

Gesture Control In Cars

Xiang Xie

Gesture Control Lucas Lee, AI, 2025-03-06 Gesture Control explores the exciting world of using hand movements to interact with technology. Imagine waving your hand to control your TV or computer – this book dives into how machines can understand and respond to our gestures. It covers the technologies that make this possible, like advanced sensors and computer vision, and the smart algorithms that translate gestures into commands. One interesting fact is that gesture control is already being used in cars to manage infotainment systems, enhancing driver safety. The book uniquely blends the theoretical foundations with real-world applications, highlighting the advancements in machine learning that enable complex gesture recognition. It begins by explaining the basics, such as the different sensors used to capture hand movements, and then moves on to more advanced topics like convolutional neural networks. You'll discover how gesture control is revolutionizing various fields, from virtual reality gaming to assistive technologies for people with disabilities. The book emphasizes how this technology can make interfaces more natural and accessible, moving us beyond traditional keyboards and mice.

AI for Cars Josep Aulinas, Hanky Sjafrie, 2021-07-28 Artificial Intelligence (AI) is undoubtedly playing an increasingly significant role in automobile technology. In fact, cars inhabit one of just a few domains where you will find many AI innovations packed into a single product. AI for Cars provides a brief guided tour through many different AI landscapes including robotics, image and speech processing, recommender systems and onto deep learning, all within the automobile world. From pedestrian detection to driver monitoring to recommendation engines, the book discusses the background, research and progress thousands of talented engineers and researchers have achieved thus far, and their plans to deploy this life-saving technology all over the world.

Advances in Human Aspects of Transportation Neville A Stanton, 2017-06-22 This book discusses the latest advances in research and development, design, operation and analysis of transportation systems and their complementary infrastructures. It reports on both theories and case studies on road and rail, aviation and maritime transportation. The book covers a wealth of topics, from accident analysis, vehicle intelligent control, and human-error and safety issues to next-generation transportation systems, model-based design methods, simulation and training techniques, and many more. A special emphasis is given to smart technologies and automation in transport, as well as to user-centered, ergonomic and

sustainable design of transport systems. The book, which is based on the AHFE 2017 International Conference on Human Factors in Transportation, held on July 17-21, Los Angeles, California, USA, mainly addresses transportation system designers, industrial designers, human-computer interaction researchers, civil and control engineers, as well as vehicle system engineers. Moreover, it represents a timely source of information for transportation policy-makers and social scientists dealing with traffic safety, management, and sustainability issues in transport.

Autonomous Vehicles and Virtual Reality Andras Kemeny, 2023-10-28 This book concisely describes the technologies, human perception, and cognition issues relevant to autonomous vehicles. It also gives an insight in the changes bring about our future everyday lives. Autonomous vehicles are the future of the automobile industry. Automated driving (AD), also called self-driving, raises however several multiple questions, among them those of user safety and acceptance. Comprehensive HMI system design, with windshield display technics, will be necessary to deal with driving task delegations, bringing the use of VR or augmented reality (AR) technologies. In addition, the use of VR for all the vehicle interiors will progressively be proposed for entertainment, online business activities and for modified visual motion perception to alleviate car sickness, a form of motion sickness. Indeed, car sickness is already well known for many passengers, especially when reading or operating smartphones or other display devices. It is called to increase significantly with the introduction of autonomous vehicles where all users will be for long periods in various sitting positions. These two new trends, AD and VR, are already modifying our relationship with the world and the society. All together, they will change our way of life forever. The book will be of interest to professionals in the auto industry, researchers in automotive engineering and computer science and all those interested in the future of transport.

Advances in Usability, User Experience and Assistive Technology Tareq Z. Ahram, Christianne Falcão, 2018-06-27 This book focuses on emerging issues in usability, interface design, human-computer interaction, user experience and assistive technology. It highlights research aimed at understanding human interaction with products, services and systems, and focuses on finding effective approaches for improving user experience. It also discusses key issues in designing and providing assistive devices and services to individuals with disabilities or impairment, to assist mobility, communication, positioning, environmental control and daily living. The book covers modelling as well as innovative design concepts, with a special emphasis on user-centered design, and design for specific populations, particularly the elderly. Virtual reality, digital environments, heuristic evaluation and forms of device interface feedback of (e.g. visual and haptic) are also among the topics covered. Based on the AHFE 2018 Conference on Usability & User Experience and the AHFE 2018 Conference on Human Factors and Assistive Technology, held on July 21-25, 2018, in Orlando, Florida, USA, this book reports on cutting-edge findings, research methods and user-centred evaluation approaches.

Towards Industry 5.0 Numan M. Durakbasa, M. Güneş Gençylmaz, 2023-03-01 This book contains selected papers from

International Symposium for Production Research 2022, held on October 6-9, 2022, Turkey. The book reports recent advances in production engineering and operations. It explores topics including: production research; production management; operations management; industry 4.0; industrial engineering; mechanical engineering; engineering management; and operational research. Presenting real-life applications, case studies, and mathematical models, this book is of interest to researchers, academics, and practitioners in the field of production and operation engineering. It provides both the results of recent research and practical solutions to real-world problems.

Recent Developments in Electrical and Electronics Engineering Poonam Singhal, Sakshi Kalra, Bhim Singh, R. C. Bansal, 2023-04-28 This book contains cutting-edge research content presented by researchers, engineers, developers, and practitioners from academia and industry at the International Conference on Recent Developments in Electrical and Electronics Engineering (ICRDEEE 2022). The materials in the book include theory and applications for different areas of Electrical and Electronics Engineering. The topics covered include power systems and protection, energy, electric vehicles, smart grid, semiconductor technologies, electrical machines and drives, control systems with artificial intelligence, etc. The content is useful for researchers, professionals, and academicians in understanding current research trends, findings, and future scope of research in electrical and electronics engineering models.

Proceedings of the Adisutjipto Aerospace, Science and Engineering International Conference (AASEIC 2024) Freddy Kurniawan, Sudaryanto Sudaryanto, Fajar Khanif Rahmawati, Eli Kumolosari, Gunawan Gunawan, 2025-03-28 This is an open access book. Adisutjipto Aerospace, Science Adisutjipto Aerospace, Science and Engineering International Conference (AASEIC) is managed by the Research and Community Service Institute (LPPM) of Adisutjipto Aerospace Technology Institute (ITD Adisutjipto). This conference is held to gather academics, researchers, students, and practitioners to promote and share the ideas, knowledge and publish scientific works, research, theses, and dissertations to support technological innovation. This first AASEIC Conference carries the theme Shaping the Future Work for the Aerospace Technology in Science, Engineering, and Industry in the Disruptive Era which will be held online on December 11-12, 2024

Proceedings of the 5th International Conference on Signal Processing and Information Communications Chua-Chin Wang, Arumugam Nallanathan, 2022-11-16 This book presents the proceedings of the 5th International Conference on Signal Processing and Information Communications (ICSPIC)), which was held in Paris, France on March 14-16, 2022. The conference solicits papers on all aspects of signal processing and information communications, which includes mixed signal processing, multimedia signal processing, nonlinear signal processing, communication theory and techniques, optical communications, and wireless networks. The conference is made up of theorists and experts in advanced characterization techniques in the fields of signal processing and information communications, which brings researchers, practitioners, and scientists in discussion of the latest methods, research developments, and future opportunities.
