Violence and Power in Ancient Egypt Laurel Bestock, 2017-10-25 Violence and Power in Ancient Egypt examines the use of Egyptian pictures of violence prior to the New Kingdom. Starting with the assertion that making and displaying such images served as a tactic of power, related to but separate from the actual practice of violence, the book explores the development and deployment of this imagery across different contexts. By comparatively utilizing violent images from a variety of other times and cultures, the book asks that we consider not only how Egyptian imagery was related to Egyptian violence, but also why people create pictures of violence and place them where they do, and how such images communicate what to whom. By cataloging and querying Egyptian imagery of violence from different periods and different contexts—royal tombs, divine temples, the landscape, portable objects, and private tombs—Violence and Power highlights the nuances of the relationship between aspects of royal ideology, art, and its audiences in the first half of pharaonic Egyptian history.

The Power of the Bull Michael Rice, 2014-02-25 Everyone has heard of the Minotaur in the labyrinth on Crete and many know that the Greek gods would adopt the guise of a bull to seduce mortal women. But what lies behind these legends? The Power of the Bull discusses mankind's enduring obsession with bulls. The bull is an almost universal symbol throughout Indo-European cultures. Bull cults proliferated in the Middle East and in many parts of North Africa, and one cult, Mithraism, was

the greatest rival to Christianity in the Roman Empire. The Cults are divergent yet have certain core elements in common. Michael Rice argues that the ancient bulls were the supreme sacrificial animal. An examination of evidence from earliest prehistory onwards reveals the bull to be a symbol of political authority, sexual potency, economic wealth and vast subterranean powers. In some areas representations of the bull have varied little from earliest times, in others it has changed vastly over centuries. This volume provides a well-illustrated and accessible analysis of the exceptionally rich artistic inheritance associated with the bull.

*Archaeology* Paul Bahn,2017-11-07 Epic in scope, yet filled with detail, this illustrated guide takes readers through the whole of our human past. Spanning the dawn of human civilization through the present, it provides a tour of every site of key archaeological importance. From the prehistoric cave paintings of Lascaux to Tutankhamun's tomb, from the buried city of Pompeii to China's Terracotta Army, all of the world's most iconic sites and discoveries are here. So too are the lesser-known yet equally important finds, such as the recent discoveries of our oldest known human ancestors and of the world's oldest-known temple, Göbekli Tepe in Turkey. A masterful combination of succinct analysis and driving narrative, this book also addresses the questions that inevitably arise as we gradually learn more about the history of our species. Written by an international team of archaeological experts and richly illustrated throughout, *Archaeology: The Essential Guide to Our Human Past* offers an unparalleled insight into the origins of humankind.

**The Civilization Of Ancient Egypt** Paul Johnson,2012-02-07 A leading historian and bestselling author re-creates the growth, decline, and legacy of 3,000 Years of Egyptian civilization with an authoritative text splendidly illustrated with 150 illustrations in full color. Ancient Egypt, with its legacy of pyramids, pharaohs and sphinxes, is a land of power and mystery to the modern world. In *The Civilization of Ancient Egypt* Paul Johnson explores the growth and decline of a culture that survived for 3,000 years and maintained a purity of style that rivals all others. Johnson's study looks in detail at the state, religion, culture and geographical setting and how they combined in this unusually enduring civilization. From the beginning of Egyptian culture to the rediscovery of the pharaohs, the book covers the totalitarian theocracy, the empire of the Nile, the

structure of dynastic Egypt, the dynastic way of death, hieroglyphs, the anatomy of perspective art and, finally, the decline and fall of the pharaohs, Johnson seeks, through an exciting combination of images and analysis, to discover the causes behind the collapse of this, great civilization while celebrating the extra-ordinary legacy it has left behind. Paul Johnson on Ancient Egypt and the Egyptians Egypt was not only the first state, it was the first country.... The durability of the state which thus evolved was ensured by the overwhelming simplicity and power of its central institution, the theocratic monarchy. The Egyptians did not share the Babylonian passion for astrology, but they used the stars as one of many guides to behavior. No Egyptian believed in a free exercise of will in important decisions: he always looked for an omen or a prophecy or an oracle. The development of hieroglyphics mirrors and epitomizes the history of Egyptian civilization. . . . No one outside Egypt understood it and even within Egypt it was the exclusive working tool of the ruling and priestly classes. The great mass of Egyptians were condemned to illiteracy by the complexities (and also the beauties) of the Egyptian written language. The affection the Egyptians were not ashamed to display towards their children was related to the high status women enjoyed in Egyptian society. If we can understand Egyptian art we can go a long way towards grasping the very spirit and outlook on life, of this gifted people, so remote in time. The dynamic of their civilization seems to have been a passionate love of order (maat to them), by which they sought to give to human activities and creations the same regularity as their landscape, their great river, their sun-cycle and their immutable seasons.
