Animal Ethics for Veterinarians Andrew Linzey, Clair Linzey, 2017-08-15 Veterinarians serve on the front lines working to prevent animal suffering and abuse. For centuries, their compassion and expertise have improved the quality of life and death for animals in their care. However, modern interest in animal rights has led more and more people to ask questions about the ethical considerations that lie behind common veterinary practices. This Common Threads volume, drawn from articles originally published in the Journal of Animal Ethics (JAE), offers veterinarians and other interested readers a primer on key issues in the field. Essays in the first section discuss aspects of veterinary oaths, how advances in animal cognition science factor into current ethical debates, and the rise of complementary and alternative veterinary medicine and its relationship to traditional veterinary medicine. The second section continues with an essay that addresses why veterinarians have an obligation to educate animal caregivers to look past cuteness in order to treat all animals with dignity. The collection closes with three short sections focusing on animals in farming, trade, and research "areas where veterinarians encounter conflicts between their job and their duty to advocate and care for animals. Contributors: Judith Benz-Schwarzburg, Vanessa Carli Bones, Grace Clement, Simon Coghlan, Priscilla N. Cohn, Mark J. Estren, Elisa Galgut, Eleonora Gullone, Matthew C. Halteman, Andrew Knight, Drew Leder, Andrew Linzey, Clair Linzey, Kay Peggs, Megan Schommer, Clifford Warwick, and James W. Yeates.

El exilio científico republicano en Argentina. DÍAZ-R. LABAJO, M.^a Aránzazu, 2016-06-15 El trabajo reconstruye las trayectorias vitales y laborales de los médicos españoles y profesionales de las ciencias afines que se trasladaron a Argentina con motivo de la guerra civil española y el proceso represor del régimen franquista. Partiendo del estudio de la Edad de Plata de la cultura y la ciencia españolas, concretamente la ciencia médica, las experiencias vitales y laborales de los exiliados se insertan en un contexto científico y sociopolítico muy particular, como es el argentino. A partir de aquí, se analiza cómo la guerra civil se convirtió en un punto de ruptura en las trayectorias de los médicos exiliados y cómo se recompusieron en la sociedad de acogida y su imbricación en la ciencia argentina. Se abarcan los diferentes ámbitos profesionales de la medicina exiliada, universidades, hospitales, asociacionismo, etc., a lo largo y ancho de la geografía argentina. Se estudia, además, la participación de este exilio científico en el exilio político y cultural. El trabajo se ha realizado desde la órbita de la historia de las migraciones, donde destaca la aplicación del concepto de redes (redes científicas, institucionales, sociales y familiares) a los procesos de exilio; y la historia de la ciencia, utilizando el concepto de generación y la metodología de la biografía individual y de la biografía colectiva (prosopografía).

History of Rabies in the Americas: From the Pre-Columbian to the Present, Volume II Charles E. Rupprecht, 2024-06-28 Rabies is one of the oldest known pathogens, is incurable, and has the highest fatality rate of all infectious diseases. The Americas is the only region with bat rabies virus, including vampire bat rabies. The region is rich in cultural references and notable for many discoveries in the field, including the current vaccine potency test, diagnostic assay, conception of oral vaccines for wildlife, the first human survivor and the first successful canine rabies program executed at a broad level. Rabies remains the most important viral zoonosis, with tens of thousands of human fatalities and tens of millions of exposures annually, which can be used to model for other pathogens, such as COVID-19. There is an international effort to eliminate human rabies caused by dogs over the next decade, and the Americas represent the primary region with the greatest proof-of-concept evidence to accomplish this goal. This two-volume set addresses the medical history and modern results of rabies in countries throughout the Americas, including the implications of and on cultural, economic, sociological, and research developments in the region. Volume II provides an in-depth analysis of the rabies' presence and impact in specific countries, including historical perspectives, advances in research and understanding, and current status.

Modernas, cultas y profesionales Miqueo, Consuelo, Blázquez Oñat, Isabel, 2020 El libro es un reconocimiento textual y visual de la presencia y relevancia de las mujeres académicas de la Universidad de Zaragoza, cuyo distrito universitario comprendía las provincias de Zaragoza, Huesca, Teruel, Logroño, Soria y Navarra. Capítulo a capítulo, traza biografías personales o colectivas de las tituladas en Derecho, Filosofía, Ciencias, Medicina, Magisterio, Enfermería, Matronas, Practicantes, y Terapia Ocupacional. Las trayectorias profesionales analizadas muestran dos grandes modelos: cultas amas de casa, esposas y madres de familia o modernas profesionales diseminadas por toda España y fuera de ella.

Historiográficamente considerado, este libro es un buen modelo para otras instituciones, puesto que la Universidad de Zaragoza es la primera en ofrecer su genealogía femenina.

Horse Breeds and Human Society Kristen Guest, Monica Mattfeld, 2019-11-26 This book demonstrates how horse breeding is entwined with human societies and identities. It explores issues of lineage, purity, and status by exploring interconnections between animals and humans. The quest for purity in equine breed reflects and evolves alongside human subjectivity shaped by categories of race, gender, class, region, and nation. Focusing on various horse breeds, from the Chincoteague Pony to Brazilian Crioulo and the Arabian horse, each chapter in this collection considers how human and animal identities are shaped by practices of breeding and categorizing domesticated animals. Bringing together different historical, geographical, and disciplinary perspectives, this book will appeal to academics, as well as undergraduate and postgraduate students, in the fields of human-animal studies, sociology, environmental studies, cultural studies, history, and literature.

The scientific dialogue linking America, Asia and Europe between the 12th and the 20th Century. Fabio D'Angelo, 2018-06-11 The first volume of Viaggiatori "Curatele" series seeks to recreate some scientific dialogues, namely meetings, exchanges and acquisition of theoretical and practical scientific knowledge, thus linking the cultural, historical and geographical context of America, Asia, Europe and Mediterranean Sea between the 16th and the 20th century. More specifically, the main objective is to consider the role of travellers as passeurs, as "intermediaries" for building and allowing the circulation of knowhow and the practical and theoretical knowledge from one continent to another.
