**Create a Culture of Kindness in Middle School** Naomi Drew, Christa Tinari, 2017-10-02 Practical, research-based lessons for middle school educators to teach students pro-social attitudes and behaviors to prevent bullying. *Create a Culture of Kindness in Middle School* focuses on positive and pro-social attitudes and behaviors that build a respectful and compassionate school environment, while also addressing the tough issues of prejudice, anger, exclusion, and bullying. Through role-playing, perspective-taking, sharing, writing, discussion, and more, students develop the insights and skills they need to accept differences, resolve conflicts peacefully, stop bullying among peers, and create a community of kindness in their classrooms and school. Based on survey data gathered by the authors from more than 1,000 students, the book's research-based lessons are easy to implement and developmentally appropriate. Digital content includes student handouts from the book.

Phenomenography in the 21st Century Gerlese S. Åkerlind, 2025-02-10 Phenomenography offers a distinctive approach to studying human experience of the world, by highlighting different ways in which the same phenomena (concepts, objects, events) are experienced within any group of people. Phenomenography focuses on the relationship between meaning—people’s holistic understanding of phenomena—and structure, that is the part-whole structure of people’s awareness of phenomena. This structure of awareness then forms the basis for identifying differences in the experienced meaning of phenomena, and how awareness needs to change to allow new meanings to emerge—whether educationally, historically, culturally or socially. Over its 50-year history, there have been substantial advancements in the methods and theoretical assumptions underlying phenomenographic research, but these developments are not always recognised. This book details how the 21st-century practice of phenomenography differs from its earlier iterations, emphasising that earlier works can be misleading when used to justify current research practices. Phenomenography is a developing, not static, approach to social science research, and this book introduces further methodological and theoretical extensions to the research. Although most commonly used in educational research, the potential of phenomenography to contribute to research in other social science disciplines is increasingly being recognised and is further emphasised in this book. In this way, this book is not only essential reading for doctoral students, but will also be of interest to those already experienced in phenomenography, and to social science researchers within and outside the field of education.

*Likewar* P. W. Singer, Emerson T. Brooking, 2018-10-02 Two defense experts explore the collision of war, politics, and social media, where the most important battles are now only a click away. Through the weaponization of social media, the internet is changing war and politics, just as war and politics are changing the internet. Terrorists livestream their attacks, “Twitter wars” produce real-world casualties, and viral misinformation alters not just the result of battles, but the very fate of nations. The result is that war, tech, and politics have blurred into a new kind of battlespace that plays out on our smartphones. P. W. Singer and Emerson Brooking tackle the mind-bending questions that arise when war goes online and the online world goes to war. They explore how ISIS copies the Instagram tactics of Taylor Swift, a former World of Warcraft addict foils war crimes thousands of miles away, internet trolls shape elections, and China uses a smartphone app to police the thoughts of 1.4 billion citizens. What can be kept secret in a world of networks? Does social media expose the truth or bury it? And what role do ordinary people now play in international conflicts? Delving into the web’s darkest corners, we meet the unexpected warriors of social media, such as the rapper turned jihadist PR czar and the Russian hipsters who wage unceasing infowars against the West. Finally, looking to the crucial years ahead, *LikeWar* outlines a radical new paradigm for

understanding and defending against the unprecedented threats of our networked world.

**At the Edge of AI** Libuše Hannah Veprek, 2024-08-02 How are human computation systems developed in the field of citizen science to achieve what neither humans nor computers can do alone? Through multiple perspectives and methods, Libuše Hannah Veprek examines the imagination of these assemblages, their creation, and everyday negotiation in the interplay of various actors and play/science entanglements at the edge of AI. Focusing on their human-technology relations, this ethnographic study shows how these formations are marked by intraversions, as they change with technological advancements and the actors' goals, motivations, and practices. This work contributes to the constructive and critical ethnographic engagement with human-AI assemblages in the making.

**Rilke's Poetics of Becoming** Ben Hutchinson, 2006 Rainer Maria Rilke's early verse is often seen as having little relevance to the great achievement of the middle years, the *Neue Gedichte*. Yet the very different styles of the juvenilia and this new maturity are united by a preoccupation with processes of motion and growth which governs both his life and work. In this meticulous philological study, Ben Hutchinson reassesses every level of Rilke's early poetry, from its motives and metaphors to its very grammar and syntax, in order to trace what he terms a poetics of becoming. With careful attention to rhythm, resonance and linguistic detail, he illuminates both the hidden patterns of the poetry and the artistic context of the fin-de-siècle. From its roots in the intellectual climate of the 1890s to the poems inspired by Rodin in 1908, Rilke's stylistic development is set against the surprising consistency with which he pursues this poetics of becoming.

Discourse Constructions in English Aneider Iza Erviti, 2021-05-29 This book emphasizes the advantages of examining discourse connectivity from a constructionist perspective and highlights the role of discourse configurations in the construction of meaning. The research contained advances the field of cognitive classification and categorization of discourse constructions. The text is a great improvement in the discourse analysis literature, since it uniquely clarifies the subtleties of meaning between different discourse markers that are frequently treated as equivalent by lexicographers. It is unique in being the first contribution to the creation of a Constructicon at the discourse level and it fills an important gap within

cognitively oriented constructionist accounts that have mostly restricted their analyses to argument-structure and illocutionary constructions. This yearbook appeals to students and researchers working within corpus linguistics.

*Long Live Queer Nightlife* Amin Ghaziani,2026-02-17 It's closing time for an alarming number of gay bars in cities around the globe—but it's definitely not the last dance In this exhilarating journey into underground parties, pulsating with life and limitless possibility, acclaimed author Amin Ghaziani unveils the unexpected revolution revitalizing urban nightlife. Far from the gay bar with its largely white, gay male clientele, here is a dazzling scene of secret parties—club nights—wherein culture creatives, many of whom are queer, trans, and racial minorities, reclaim the night in the name of those too long left out. Episodic, nomadic, and radically inclusive, club nights are refashioning queer nightlife in boundlessly imaginative and powerfully defiant ways. Drawing on Ghaziani's immersive encounters at underground parties in London and more than one hundred riveting interviews with everyone from bar owners to party producers, revelers to rabble-rousers, *Long Live Queer Nightlife* showcases a spectacular, if seldom-seen, vision of a queer world shimmering with self-empowerment, inventiveness, and joy.
