**The Devil's Delusion** Berlinski David Berlinski, David Berlinski, 2010-05-21 A secular Jew, Berlinski nonetheless delivers a biting defense of religious thought. This incisive book explores the limits of science and the pretensions of those who insist it can be--indeed must be--the ultimate touchstone for understanding the world--Cf publisher's description.

The Devil's Delusion, a Discussion Guide John West, Sonja West, 2009-10 This discussion guide is designed to facilitate the use of David Berlinski's book *The Devil's Delusion: Atheism and Its Scientific Pretensions* in small groups, adult Sunday School classes, adult education seminars, and book discussion clubs. The guide contains brief summaries of each chapter followed by discussion questions for that chapter.

The Deniable Darwin and Other Essays David Berlinski, 2009-10 This book collects essays published in journals including *Commentary*, *The Weekly Standard*, and elsewhere. It centers on three profound mysteries: the existence of the human mind; the existence and diversity of living creatures; and the existence of matter. How they did they come into being? The author, Dr. David Berlinski, is a senior fellow at the Discovery Institute and formerly a fellow at the Institut des Hautes études Scientifiques in France. His other books include *The Devil's Delusion: Atheism and Its Scientific Pretensions*, *Newton's Gift*, and *A Tour of the Calculus*.

**Human Nature** David Berlinski, 2019-11-04 Conventional wisdom holds that the murder rate has plummeted since the Middle Ages; humankind is growing more peaceful and enlightened; man is shortly to be much improved--better genes, better neural circuits, better biochemistry; and we are approaching a technological singularity that well may usher in utopia. *Human Nature* eviscerates these and other doctrines of a contemporary nihilism masquerading as science. In this wide-ranging work polymath David Berlinski draws upon history, mathematics, logic, and literature to retrain our gaze on an old truth many are eager to forget: there is and will be about the human condition beauty, nobility, and moments of sublime insight, yes, but also ignorance and depravity. Men are not about to become like gods.

*The Gnostic Luciferian New Age Babylon Revisited* Gregory Lessing Garrett, 2019-09-30 *The Gnostic Luciferian New Age*

Utopia will be based upon a Mystery Babylon re-visitation of tolerance for all behaviors narcissistically self-indulgent, sexually perverse, psychoactively induced, and sinfully decadent, with self-worship and self-adulation as the highest pinnacle of religious zeal. Additionally, utilizing the trickery and artifice of an Alien Antichrist Messiah Deception, the Luciferian Elite seek to obliterate Christianity and replace it with a Gnostic Pantheistic Cosmogenesis narrative, where Ancient Aliens are our true genetic origins, and Cosmic Evolution, with Mankind in tow, is the Grand Design of the Universe. Since this is a very real situation which effects all the world in the direst sort of way, the contents of this book are relevant to all citizens of the world. This book bravely explores the various guises that this repackaged Babylonian Gnostic Luciferianism has taken and how it got to this point, as well as offers answers to this nefarious situation.

**Evolution: Really?** Richard Terrell, 2011-04-19 Why is it that 150 years after the celebrated appearance of Charles Darwins evolutionary vision, reasonable people laity and professional scientists alike remain skeptical toward it? Does Darwinian science, as various new atheists assert, nullify the rationality of theistic belief? What is the nature of Evolutionism as a worldview with religious implications? Author Richard Terrell explores these fundamental questions and more, from the standpoint of the Humanities, arguing that the issues of life's origin, human nature, and human destiny call for a larger arena of discussion than can be provided by science alone. He rejects popular notions that science has put an irrefutable barrier in the path of theistic belief, and casts light on how the evolutionary vision of life expressed as scientific materialism constitutes a religious worldview of its own with questionable implications for the human condition. Along the way, Terrell considers the thoughts of such classic evolutionary thinkers as Ernst Haeckel, Julian Huxley, George Gaylord Simpson, and Theodosius Dobzhansky, along with more contemporary thinkers like Richard Dawkins and other new atheists. Drawing upon the rich historical storehouse of affirmation and skepticism concerning Darwinism, Terrell argues that opposition to Darwinian beliefs is not confined to religious objections, but that the most serious challenges have come from scientists. Surprisingly, this minority report has existed through all the years of Darwinian cultural ascendancy, and is gaining in strength today. Here is a challenge to encourage students free inquiry into Darwinian doctrine and cultural influence free of dogma and intimidation.

*The Death of Man as Man* Ronnie W. Rogers, 2016-07-05 The content of this book was first presented in its present form at The Oxford Round Table, Religion and Science Shaping the Modern World, in 2010 at Harris Manchester College, Oxford University, Oxford England. Science, or its handmaiden separation of church and state, is absolutely incapable of establishing or sustaining the liberties spelled out in the Declaration of Independence and protected by the Constitution. The United States was founded upon the astonishing declaration, We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty and the pursuit of happiness. That to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed. Then the Constitution was drafted in order to secure the Blessings of Liberty to ourselves and our Posterity. It

is these rights and liberties that are being systematically and surreptitiously dismantled by both the unwarranted expansion of science beyond its legitimate domain and the restricting of religious ideas from public education and policy debate. True science has blessed us, but when employed beyond its legitimate limits of authority, it becomes a dehumanizing tyrant. Science has its place in public life, but to limit religious knowledge to merely opinion and private faith, while concurrently limiting all publicly imposable knowledge to what can be demonstrated scientifically, requires more than science can provide. These liberties are based upon belief in the existence of God who created man with intrinsic worth and liberties. Without a public belief in the existence of God, all talk of unalienable rights is quixotic and assures the continuation of the heretofore unabated evanescing of those rights.

An Informed Cosmos Peter S. Williams,2023-07-14 After a substantial author's preface recounting the author's life-journey with the question of science and design in nature, *An Informed Cosmos* pulls together essays that jointly cover the core arguments for a scientific theory of intelligent design. Along with a foreword by philosopher of science and leading design theorist Stephen C. Meyer, and a wide range of recommended resources, *An Informed Cosmos* offers an informed overview of the contemporary case for intelligent design.

*The Blind Scientist* Alexander J. Bonitto,John S. Knox,2024-03-05 This book investigates potential neo-Darwinian fallacies, specifically regarding a priori assumptions, that may have led to weak scientific methodology and praxis. It was proposed that five concepts must be true for neo-Darwinism to be true. These are gradualism, the tree of life hypothesis, the evidence of microevolutionary change accounting for macroevolutionary change, time and chance, and methodological naturalism. Prima facie, these concepts have tremendous explanatory power. Yet, with an attempt to carefully examine these concepts, all five seem to be assumed a priori so as to dictate the outcome of neo-Darwinism rather than letting the evidence speak for itself. The evidence left by the Cambrian explosion, genomic potential, genetic entropy, irreducible complexity, genetic limits, cyclical change, probability theory, the epistemology of information, and the law of causality seems to pose a dilemma for neo-Darwinian assumptions.

**Designer Science** C.W. Howell,2025-09-09 Designer Science is the first full-length history of intelligent design, an antievolutionary movement from the turn of the 21st century that tried to rewrite the rules of science and had a lasting impact on public perception of science in America--

**Fight for the Quantum** John LaCasse,2019-05-17 Richard Dawkins wrote the God Delusion then David Berlinski answered with the Devil's Delusion. Deepak Chopra and Leonard Mlodinow got into a pissing match and decided to fight in the same book, War of the World Views: Where Science and Spirituality Meet - And Do Not. Michael Shermer writes his history tome in The Moral Arc. Sean Carroll tells us how it is in The Big Picture. Rupert Sheldrake debunks the constants of nature in Science Set Free. Yuval Noah Harari reminds us in Sapiens that if it were not for our (Sapiens) ability to contrive abstract myths, we would, in fact, be monkeys. Eben Alexander goes to heaven, gets amped-up by God, and writes many books. His Holiness, the Dalai Lama, reads all the books and comes up with three options. Phenomena are either (a) evident (b) hidden (c) extremely hidden. So, who is the smart one in that pack? No wonder the Chinese Government wants to control The Dalai Lama's 15th reincarnation. This guy is good! In The Fight for the Quantum we discuss the interplay between science and spirituality as a polemic. Sometimes subtle, sometimes, not so much. In all cases the issues are obscure. That's why thinkers call this stuff the Hard Problem. In Weisberg (2019), The hard problem of consciousness is the problem of explaining why any physical state is conscious rather than nonconscious... The usual methods of science involve an explanation of functional, dynamical, and structural properties- This suggests that an explanation of consciousness will have to go beyond the usual methods of science. Consciousness, therefore, presents a hard problem for science, or perhaps it marks the limits of what science can explain. (The hard problem).There are no answers in this book - only observations of the many who claim to have answers. It's a book about the folly of the human condition. It's the kind of book a person can enjoy from any perspective. Rupert Sheldrake put this in context after I sent him some early material John, I'm glad you're writing about these topics and your style is lively and engaging, but it definitely needs tidying up a bit. (Is he British or what?!) He suggested six changes, and I made them immediately. That's the hard problem with this book. It wonders and wanders in everyone's context. It does its own quantum jumps among the Dali Lama's three options. But, It's a hell-of-a-fun-read.
