Psychology James S. Nairne, 2000 James Nairne's highly respected and accessible new edition offers all the content, pedagogy, and visual appeal that professors and students have come to expect from a successful introductory psychology text-and more. Nairne's Second Edition offers a cohesive look at how psychology works in our everyday lives. This practical, motivating text presents all the topics you cover in your introductory course, but connects them in a way that adds meaning and consistency to your students' study of the discipline. And how does it do this? By introducing students to the adaptive mind-a theme based on the realization that our thoughts and actions stem from our need to adapt to our surroundings. This unique framework stresses practical applications and helps students understand how we use psychology to deal with everyday challenges. Nairne builds all topics around an adaptive, problem-solving framework. He emphasizes the way that particular behaviors, thought processes, and emotions help people solve problems-from memorizing a telephone number, to ducking under cover as a building begins to shake, to producing a quick physical response in the face of traffic hazards. This

organizational framework also promotes a common theme of understanding across the chapters. This innovative approach may differ from the presentation you have come to expect from others texts. But beneath the innovation, you'll find ample coverage of all the traditional topics around which you build your course.

*Their Angry Creed* Herbert Purdy, 2016-07-04 Forty-five years after women's liberationists first laid down their challenge, chanting 'Women demand equality!' and 'I'm a second-class citizen', their narratives are now so universally accepted that few people dare speak truth to the power in the land that feminism has undoubtedly become. However, this book does just that.

Opening with a startling revelation in 2014 by Mallory Millett, sister of Kate Millett - a mentally-ill Marxist apologist, and probably the prime mover in the women's liberation movement around 1970 - *Their Angry Creed* is a detailed exposé of what she and her co-conspirators were planning from the start. The author shows how these activists influenced a generation of women - many of whom are now in prominent and powerful positions - to seek a seismic shift in the power balance between women and men by dividing society along the fault line of gender. Feminism has never been about equality for women. It is cultural Marxism, whose principles uphold patriarchy - the social superiority of men - which is to be achieved through the destruction of marriage, the re-engineering of the family, moving women en masse out of the home and into the workforce, and the disruption of society as we know it. Describing how these activists have already secured unreasonable and unfair privilege for women and girls, he points to the demonisation of manhood, men's effective social emasculation, the invasion of men's social spaces to the point of harassment, and the relentless excision of fathers from families. He ends by warning of a coming backlash from men.

*Abnormal Psychology* James Neal Butcher, Susan Mineka, Jill M. Hooley, 2010 The esteemed author team of Jim Butcher, Jill Hooley, and Sue Mineka offers students the most thoroughly researched, engaging, and up-to-date explanation of psychopathology, creating a learning experience that provokes thought and increases awareness. By adopting a comprehensive bio-psycho-social perspective, this text takes students to levels of understanding that other books do not offer.

The 4th edition has been completely updated and includes more than 75 new entries on key scientific topics in the news, including: DNA databanks, Crime Scene Investigations, Internet Search Engines, Podcasts, Weapons of Mass

Destruction, Wireless Communications and much more.

*Mental Health Nursing Care* Linda Eby,Nancy Jo Brown (RN.),2005 For Fundamentals of Nursing, Psychiatric-Mental Health Nursing, Psychosocial Nursing and Nursing Specialty LPN/LVN courses. Part of the LPN/LVN specific series, this practical guide to applying the nursing process to the care of clients with psychiatric disorders and general clients with psychosocial issues teaches psychiatric-mental health nursing as it is really practiced by practical vocational nurses. Students are encouraged to develop empathy for clients and critical thinking skills to meet the challenges of client care. Case studies, client examples and statements from clients in their own words help students understand psychiatric and psychosocial nursing practice. The book is written with the knowledge that not all LPN/LVN nursing students have the opportunity to have psychiatric nursing clinical experiences. All nurses will work with clients who have mental disorders or psychosocial needs.
