The Femicide Machine Sergio Gonzalez Rodriguez, 2012-01-13 An account and analysis of the systematic murder of women and girls in the Mexican border town of Ciudad Juárez. In Ciudad Juarez, a territorial power normalized barbarism. This anomalous ecology mutated into a femicide machine: an apparatus that didn't just create the conditions for the murders of dozens of women and little girls, but developed the institutions that guarantee impunity for those crimes and even legalize them. A lawless city sponsored by a State in crisis. The facts speak for themselves. —from *The Femicide Machine* Best known to American readers for his cameo appearances as *The Journalist* in Roberto Bolaño's *2666* and as a literary detective in Javier Marías's novel *Dark Back of Time*, Sergio González Rodríguez is one of Mexico's most important contemporary writers. He is the author of *Bones in the Desert*, the most definitive work on the murders of women and girls in Juárez, Mexico, as well as *The Headless Man*, a sharp meditation on the recurrent uses of symbolic violence; *Infectious*, a novel; and *Original Evil*, a long essay. *The Femicide Machine* is the first book by González Rodríguez to appear in English translation. Written especially for Semiotext(e) Intervention series, *The Femicide Machine* synthesizes González Rodríguez's documentation of the Juárez crimes, his analysis of the unique urban conditions in which they take place, and a discussion of the terror techniques of narco-warfare that have spread to both sides of the border. The result is a gripping polemic. *The Femicide Machine* probes the anarchic confluence of global capital with corrupt national politics and displaced, transient labor, and introduces the work of one of Mexico's most eminent writers to American readers.

Field of Battle SERGIO GONZALEZ RODRIGUEZ, 2019-04-30 The emergence of a geopolitical war scenario, establishing a form of global governance that utilizes methods of surveillance and control. In times of war the law is silent. —from *Field of Battle* *Field of Battle* presents the world today as nothing less than a war in progress, with Mexico an illustrative microcosm of the developing geopolitical scenario: a battlefield in which violence, drug trafficking, and organized crime—as well as the alegal state that works alongside all of this in the guise of fighting against it—hold sway. The rule of law has been replaced by the dominance of alegality and the rise of the “a-state.” This war scenario is establishing a form of global governance that utilizes methods of surveillance and control developed by the United States government and enforced through its global network of military bases and the multinational corporations that work in synergy with its espionage agencies. Geopolitics take advantage of social instability, drug cartels, state repression, and paramilitarism to establish the foundations of a world

order. Sergio González Rodríguez argues that this surveillance and control model has been imposed on the international community through extreme neoliberal ideology, free markets, the globalized economy, and the rise of the information society. The threats are clear. Nation-states are increasingly unable to respond to societal needs, and the individual has been displaced by money and technique—the axis of the transhumanist future foretold by today's electronic devices. The human being as the prosthesis of an artificial world and as an object of networks and systems: citizens are the victims of a perverse vision of reality, caught between the defense of their rights and their will to insurrection.

Third Generation Gangs and Transnational Cartels John P. Sullivan, 2025-05-20 *Third Generation Gangs and Transnational Cartels* brings closure to the long running *Small Wars Journal* El Centro Anthology series edited by Dr. John P. Sullivan and Dr. Robert J. Bunker under the auspices of the Small Wars Foundation. The curated work focuses on Latin American gangs, cartels, and the cross-cutting issues related to them. Its forty-four chapters and supporting front and back essays highlight the important contributions of some forty scholars and practitioners in the fields of criminal insurgency, gang studies, and transnational organized crime. The chapters span the mid-2018 through later-2024 period, with the inclusion of late 2024 and early 2025 essays specifically written to give context and provide analysis related to this work. The anthology benefits from a Foreword provided by Dr. Rashmi Singh, an Afterword offered by Dr. Alexandra Phelan, and a Postscript written by Dr. Mahmut Cengiz.

Public Administration Review Leonard Dupee White, 2002 Includes section Reviews of books and documents.

Substance of the Ancient Maya Andrew K. Scherer, Thomas G. Garrison, 2024-12-01 *Substance of the Ancient Maya: Kingdoms and Communities, Objects and Beings* collects twelve essays by top scholars that highlight what is new in research pertaining to the ancient Maya. Subjects range from updated political histories of major kingdoms in the southern Maya Lowlands to explorations of the nature of Maya writing and materiality. These essays were inspired by the scholarship of Stephen Houston and celebrate his transdisciplinary commitment to research in anthropological archaeology, epigraphy, and art history. The contributions in this volume are organized into two sections that respectively reflect different scales from which to approach the substance of the ancient Maya—from hand-held objects to entire kingdoms. This dichotomy reflects the breadth of questions central to current research on the Maya. It also illustrates how certain themes, such as the relationship between the living and the realm of the supernatural, are fundamental to both thinking by and about the Maya at all scales. A diversity of methods is not only embodied by this assemblage of essays but is also spread equally across the two sections of the book, illustrating that archaeologists, epigraphers, geographers, and art historians can equally contribute to the substance of kingdoms and communities, as they can to objects and beings. Collectively, these contributions show how the objects and beings that composed the Classic Maya world were both literal and sacred substances that mediated relations not only among living people but with gods and ancestors. A final chapter by Stephen Houston reflects on

unfinished projects of the ancient Maya as a metaphor for all of the work yet to be done to move forward in our studies of the past.

Inequality, Wealth, and Market Exchange in the Maya Lowlands Els Barnard,2021 This volume examines the economic system of the Classic Maya Lowlands center of Uxul, Campeche, a secondary center under the political influence of Calakmul. A household-based approach is used to review the urban economic system in which these households played a central role. Multiple lines of evidence are combined here, using both quantitative and qualitative methods, to study economic inequality, settlement organization, social integration, power structures, consumption, production, and exchange at the site. The results suggest that the economy of Uxul was largely based on market exchange, and although wealth inequality was high, people along the socio-economic spectrum had significant economic agency, comparable quality of life, and economic mobility was possible. This study shows that the implementation of a multifaceted household-based approach allows for a more complete understanding of the complex economy of an ancient urban center.
