

Which Of The Following Is A Manifest Function Of Schools

John A. Laska

Sociology CN Shankar Rao, 2012 This textbook has been comprehensively written to acquaint the students with the fundamental concepts of sociology as well as provide an introduction to the diverse field of sociology. Students will be introduced to the origins of sociology as a discipline and would get acquainted with relevant topics such as inequality, institutions, control, change, disorganisation & problems in the society. Topics such as applied sociology and social thought have also been provided to give a complete overview of the subject. This textbook not only caters as a primary text to the undergraduate students of Sociology but is also a useful reference for postgraduate students and aspirants appearing for various competitive examinations.

Social Problems Mooney, Bel Ted Robert, Linda A. Mooney, David Knox, Caroline Schacht, 1996 This new text from a respected author team hones in on understanding the structure and culture of society as a basis for understanding social problems. Its integrative theoretical approach uses three theoretical perspectives to understand each social problem. The authors use take-action orientation to suggest solutions to social problems. The text weaves a global perspective throughout the text, emphasizing that ours is no longer an isolated society.

Towards Successful Schooling (RLE Edu L Sociology of Education) Hugh Lauder, Cathy Wylie, 2012-05-23 The editors have compiled this critical and comparative study of changes which took place in the New Zealand education system in the second half of the twentieth century. For other Western societies who have felt the impact of New Right policies the New Zealand case is interesting because it provides some indication of how policies of decentralization in education might be used to develop egalitarian and democratic educational policies. In recent years there have been major changes to educational systems in the Western world. Often these changes have been justified by reference to successful educational practices in other countries. However, it is not always possible simply to abstract educational practices from one context and

apply them in another successfully. Moreover claims that policies in one country are more successful than those in another have to be treated cautiously: there are always problems in making valid comparisons between the educational performances of different countries. It is important, therefore, that critical and comparative studies are made of educational systems which take full account of the contexts in which they are embedded.

Sociology Richard T. Schaefer,Robert P. Lamm,1994 By focusing closely on the basic ideas behind sociological theory and research, this concise text provides a firm knowledge base without overwhelming students with nonessential material. Because theories and research methods are applied to substantive areas throughout the text, students develop the kind of meaningful understanding often acquired only through more expensive, full-length texts.

Religious Freedom Olga Breskaya,Giuseppe Giordan,Siniša Zrinščak,2023-09-12 Religious freedom has become increasingly important across the global spectrum over the past decades but has remained a contested concept. This book fills the gap in the scholarship on religious freedom by focusing on sociological dimensions and research methods. Chapters in this book present data and case studies from Italy, Russia, Iran, Israel, South Korea, and the United States, encompassing a broad geographical scope, and highlight three main issues. The first is the deep and persistent gap between normative and actual practices. The detailed analyses bring insights into how religious freedom is understood and implemented in various contexts and its meaning in everyday life. The second one is the complex interplay of various religious and secular actors in each society. Chapters focus on how it is essential to study how states define religious freedom and the impact of other actors, such as nongovernmental organisations, religious institutions, communities, leaders, and members of various religious/non-religious groups. The third is the role of rival ideologies and the impact of extraordinary social events, such as the COVID pandemic, which can considerably change how religious freedom is conceptualised and implemented. The book will be a key resource for academics, researchers, and advanced students of Religion, Sociology, Comparative Studies, Research Methods and Social Sciences. The chapters included in this book were originally published as a special issue of Religion, State and Society.
