Isaac Asimov

Fantastic Voyage Isaac Asimov, 1988-07-01 A fabulous adventure into the last frontier of man! Attention! This is the last message you will receive until your mission is completed. You have sixty minutes once miniaturization is complete. You must be out of Benes' body before then. If not, you will return to normal size and kill Benes regardless of the success of the surgery. Four men and one woman reduced to a microscopic fraction of their original size, boarding a miniaturized atomic sub and being injected into a dying man's carotid artery. Passing through the heart, entering the inner ear where even the slightest sound would destroy them, battling relentlessly into the cranium. Their objective . . . to reach a blood clot and destroy it with the piercing rays of a laser. At stake . . . the fate of the entire world.

Cinema of Exploration James Leo Cahill, Luca Caminati, 2020-12-29 Drawing together 18 contributions from leading international scholars, this book conceptualizes the history and theory of cinema's century-long relationship to modes of exploration in its many forms, from colonialist expeditions to decolonial radical cinemas to the perceptual voyage of the senses made possible by the cinematic apparatus. This is the first anthology dedicated to analysing cinema's relationship to exploration from a global, decolonial, and ecological perspective. Featuring leading scholars working with pathbreaking interdisciplinary methodologies (drawing on insights from science and technology studies, postcolonial theory, indigenous ways of knowing, and film theory and history), it theorizes not only cinema's implication in imperial conquest but also its cutting-edge role in empirical expansion and experiments in sensual and critical perception. The collected essays consider filmmaking in cross-cultural contexts and films made in or about peoples in South America, Asia, Africa, Indigenous North America, as well as polar, outer space, and underwater exploration, with famous figures such as Jacques Yves Cousteau alongside amateur and scientific filmmakers. The essays in this collection are ideal for a broad range of scholars, graduate students, and advanced undergraduate students in cinema and media studies, cultural studies, and cognate fields.

Letters to a Young Chemist Abhik Ghosh, 2011-04-05 What's it really like to be a chemist? Leading chemists share what they do, how they do it, and why they love it. "Letters to a young ..." has been a much-loved way for professionals in a field to convey their enthusiasm and the realities of what they do to the next generation. Now, *Letters to a Young Chemist* does the same for the chemical sciences. Written with a humorous touch by some of today's leading chemists, this book presents missives to "Angela," a fictional undergraduate considering a career in chemistry. The different chapters offer a mix of fundamental principles, contemporary issues, and challenges for the future. Marye Anne Fox, Chancellor of the University of California San Diego, talks about learning to do research and modern physical organic chemistry. Brothers Jonathan and Daniel Sessler explain the chemistry of anesthetics that make modern surgery possible while Elizabeth Nolan talks about biological imaging. Terry Collins talks about green chemistry, a more sustainable way of doing chemistry, while several authors including Carl Wamser, Harry Gray, John Magyar, and Penny Brothers discuss the crucial contributions that chemists can make in meeting global energy needs. *Letters to a Young Chemist* gives students and professionals alike a unique window into the real world of chemistry. Entertaining, informative, and full of honest and inspiring advice, it serves as a helpful guide throughout your education and career. "The different chapters describe both the wonders of the molecular world and the practical benefits afforded by chemistry ... and if any girl out there thinks that chemistry is a man's world, this book should be a good antidote." —Marye Anne Fox, Chancellor of the University of California, San Diego, and winner of the 2009 US National Medal of Science "Letters to a Young Chemist offers significant ammunition for motivating young people to consider chemistry as a career. ... This book should also be required reading for all faculty members who teach chemistry in high schools, colleges, and universities." —Stephen J. Lippard, Arthur Amos Noyes Professor of Chemistry, Massachusetts Institute of Technology, and winner of the 2006 US National Medal of Science
