Human Choice and Computers Klaus Brunnstein, Jacques Berleur, 2013-04-18 Human Choice and Computers: Issues of Choice and Quality of Life in the Information Society presents different views about how terrorist actions are influencing political and social discussions and decisions, and it covers questions related to legitimacy and power in the Information Society. Ethical principles are important guidelines for responsible behavior of IT professionals. But even under strong external pressure, long ranging aspects such as education and the roles of developing countries in the Information Society are important to discuss, especially to enable all to actively participate in information processes.

The Social Dynamics of Web 2.0 Charalambos Tsekeris, Ioannis Katerelos, 2015-06-05 Within only a few years, Facebook, Wikipedia, Twitter, You Tube and other social media have become an intimate part of everyday life. Web 2.0, the collective term for all forms of interactive online communication, is characterized by the overwhelming ability of users to

collaboratively create content. The implications of Web 2.0 have become a central focus for interdisciplinary social science research. This book comprehensively addresses the profound impact of Web 2.0 on contemporary society and its dynamics in a multiplicity of fields. The chapters, authored by world-leading experts, vividly demonstrate that Web 2.0 is a dynamic basis for collective action and an unlimited source of societal destabilisation and revolutionary change, for better or for worse. Various aspects of the radical transformative potential of Web 2.0 are imaginatively and critically discussed in the analytical context of quantitative approaches, qualitative works and case studies. This book provides key insights into the wide-reaching implications of recent technological developments, casting new light into an area which may potentially contribute to a more peaceful and sustainable future. This book was originally published as a special issue of Contemporary Social Science: Journal of the Academy of Social Sciences.

Inventing the Future Stan A. Hannah,Michael H. Harris,1999-12-22 Inventing the Future: Information services for a New Millenium is a sequel to Harris and Hannah's 1998 book Into the Future. In this book they move beyond the rhetorical contests about the future of the library and turn their attention to the more prosaic but vital task of managing our ever more complex and constantly changing libraries. The pages in this book present a blueprint that will guide us in the re-visioning of library and information services, allowing us to remain true to our inherited legacy while looking insistently for innovative and effective ways of inventingour future.
