*Ecosystem Functions and Management* Harpinder Sandhu,2017-03-21 This is the first book to provide vital information on key local ecosystems, their functions, state of health, and their role in development in an Asian context, particularly on the Indian subcontinent. It addresses six major ecosystems on the Indian subcontinent - mountain, rural, desert, forest, urban, and freshwater - and discusses their functions, how they support livelihoods and the economy, the impacts on ecosystem services, and management issues. Asia is home to nearly one third of the global population. With massive industrialization occurring at an increasing pace to support the lifestyles of a growing population, impacts on natural ecosystems are inevitable in this region. The book also explores the concepts, theory and practice regarding these key ecosystems by linking them with the livelihoods of a large population base and subsequently illustrating their importance for sustainable development in the region. Further, by suggesting policies and ways in which these systems can be maintained and enhanced, it facilitates better management of natural resources within the ecological constraints to achieve socio-economic objectives and move towards a green economy for sustainable and equitable development in the region.

*Groundwater Environment in Asian Cities* Sangam Shrestha,Vishnu Prasad Pandey,Shashidhar Thatikonda,Binaya Raj Shivakoti,2016-02-11 Groundwater contributes to the sustainable development of many Asian cities by providing water for domestic, industrial and agricultural uses and regulating ecosystem flows. However, groundwater has not always been properly managed, which often has resulted in depletion and degradation of the resource. *Groundwater Environment in Asian Cities* presents the up-to-date scientific knowledge on groundwater environment in fourteen Asian cities using Driver-Pressure-State-Impact-Response (DPSIR) framework. In detail the book presents the facts and figures of groundwater dependency, problems related to groundwater over exploitation, implementation of various policy instruments and management practices and their results in selected fourteen Asian cities, namely; Bandung (Indonesia), Bangkok (Thailand), Beijing (China), Bishkek (Kyrgyzstan), Chitwan (Nepal), Delhi (India), Dili (East Timor), Ho Chi Minh (Vietnam), Hyderabad (India), Khulna (Bangladesh), Lahore (Pakistan), Seoul (South Korea), Tokyo (Japan), and Yangon (Myanmar). The book provides the one-step platform to get sufficient details about groundwater aquifers, hydrogeology, groundwater status, impacts on groundwater environment and responses (technology, policy, institutional, etc.) deployed in the case studies

cities, and therefore, provides a snap-shot of Asian groundwater environments. The theoretical background of the topics discussed along with the case studies help the readers understand the similarities and differences about the status of groundwater development and use in each city. In addition, the information in the book will serve as a baseline for other research such as mitigation of groundwater related problems (e.g., land subsidence), impact of climate change on groundwater, and importance of groundwater for implementing sustainable development goals in future. - Presents a framework for evaluating groundwater environment in urban environments - Includes case studies and local examples from a broad geographical range of urban environments from virtually every region in Asia, including Bandung, Bangkok, Delhi, Bishkek, Beijing and Tokyo - The book will be a valuable resource for groundwater adversaries in the scientific, decision-making and end-user communities, particularly for understanding and assessing state of groundwater resources in the region as well as learning from the responses practiced so far (Dr. Linda Anne Stevenson, APN) - The contents in this book are very much useful for informed decision-making for protecting groundwater environment and therefore contributes in making invisible visible (Dr. Neno Kukuric, IGRAC) - With concrete examples and lessons for readers, this book responds to the call for comprehensive research and studies, the implementation of new science-based methodologies and endorsement of principles for groundwater resources management and cities (Dr. Aureli Alice, UNESCO-IHP) - As a Regional Hub for Groundwater Management in the Asia Pacific Region, IGES finds this book as a very much useful reference for knowledge hub partners, groundwater managers, academic institutions, research scholars, and international organizations working in the areas of groundwater in Asia and beyond (Dr. Hideyuki Mori, IGES)

Environmental Sustainability in Emerging Markets Ninh Nguyen, Hoang Viet Nguyen, Clare D'Souza, Carolyn Strong,2022-05-19 Increasing evidence of environmental deterioration in emerging markets, climate change, and consequences of environmental waste have compelled not only businesses but also consumers to reduce the environmental burden, mitigate waste and preserve resources for future generations. What actions, strategies, practices, and policies can be developed to sustain environmental sustainability in emerging markets? This book brings together fresh insights, ideas, and new research directions. This book consists of eleven chapters which examine environmental sustainability from consumer, organisation and policy perspectives. These chapters are contributed by emerging and eminent authors from different regions of the world including Asia, Australia, Europe, North America, and South America. This book provides an insightful and valuable compendium for sustainability researchers, businesses, educators, and policymakers, and readers

concerned about socio-environmental issues and sustainable development. The book provides policymakers and businesses with information to assist the development of policies, strategies, and programs which will develop and encourage environmentally sustainable behaviours and practices in emerging markets and the wider global community
