutions Reassesses the environment in which universities operate today, facing demanding higher education policy and regulation, tough financial circumstances and unabating technological developments Re-examines the insights and initiatives from the second edition, asking how changes in our collective conscience and knowledge are reflected in our ways of working and execution of change Includes a concluding 'Looking Forward' section, integrating and distilling the diverse approaches of successful leaders, offering narratives on how to navigate the rapidly changing landscape with reflective action This key title is crucial reading for all those involved in leadership and management positions in higher education. With an emphasis on principles of strategic and contextual thinking and problem-solving, alongside a strong commitment to shared values as key ingredients to the success of strategic leaders, this book provides expert commentary and global insights. This cutting-edge text will continue to provide higher education leaders and managers with insights against which to benchmark their approaches, supporting them to stay ahead of the curve.

*Transport and Logistics Planning and Optimization* Boukachour, Jaouad, Benaini, Abdelhamid, 2023-07-10 Logistics and transportation are a complex set of entities and systems interconnected by many physical, financial, and information flows, and, as with all systems, there are optimization and planning issues. In addition, they are subject to economic, social, and especially environmental pressures with the need to reduce energy consumption and greenhouse gas emissions. There is a need for original research to address these issues. Covering key topics such as supply chain, urban transportation, artificial intelligence, and computer science, this premier reference source is ideal for policymakers, industry professionals, researchers, academicians, scholars, instructors, and students.
