The Life Pill Alfred Sparman, MD,2016-02-25 We doctors have been patching up diseases for too long. We need to STOP. Some of the drugs currently used have dire side effects and may even be lethal. However all may not be lost. Man was intended to live forever. With the right tools infinite possibilities are within reach. Respiration and metabolism occurs in our body providing energy to survive. In these oxidation processes free radicals are produced. Now, free radicals in excess can be considered mans worst enemy. Free Radicals Attack on LDL particles (bad cholesterol) causes cardiovascular death (e.g myocardial infarction, stroke, and pulmonary embolisms) which is the number one cause of death in the world today. Free Radical attack on proteins and fats cause skin wrinkling (visible aging) and Free Radical attack on DNA causes cancer. These three reactions account for the majority of morbidity and mortality we face today. This book will introduce you to the answer! We need to attenuate and possibly reverse diseases from the Atomic, Molecular and Cellular Level. We need THE LIFE PILL!!!

Bioprospecting of Tropical Medicinal Plants Karuppusamy Arunachalam,Xuefei Yang,Sreeja Puthanpura Sasidharan,2023-08-30 This book focuses on natural products, in particular medicinal plants and their derived products, as an indispensable source of bioactive molecules that serve as either drug candidates or lead compounds for drug design and discovery . There are several advantages for plant-derived therapeutics, including wide availability, diverse pharmacological actions, and a generally good profile of safety and tolerability. Over the recent years, there have been numerous reports from clinical studies testifying the efficacy and safety of medicinal plants and phytochemicals in treating human diseases. A

plethora of basic studies has also unraveled molecular mechanisms underlying the health benefits of herbal medicines. Nevertheless, issues such as identification of bioactive ingredients, standardization of the products, and drug interactions remain to be systematically documented. Bioprospecting of Tropical Medicinal Plants represents a comprehensive analysis of natural products, mainly medicinal plants and phytochemicals. It includes detailed medicinal properties and pharmacological action from in vitro models to clinical trials. The goal is to present the readers a carefully curated collection of plant-derived natural products and their underlying molecular mechanisms.
