Rule of the Robots Martin Ford,2021-09-14 The New York Times-bestselling author of Rise of the Robots shows what happens as AI takes over our lives If you have a smartphone, you have AI in your pocket. AI is impossible to avoid online. And it has already changed everything from how doctors diagnose disease to how you interact with friends or read the news. But in Rule of the Robots, Martin Ford argues that the true revolution is yet to come. In this sequel to his prescient New York Times bestseller Rise of the Robots, Ford presents us with a striking vision of the very near future. He argues that AI is a uniquely powerful technology that is altering every dimension of human life, often for the better. For example, advanced science is being done by machines, solving devilish problems in molecular biology that humans could not, and AI can help us fight climate change or the next pandemic. It also has a capacity for profound harm. Deep fakes—AI-generated audio or video of events that never happened—are poised to cause havoc throughout society. AI empowers authoritarian regimes like China with unprecedented mechanisms for social control. And AI can be deeply biased, learning bigoted attitudes from us and perpetuating them. In short, this is not a technology to simply embrace, or let others worry about. The machines are coming, and they won't stop, and each of us needs to know what that means if we are to thrive in the twenty-first century. And Rule of the Robots is the essential guide to all of it: both AI and the future of our economy, our politics, our lives.

Global Agricultural and Food Marketing in a Global Context: Advancing Policy, Management, and Innovation Maiwashe-Tagwi, Aluwani, Mawela, Ailweli Solomon, Chauke, Phineas Khazamula, 2023-03-20 Over 70% of food production is in the hands of farmers; however, numerous studies have shown that smallholder farmers do not have access to markets. The reasons for this failure have been attributed to a lack of financial resources and infrastructure. To date, no one has questioned the role that graduates, academics, agricultural economists, and agricultural extension officials play in the plight of market access. *Global Agricultural and Food Marketing in a Global Context: Advancing Policy, Management, and Innovation* discusses key aspects of the agricultural marketing context including the policy environment, the available local markets and how they operate, the conditions and requirements for international trade, the logistic system operations, and the technology developments in marketing. Covering topics such as produce, food production, and digital marketing, this reference work is ideal for farmers, government officials, policymakers, researchers, scholars, academicians, practitioners, educators, and students.

The Making of Twenty-First-Century Richmond Thad Williamson, Julian M. Hayter, Amy L. Howard, 2024-12-02 Richmond, Virginia, took center stage globally in the summer of 2020 as an epicenter of antiracist protests in the wake of the police murder of George Floyd. In a period of just a few weeks, overwhelming public support grew for removing Richmond's Confederate monuments. Activists then transformed the remaining statue of Robert E. Lee into a shrine to African American resolve, to the Black Lives Matter movement, and to Black victims of police brutality. Coming to terms with Richmond's tortured racial history, however, is much more difficult than toppling symbols of white supremacy. This book explores these dynamics via a multidisciplinary framework of historical research, public policy analysis, and political analysis, showing the inner dynamics of politics and governance in Richmond. The authors reveal why change and progress has often been so difficult to achieve and why that matters, with a focus on three fundamental policy areas: education, economic development, and housing. The result is a comprehensive assessment of urban governance in a major southern city in the early twenty-first century, as well as an accounting of the policy and human consequences of both its limited successes and its recurring failures.

Ownership and Governance of Companies Jonathan Michie,Vishnu Padayachee,2021-06-29 Apartheid South Africa was often thought to run in the interests of the business elite. Yet 27 years after apartheid, those business interests remain largely entrenched. Why? Did the South African business community play a role in engineering this outcome - perhaps recognising the apartheid era was over, and jumping ship in time? Conversely, the mission of the ANC was widely perceived to be to shift wealth and power into the hands of the whole community. Yet despite 'black empowerment' measures, corporate ownership remains largely in white hands - and certainly in the hands of an elite few, even though no longer restricted to whites. This picture is replicated across the global south, where corporate ownership tends to be concentrated in the hands of an elite, rather than being more democratically spread. Why have alternative corporate forms not been pursued more vigorously, with ownership in the hands of customers, employees, and local communities? In the case of South Africa, where the majority of customers and employees are black, this could have delivered on the ANC's mission to replace the apartheid era with a democratic one - in terms of wealth, incomes and power, as well as in terms of voting and civic rights. This edited volume explores all these questions and looks at ways to align corporate forms with economic and social goals. The chapters in this book were originally published as special issues of International Review of Applied Economics.
