Pierre Koenig Neil Jackson,2019-02-05 A heavily illustrated and highly designed tribute to Los Angeles architect Pierre Koenig, a key figure of the Los Angeles Modernist movement. In this remarkable and gorgeously illustrated book, Neil Jackson presents a vibrant profile of the Los Angeles architect Pierre Koenig, who Time magazine said lived long enough to become “cool twice.” From the influences of Koenig’s youth in San Francisco and his military service during World War II to the Case Study Houses and his later award-laden years, Jackson’s study plots the evolution of Koenig’s oeuvre against the backdrop of Los Angeles—a city that both shaped and was shaped by his architecture. The book is anchored by Jackson’s exciting discoveries in Koenig’s archive at the Getty Research Institute. Drawings, photographs, diaries, letters, lecture notes, building contracts, and university projects—many of which are published for the first time—provide an expanded understanding of Koenig and additional context for his architectural achievements. An examination of Koenig’s Case Study Houses shows how his often single-minded and pragmatic approach to domestic architecture recognized the advantages of production housing and presciently embraced sustainable, ecologically responsible design. A new account of the Chemehuevi housing project in Havasu Lake, California, demonstrates the special role that learning and teaching played in the development of his architecture. Over his fifty-year career, Koenig not only designed iconic houses but also directed their restoration and curated their legacy, ensuring that his work could be seen and appreciated by present and future admirers of midcentury Los Angeles.

Pierre Koenig James Steele,Pierre Koenig,David Jenkins,1998 Koenig designed some of Los Angeles' most admired houses and was a pioneer of what came to be described as the 'Case Study House Program'. This is the first comprehensive survey of his entire career and includes photographs, sketches and drawings.

The Architect and Designer Birthday Book James Biber,2024-06-25 A thoughtfully curated collection in a stunning package that recognizes and celebrates the birthdays of famous, infamous, and often-overlooked designers and architects. The gift book for design and architect professionals and students they didn’t know they needed but will no longer be able to live without. Drawn from architect James Biber's epic Instagram project in which he posted a birthday bio of a famous (or less famous) designer or architect every day for a (mid-pandemic) year, *The Architect and Designer Birthday Book* is filled with personal, opinionated, and humorous observations on fascinating design and architect figures past and present. The

minibiographies and birthday profiles in the book cover a range of international architects and designers, as well as artists, including: Architects from the Aaltos (Aino and Alvar) to Zumthor Rivals Bernini and Borromini Photographers Lee Miller, Louise Dahl-Wolfe, Vivian Maier, Dody Weston Thompson, Margaret Morton, and Judith Turner Midcentury modernists Marcel Breuer, Walter Gropius, and Florence Knoll Charlotte Perriand, Lilly Reich, Anne Tyng, and Denise Scott Brown More anecdotal histories than authorized biographies, these daily profiles are not only fun to read but provide spot-on commentary for anyone interested in how designers and architects relate to each other as well as their place in history. It is the intersection of Biber's life and the history of architecture and design.

California Design, 1930&1965 Living In a Modern Way Wendy Kaplan,2011 The first comprehensive examination of California's mid-century modern design, generously illustrated. In 1951, designer Greta Magnusson Grossman observed that California design was not a superimposed style, but an answer to present conditions.... It has developed out of our own preferences for living in a modern way. California design influenced the material culture of the entire country, in everything from architecture to fashion. This generously illustrated book, which accompanies a major exhibition at the Los Angeles County Museum of Art, is the first comprehensive examination of California's mid-century modern design. It begins by tracing the origins of a distinctively California modernism in the 1930s by such European émigrés as Richard Neutra, Rudolph Schindler, and Kem Weber; it finds other specific design influences and innovations in solid-color commercial ceramics, inspirations from Mexico and Asia, new schools for design training, new concepts about leisure, and the conversion of wartime technologies to peacetime use (exemplified by Charles and Ray Eames's plywood and fiberglass furniture). The heart of California Design is the modern California home, famously characterized by open plans conducive to outdoor living. The layouts of modernist homes by Pierre Koenig, Craig Ellwood, and Raphael Soriano, for example, were intended to blur the distinction between indoors and out. Homes were furnished with products from Heath Ceramics, Van Keppel-Green, and Architectural Pottery as well as other, previously unheralded companies and designers. Many objects were designed to be multifunctional: pool and patio furniture that was equally suitable indoors, lighting that was both task and ambient, bookshelves that served as room dividers, and bathing suits that would turn into ensembles appropriate for indoor entertainment. California Design includes 350 images, most in color, of furniture, ceramics, metalwork, architecture, graphic and industrial design, film, textiles, and fashion, and ten incisive essays that trace the rise of the California design aesthetic. of wartime technologies to peacetime use (exemplified by Charles and Ray Eames's plywood and fiberglass furniture). Man-Made Wonders of the World DK,2019-10-08 Discover the most incredible man-made wonders, from Stonehenge to Burj Khalifa, with this unparalleled catalog of the most famous and intriguing buildings and monuments created by humans. Manmade Wonders of the World features a range of structures from buildings to monuments, statues, and bridges, including the Golden Gate Bridge and Hoover Dam. It opens with a foreword by Dan Cruickshank and then takes the reader on a continent-by-continent journey, exploring and charting the innovations, ingenuity, and imagination employed by different cultures to create iconic buildings such as the Great Pyramid of Giza. This truly global approach reveals how humans tackled similar challenges, such as keeping the enemy out, in vastly different parts of the world, from the Great Wall of China to the defensive walls of Central American cities. Illustrations explain how the structures were built, while explanations cover the history, architecture, and unique stories behind their construction. Featuring breathtaking images, Manmade Wonders of the World is a complete celebration of the world humans have built over thousands of years.

Dwell, 2000-10 At Dwell, we're staging a minor revolution. We think that it's possible to live in a house or apartment by a bold modern architect, to own furniture and products that are exceptionally well designed, and still be a regular human being. We think that good design is an integral part of real life. And that real life has been conspicuous by its absence in most design and architecture magazines.

Handbook of Research on Methods and Tools for Assessing Cultural Landscape Adaptation Rosa, Isabel de Sousa, Lopes, Joana Corte, Ribeiro, Ricardo, Mendes, Ana, 2018-06-22 In a globalizing and expanding world, the need for research centered on analysis, representation, and management of landscape components has become critical. By providing development strategies that promote resilient relations, this book promotes more sustainable and cultural approaches for territorial construction. The Handbook of Research on Methods and Tools for Assessing Cultural Landscape Adaptation provides emerging research on the cultural relationships between a community and the ecological system in which they live. This book highlights important topics such as adaptive strategies, ecosystem services, and operative methods that explore the

expanding aspects of territorial transformation in response to human activities. This publication is an important resource for academicians, graduate students, engineers, and researchers seeking a comprehensive collection of research focused on the social and ecological components in territory development.

The Greenwood Encyclopedia of Homes Through World History James M. Steele, 2009-03-30 The house, throughout history, in every place in the world, has been built to provide shelter from the elements. The dwellings that have resulted are as different as the people that have built them, the social norms that prevailed at the time and place in which they were built and the natural environment that they adapted to. Studying them now in a comprehensive way allows us to understand the social, political, economic and religious conditions that existed for their inhabitants. They are a three-dimensional record of culture. Twenty-four pages of color images, along with black and white images through three volumes, illustrate the homes of people throughout the world. The volumes cover ancient times to the late Middle Ages, the Renaissance to the Industrial Revolution, and the Post-Industrial Revolution to the Present.

The Elements of Style Stephen Calloway, Elizabeth C. Cromley, Alan Powers, 2005 An impressive reference work. - Library Journal (on the 1997 edition) A richly detailed and easy-to-use reference to 500 years of architectural details and styles. Owners and potential buyers of period houses, restorers, architects, interior designers and historical preservationists will find this reference invaluable. The Elements of Style is the most comprehensive visual survey, period-by-period, feature-by-feature, of the styles that have had the greatest impact on interiors of American and British domestic architecture. Compiled by a team of experts, this is the first book on architectural styles that is comprehensive, incredibly thorough, and accessible in its presentation of individual details. This magnificent volume covers more than 500 years of architectural styles from Tudor to Post-Modern and includes American and British vernacular styles. First published in 1991 (with 150,000 copies sold), this new edition is expanded to include the most contemporary styles. Detailed illustrations include 3,000 analytical drawings and historic engravings, 400 photographs in color and 1,000 in black and white. The heart of The Elements of Style is a chronological survey of the primary styles and periods of architectural design. Each chapter begins with an illustrated essay, then covers in detail features such as: Doors Windows Walls, floors and ceilings Staircases Ironwork and hardware Woodwork and built-in furniture Kitchen stoves and fireplaces Essential period architectural details, and more. The book also includes: A useful system of quick reference, employing color-coded tabs showing how particular features evolved over time, and A fully updated resource list with contact information for locating suppliers of those design elements illustrated throughout the book. The Elements of Style is the essential reference for preservationists, architects, interior designers, owners of period homes, and historians.
