**The Real Business of Ancient Maya Economies** Marilyn A. Masson, David A. Freidel, Arthur A. Demarest, 2020-08-25 A timely synthesis of the latest research and perspectives on ancient Maya economics, this volume illuminates the sophistication and intricacy of economic systems in the Preclassic, Classic, and Postclassic periods. Contributors from a wide range of disciplines move beyond paradigms of elite control and centralized exchange to focus on individual agency, highlighting production and exchange that took place at all levels of society. Case studies draw on new archaeological evidence from rural households and urban marketplaces to reconstruct the trade networks for tools, ceramics, obsidian, salt, and agricultural goods throughout the empire. They also describe the ways household production integrated with community, regional, and interregional markets. Redirecting the field of ancient Maya economic studies away from simplistic characterizations of the past by fully representing the range of current views on the subject, this volume delves deeply into multiple facets of a complex, interdependent material world. Border Citizens Eric V. Meeks, 2019-11-15 In *Border Citizens*, historian Eric V. Meeks explores how the racial classification and identities of the diverse indigenous, mestizo, and Euro-American residents of Arizona's borderlands evolved as the region was politically and economically incorporated into the United States. First published in 2007, the book examines the complex relationship between racial subordination and resistance over the course of a century. On the one hand, Meeks links the construction of multiple racial categories to the process of nation-state building and capitalist integration. On the other, he explores how the region's diverse communities altered the blueprint drawn up by government officials and members of the Anglo majority for their assimilation or exclusion while redefining citizenship and national belonging. The revised edition of this highly praised and influential study features a chapter-length afterword that details and contextualizes Arizona's aggressive response to undocumented immigration and ethnic studies in the decade after *Border Citizens* was first published. Meeks demonstrates that the broad-based movement against these measures had ramifications well beyond Arizona. He also revisits the Yaqui and Tohono O'odham nations on both sides of the Sonora-Arizona border, focusing on their efforts to retain, extend, and enrich their connections to one another in the face of increasingly stringent border enforcement.

**Repertoires of Terrorism** Andreas E. Feldmann, 2024-06-25 Why do armed groups employ terrorism in markedly different ways during civil wars? Drawing on more than a decade of fieldwork, Andreas E. Feldmann examines the disparate behavior of actors including guerrilla groups, state security forces, and paramilitaries during Colombia's long and bloody civil war. Analyzing the varieties of violence in this conflict, he develops a new theory of the dynamics of terrorism in civil wars. Feldmann argues that armed groups' distinct uses—repertoires—of terrorism arise from their particular organizational identities, the central and enduring attributes that distinguish one faction from other warring parties. He investigates a range of groups that took part in the Colombian conflict over the course of its evolution from ideological to criminal warfare, demonstrating that organizational identity plays a critical role in producing and rationalizing violence. Armed parties employ their unique repertoires as a means of communication to assert their relevance and territorial presence and to differentiate themselves from enemies and rivals. *Repertoires of Terrorism* is based on an extensive data set covering thousands of incidents, as well as interviews, archival research, and testimony. It sheds new light on both armed groups' use of violence in Colombia's civil war and the factors that shape terrorist activity in other conflicts.

**Introduction to Green Chemistry** Albert Matlack, 2001-04-03 With roughly 5500 references, this book may be

considered more of a treatise than a mere introduction to green chemistry. Using an unconventional approach, the author provides a broad but thorough review of the subject, covering traditional green chemistry topics such as catalysis, benign solvents, and alternative feedstocks before moving on to less frequently covered topics such as chemistry of longer wear and population and the environmental chemistry. Topics such as these highlight the importance of chemistry to everyday life and demonstrate the real benefits that wider exploitation of green chemistry can have for society.
