Física general ,2003 Un clásico entre los manuales de física universitaria, incluye todos los conocimientos que se requieren en física general. Física 2º Bachillerato MARTÍNEZ RAMÍREZ, ELVIRA, MARTINEZ RAMÍREZ, JULIA, 2016-01-01 Este libro contiene doce unidades adaptadas a la actual normativa LOMCE agrupadas por bloques temáticos. Todas las unidades están organizadas con una misma metodología didáctica enfocada a obtener el máximo aprovechamiento del proceso de enseñanza-aprendizaje, tanto en el desarrollo de las clases dentro del aula como en el estudio personal. La organización de las unidades se centra en recursos didácticos distribuidos, según sus objetivos pedagógicos, en la parte inicial de la unidad, el cuerpo central de la misma con el desarrollo de los contenidos, y la parte final. Parte inicial: - Página de inicio con índice de contenidos e imagen relacionada. Esta imagen permite tener una idea aproximada del contenido a simple vista además de servir para iniciar un debate sobre el tema. - Introducción de la materia que se va a estudiar. Cuerpo central de la unidad: El desarrollo de contenidos se apoya y suplementa con: - Ejemplos resueltos de forma extensa y aplicados al contenido concreto de los apartados correspondientes. - Gráficos, dibujos y fotografías que ayudan a la comprensión y refuerzan la asimilación de los conceptos expuestos. - Herramientas matemáticas, textos recordatorios o aclaraciones, ampliación de contenidos y algunas curiosidades de aplicación a la vida cotidiana. Parte final de cada unidad: - Cuadros de repaso e información para comentar y debatir en clase. - Colección de problemas resueltos precedidos de una tabla con los datos y constantes físicas necesarias para su resolución, sin necesidad de consultar la tabla general de constantes físicas y datos astronómicos de la Tierra que aparece al final del libro. La resolución de los problemas se ha realizado siguiendo la siguiente estrategia: primero se realiza una planificación y análisis del problema, se sigue con la resolución numérica y se finaliza con la revisión del resultado. - Cuestiones y problemas. Se incluyen, además, tras los problemas resueltos, más cuestiones y problemas en los que se suministra el resultado final con el objetivo de que el alumno, siguiendo la estrategia de resolución de problemas expuesto, resuelva por sí mismo los problemas propuestos y compruebe el resultado. El libro finaliza con un resumen de fórmulas matemáticas de interés para el alumno y de las constantes físicas y datos astronómicos de la Tierra útiles para la

resolución de problemas.

Física y Química 1º Bachillerato FIDALGO SÁNCHEZ, JOSÉ ANTONIO, FERNÁNDEZ PÉREZ, MANUEL RAMÓN, 2016-01-01 Nuestra sociedad, en su dinamismo de progreso, precisa de personas muy formadas para integrarse en ella “de forma activa”. Y para ello “debe facilitar las herramientas precisas que le permitan afrontar ese futuro con garantía, participando en el desarrollo económico y social al que está ligada la capacidad científica e innovadora de la propia sociedad”. Esta trilogía “enseñanza-aprendizaje-enfoque de vida” debe ser abarcable por las materias de FÍSICA Y QUÍMICA. Por ello, este libro, tu amigo, está diseñado según los siguientes criterios: — Uso de un lenguaje serio y científico, al igual que ameno, fácilmente asequible para todo el alumnado. — Presentación de ejemplos “de vida diaria” para su estudio, investigación, enfoque y comprensión sencilla de la materia objeto de estudio. — Exposición razonada de teorías, leyes, modelos, etc. aplicables a cada caso concreto de situaciones físicas o químicas, siempre relacionadas con la vida real. — Propuesta de cuestiones, ejercicios y problemas, explicados y resueltos, que ayuden a comprender las exposiciones teóricas correspondientes. — Propuesta de cuestiones y ejercicios, en orden de dificultad creciente, sin resolución explicada pero sí detallada, para que el alumno compruebe, como autoevaluación, su grado de aprendizaje. — Presentación de actividades complementarias, como trabajos de laboratorio, lecturas, consultas en medios informáticos, etc., que motiven un espíritu crítico e investigador. — Fomentar explícitamente hábitos de respeto hacia el medio ambiente, como riqueza natural que deberá ser herencia de quienes nos sucedan. — Fomentar actitudes de ahorro energético como garantía de un progreso de bienestar. Se ha dicho que la Ciencia responde “al saber” (¿qué?, ¿cómo?, ¿por qué?) y la Técnica a la “aplicación del saber” (¿para qué?). Actualmente esa dicotomía está llamada a desaparecer; por tal razón, este libro señala senderos de confluencia entre el “conocimiento de la naturaleza” y el “saber hacer del mundo de la técnica”.

Física para la ciencia y la tecnología. II Paul Allen Tipler, Gene Mosca, 2004 Durante casi 30 años, la Física para la Ciencia y la Tecnología de Paul A. Tipler ha sido una referencia obligada de los cursos de física universitarios por su impecable claridad y precisión. En esta edición, Tipler y su nuevo coautor Gene Mosca, desarrollan nuevas formas de exponer la física con la intención de no abrumar a los estudiantes sin simplificar en exceso el contenido. Aprovechándose de su extensa experiencia como profesor, Mosca ha revisado escrupulosa y críticamente todas las explicaciones y ejemplos del texto desde la perspectiva de los estudiantes de los primeros cursos universitarios. Esta nueva edición incorpora, además, muchas herramientas y técnicas pedagógicas que han demostrado ser efectivas en el Physics Education Research (PER). El resultado es un texto que mantiene su solidez tradicional pero que ofrece a los estudiantes las estrategias que necesitan para resolver los problemas y para conseguir una comprensión eficaz de los conceptos físicos. Para conveniencia de los profesores y alumnos, la 5ª edición de la Física para la Ciencia y la Tecnología está disponible en dos ediciones simultáneas en dos y seis volúmenes, que pueden adquirirse por separado.
