The Thefts of the Mona Lisa Noah Charney, 2011 Leonardo da Vinci's portrait, called the Mona Lisa, is without doubt the world's most famous painting. It achieved its fame not only because it is a remarkable example of Renaissance portraiture, created by an acclaimed artistic and scientific genius, but because of its criminal history. The Mona Lisa (also called La Gioconda or La Joconde) was stolen on 21 August 1911 by an Italian, Vincenzo Peruggia. Peruggia was under the mistaken impression that the Mona Lisa had been stolen from Italy during the Napoleonic era, and he wished to take back for Italy one of his country's greatest treasures. His successful theft of the painting from the Louvre, the farcical manhunt that followed, and Peruggia's subsequent trial in Florence were highly publicized, sparking the attention of the international media, and catapulting an already admired painting into stratospheric heights of fame. This book tells the art and criminal history of the Mona Lisa. This extended essay in book form, prepared to coincide with the 100th anniversary of the 1911 theft, examines the criminal biography of Leonardo's Mona Lisa, with a focus on separating fact from fiction in the story of what is not only the most famous art heist in history, but which is the single most famous theft of all time. In the process this book also tells of Leonardo's creation of the Mona Lisa, discusses why it is so famous, and investigates two other events in its history of theft and renown. First, it examines the so-called affaire des statuettes, in which Pablo Picasso and Guillaume

Apollinaire were arrested under suspicion of involvement in the theft of the Mona Lisa. Second, there has long been a question as to whether the Nazis stole the Mona Lisa during the Second World War—a question that this book seeks to resolve. This book provides a strong introduction to the Mona Lisa and the thefts surrounding it. Noah Charney is the Sherlock Holmes of art theft. Beyond his great sleuthing prowess, he writes with the simple grace of a novelist and the erudition of a scholar. Here his subject could be no more dramatic: the impossible-but-true story of the most famous of all paintings, the Mona Lisa. It is a tale that bounces along, implicating the likes of Apollinaire, Picasso, the Nazis, and Nat King Cole. It is easy to pick up and very hard to put down. -Mark Lamster, author of *Master of Shadows: the Secret Diplomatic Career of the Painter Peter Paul Rubens* Deftly written and riveting to read. -Sidney Kirkpatrick, author of *Hitler's Holy Relics* Few writers have brought the issue of art theft to the fore with the fervor of Noah Charney. With *The Thefts of the Mona Lisa: On Stealing the World's Most Famous Painting*, Charney has created a work that is equal parts lucid art history and thrilling true crime. Both the popular myths and the hidden truths surrounding the theft and recovery of Leonardo's seminal work provide art theft investigators and museum security directors with important lessons for solving-and preventing-art crime today. -Anthony Amore, art theft and security expert and author of *Stealing Rembrandts: The Untold Stories of Notorious Art Heists* All profits from the sale of the print edition of this book support the charitable activities of ARCA, the Association for Research into Crimes against Art, an international non-profit research group on art crime and cultural heritage protection.

Art or Scribbles? In the Eye of the Beholder: The Evolutionary Emergence of Visual Communication Iain Davidson, 2025-08-07 The book is about how art arose; and how it became what we call art today. How did art emerge from the relationships between people and the things they produce and the ideas of producers? How do people manipulate those relationships in their own society? How do outsiders work out the ways in which those relationships were used to make art? What is art and why are all people engaged with it in one way or another? From its very beginning, and everywhere, art has always been embedded in its cultural context—the contexts of the people who made and see it—and that context has often been ritual. The history of art confused “social and institutional changes” of view because western critics (or artists) sought to define the boundaries of art so tightly that ritual, purposeful or utilitarian works were excluded from it. In their definition, art only existed if the rituals of the original producers were stripped from the works or if the objects were appropriated away from the situation in which they were produced. The objects stripped from their context could then only be valued for their aesthetics. Art consists of relationships between people, things, and ideas in quite specific ways. Those relationships are discussed at length in this book. The book is aimed at artists, art historians and archaeologists, but also at the general public interested in art. It is intended both for people whose interest in art comes from knowledge of the art of all continents, and for those who have no knowledge.

A Heart for Art Sue Jones,2014-02 If you are interested in understanding art, you need both tools and knowledge of some basic facts. In *A Heart for Art*, author Sue Jones seeks to help you gain what you need to further your understanding, providing a guide to the four main categories of art: pictorial, sculpture, architecture, and crafts. In this study, Jones provides examples of some of the greatest works of art in these four categories and discusses them in terms of the five questions one must ask to further their art appreciation: Who made it? When was it created? What is the subject? Why did the artist create the art? What is the style? Including such works as paintings of Van Gogh, the Mona Lisa, *The Thinker*, and the Venus de Milo, *A Heart for Art* helps you learn about art-how to understand it and how to make an informed decision about what you are seeing and experiencing.

Traditional and Complementary Medicine Cengiz Mordeniz,2019-12-11 Modern medicine has reached a point where the patient is not treated as a biopsychosocial-spiritual being but rather is seen as a virtual identity consisting of laboratory findings and images. More focus is placed on relieving the symptoms instead of curing the disease. Mostly, patients are turned into lifetime medication-dependent individuals. New medicines are needed to overcome the side effects, complications, resistance, and intolerance caused by pharmacological and interventional therapies. In hopes of drug-free and painless alternative treatments with fewer complications, there has been a trend to revisit traditional methods that have been dismissed by modern medicine. Traditional medicine has to be reevaluated with modern scientific methods to complement and integrate with evidence-based modern medicine.

Christ to Coke Martin Kemp,2011-10-13 Image, branding, and logos are obsessions of our age. Iconic images dominate the media. *Christ to Coke* is the first book to look at all the main types of visual icons. It does so via eleven supreme and mega-famous examples, both historical and contemporary, to see how they arose and how they continue to function. Along the way, we encounter the often weird and wonderful ways that they become transformed in an astonishing variety of ways and contexts. How, for example, has the communist revolutionary Che become a romantic hero for middle-class teenagers? The stock image of Christ's face is the founding icon - literally, since he was the central subject of early icon painting. Some of the icons that follow are general, like the cross, the lion, and the heart-shape. Some are specific, such as the Mona Lisa, Che Guevara, and the famous photograph of the napalmed girl in Vietnam. The American flag, the Stars and Stripes, does not quite fit into either category. Modern icons come from commerce, led by the Coca-Cola bottle, and from science, most notably the double helix of DNA and Einstein's famous equation $E=mc^2$. The stories, researched using the skills of a leading visual historian, are told in a vivid and personal manner. Some are funny; some are deeply moving; some are highly improbable; some centre on popular fame; others are based on the most profound ideas in science. The diversity is extraordinary. There is no set formula, but do the images share anything in common? So famous are the images that every reader is an expert in their own right and will be entertained and challenged by the narratives that Martin Kemp skilfully

weaves around them.

Mona Lisa Donald Sassoon,2001 What has made the Mona Lisa the most famous picture in the world? Why is it that, of all the 6,000 paintings in the Louvre, it is the only one to be exhibited in a special box, set in concrete and protected by two sheets of bulletproof glass? Why do thousands of visitors throng to see it every day, ignoring the masterpieces which surround it?

Birds of a Feather Alan Balter,2003-05-19 Richard is our son. He is mentally retarded. On the first day of his life, his mother and I were told he was a mongoloid. So begins *Birds of a Feather*, Alan Balter's strong and sensitive story of a young man with Down syndrome. As his 20th birthday nears, Richard remains illiterate, unemployed, and dependent upon his parents. We meet two people who are influential in Richard's life: Penny, his beautiful and autistic classmate, and Max Eberhart, a morbidly obese and brilliant public accountant. This improbable trio -- one with excessive chromosomes, one with excessive beauty, and one with excessive appetites -- dip into each other's lives and form a unique and powerful bond. The results are memorable, a realistic yet hopeful portrayal of people with disabilities and their friendships.

Artists of the Middle Ages Leslie D. Ross,2003-06-30 In the first volume of the Artists of an Era series, Leslie Ross examines the identities of artists attributed to the most famous and influential works of medieval art. These works are much discussed within the realm of art history, yet the identities of medieval artists fall victim to incomplete historical records and often remain enigmatic. In ten narrative chapters, Ross examines this significant area of the art world (including architecture, iconography, metalwork, scribework, sculpture—even medieval art instruction) and summarizes the lives and

work of that genre's leading artist or artists. Students will learn not only what is factually known of an artist's life (as well as what is purely speculative), but also the processes used to gather the information and fuel speculation. Readers will also gain unique insights into the practices and traditions of medieval art and the role it played within medieval society. A timeline, chapter bibliographies, a list of further resources on medieval art, and an index offer additional tools to students of medieval art and art history.

Why Do Kamikaze Pilots Wear Helmets? Andrew Thompson, 2006 From why kamikaze pilots wear helmets and why New York City is called the Big Apple to why catnip affects cats and whether Nostradamus was able to predict the future—the answers are all collected here! This indispensable companion for any lover of obscure knowledge answers frequently asked questions, while also pointing out commonly held misconceptions. Full of memorable trivia, and giving the often surprising lowdown on an astonishing variety of topics, this collection achieves a perfect balance between the frivolous and the serious.
