This engaging summary presents an analysis of Middlesex by Jeffrey Eugenides, which tells the story of Calliope, or Callie, who is born and raised as a girl in an American family of Greek descent. However, as a teenager Callie is revealed to be intersex following a car accident, and decides to begin living as a man named Cal. The novel charts the events leading up to this revelation, including the unusual history of Cal's Greek family, and explores his struggles to fit in as either a man or a woman. The Bloomsbury Handbook to Sofia Coppola Suzanne Ferriss, 2023-01-12 The Bloomsbury Handbook to Sofia Coppola offers the first comprehensive overview of the director's impressive oeuvre. It includes individual chapters on her films, including *The Virgin Suicides* (1999), *Lost in Translation* (2003), *Marie Antoinette* (2006), *Somewhere* (2010), *The Bling Ring* (2013), *The Beguiled* (2017), and *On the Rocks* (2020). While focused on her films, contributors also consider Coppola's shorter works for television, commercials and music videos, as well as explorations of the distinct elements of her signature style: cinematography, production/costume design, music, and editing. Additional chapters provide insights into the influences on her work, its popular and scholarly reception, and interpretations of key themes and issues. The international team of contributors includes leading scholars of film, music, fashion, celebrity and gender studies, visual and material culture, reception studies, as well as industry professionals. Their interdisciplinary insights capture the complexities of Coppola's work and its cultural significance.

Freudian Fadeout Arij Ouweneel, 2012-08-13 In Western culture, the psychoanalysis that has guided popular psychology for almost a century is now on the retreat. Better equipped with proven results, cognitive and evolutionary psychology has driven psychoanalysis out of the spotlight. In cultural and film studies, however, the debate between cognitive sciences and psychoanalysis remains contentious. This volume explores this state of things by examining criticism of 18 films, juxtaposing them with cognitive-based films to reveal the flaws in the psychoanalytical concepts. It pays particular attention to simulation theory, the concept that narratives learned from films could work in human minds as simulations for solutions to particular

problems. By introducing the idea of narrative stimulation to film studies, this work argues for a different method of film critique, encouraging further research into this nascent field.
