*HMS Terror* Matthew Betts, 2020-10-30 In the summer of 1845, Sir John Franklin and a crew of 134 men entered Lancaster Sound on board HMS Erebus and HMS Terror in search of a Northwest Passage. The sturdy former bomb ships were substantially strengthened and fitted with the latest technologies for polar service and, at the time, were the most advanced sailing vessels developed for Polar exploration. Both ships, but especially HMS Terror, had already proven their capabilities in the Arctic and Antarctic. With such sophisticated, rugged, and successful vessels, victory over the Northwest Passage seemed inevitable, yet the entire crew vanished, and the ships were never seen again by Europeans. Finally, in 2014, the wreck of HMS Erebus was discovered by Parks Canada. Two years later, the wreck of HMS Terror was found, sitting upright, in near pristine condition. The extraordinarily well-preserved state and location of the ships, so far south of their last reported position, raises questions about the role they played in the tragedy. Did the extraordinary capabilities of the ships in fact contribute to the disaster? Never before has the Franklin Mystery been comprehensively examined through the lens of its sailing technology. This book documents the history, design, modification, and fitting of HMS Terror, one of the world's most successful polar exploration vessels. Part historical narrative and part technical design manual, this book provides, for the first time, a complete account of Terror's unique career, as well as an assessment of her sailing abilities in polar conditions, a record of her design specifications, and a full set of accurate plans of her final 1845 configuration. Based on meticulous historical research, the book details the ship's every bolt and belaying pin, and ends with the discovery and identification of the wreck in 2016, explaining how the successes and ice-worthiness of Terror may have contributed to the Franklin disaster itself. It is an ideal reference for those interested in the Franklin Mystery, in polar exploration, the Royal Navy, and in ship design and modelling.

**Sir John Franklin's Erebus and Terror Expedition** Gillian Hutchinson, 2017-07-13 In 1845, British explorer Sir John Franklin set out on a voyage to find the North-West Passage - the sea route linking the Atlantic Ocean to the Pacific. The expedition was expected to complete its mission within three years and return home in triumph but the two ships, HMS Erebus and HMS Terror, and the 129 men aboard them disappeared in the Arctic. The last Europeans to see them alive were the crews of two whaling ships in Baffin Bay in July 1845, just before they entered the labyrinth of the Arctic Archipelago. The loss of this British hero and his crew, and the many rescue expeditions and searches that followed, captured the public

imagination, but the mystery surrounding the expedition's fate only deepened as more clues were found. How did Franklin's final expedition end in tragedy? What happened to the crew? The thrilling discoveries in the Arctic of the wrecks of Erebus in 2014 and Terror in 2016 have brought the events of 170 years ago into sharp focus and excited new interest in the Franklin expedition. This richly illustrated book is an essential guide to this story of heroism, endurance, tragedy and dark desperation.

**Erebus** John Geiger, Alanna Mitchell, Editors of Canadian Geographic, 2015-10-13 The greatest mystery in all of exploration is the fate of the 1845-1848 British Arctic Expedition commanded by Sir John Franklin. All 129 crewmen died, and the two ships seemingly vanished without a trace. The expedition's destruction was a mass disaster spread over two years. With the vessels beset and abandoned, the crew confronted a horrific ordeal. They suffered from lead poisoning, were stricken with scurvy and, ultimately, resorted to cannibalism in their final days. The mysterious fate of the ships, HMS Erebus and HMS Terror, has captured the public's imagination for seventeen decades. Now, one of Franklin's lost ships has been found. During the summer of 2014, the Victoria Strait Expedition, the largest effort to find the ships since the 1850s, was led by Parks Canada in partnership with the Arctic Research Foundation, The Royal Canadian Geographical Society, and other public and private partners. The expedition used world-leading technology in underwater exploration and succeeded in a major find the discovery of Erebus. News of the discovery made headlines around the world. In this fully illustrated account, readers will learn about the exciting expedition, challenging search and the ship's discovery. Featuring the first images of the Erebus, this stunning book weaves together a story of historical mystery and modern adventure.--Publisher's description.

**Erebus** Michael Palin, 2018-09-25 Driven by a passion for travel and history and a love of ships and the sea, former Monty Python stalwart and beloved television globe-trotter Michael Palin explores the world of HMS Erebus, last seen on an ill-fated voyage to chart the Northwest Passage. Michael Palin brings the fascinating story of the Erebus and its occupants to life, from its construction as a bomb vessel in 1826 through the flagship years of James Clark Ross's Antarctic expedition and finally to Sir John Franklin's quest for the holy grail of navigation—a route through the Northwest Passage, where the ship disappeared into the depths of the sea for more than 150 years. It was rediscovered under the arctic waters in 2014. Palin travels across the world—from Tasmania to the Falkland Islands and the Canadian Arctic—to offer a firsthand account of the terrain and conditions that would have confronted the Erebus and her doomed final crew. Delving into the research, he describes the intertwined careers of the two men who shared the ship's journeys: Ross, the organizational genius who mapped much of the Antarctic coastline and oversaw some of the earliest scientific experiments to be conducted there; and Franklin, who, at the age of sixty and after a checkered career, commanded the ship on its last disastrous venture. Expertly researched and illustrated with maps, photographs, paintings, and engravings, Erebus is an evocative account of two

journeys: one successful and forgotten, the other tragic yet unforgettable.

Erebus Michael Palin, 2019 Made in Wales -- Magnetic north -- Magnetic south -- Far-off shores -- Our southern home-- Farther south than any (known) human being has been -- Dancing with the captains -- Pilgrims of the ocean -- Such a wretched place as this you never saw -- Three years from Gillingham -- Homeward bound -- So little now remains to be done -- North by north-west -- No signal -- The truth -- Life and death -- The Inuit story -- Resurrection.

**Ichthyology of the Voyage of H.M.S. Erebus & Terror ...** Sir John Richardson (M.D.), 1844

*May We Be Spared to Meet on Earth* Russell A. Potter, Regina Koellner, Peter Carney, Mary Williamson, 2022-07-15 *May We Be Spared to Meet on Earth* is a privileged glimpse into the private correspondence of the officers and sailors who set out in May 1845 on the Erebus and Terror for Sir John Franklin's fateful expedition to the Arctic. The letters of the crew and their correspondents begin with the journey's inception and early planning, going on to recount the ships' departure from the river Thames, their progress up the eastern coast of Great Britain to Stromness in Orkney, and the crew's exploits as far as the Whalefish Islands off the western coast of Greenland, from where the ships forever departed the society that sent them

forth. As the realization dawned that something was amiss, heartfelt letters to the missing were sent with search expeditions; those letters, returned unread, tell poignant stories of hope. Assembled completely and conclusively from extensive archival research, including in far-flung family and private collections, the correspondence allows the reader to peer over the shoulders of these men, to experience their excitement and anticipation, their foolhardiness, and their fears. The Franklin expedition continues to excite enthusiasts and scholars worldwide. *May We Be Spared to Meet on Earth* provides new insights into the personalities of those on board, the significance of the voyage as they saw it, and the dawning awareness of the possibility that they would never return to British shores or their families.

*Relics of the Franklin Expedition* Garth Walpole, 2017-01-31 Sir John Franklin's Arctic expedition departed England in 1845 with two Royal Navy bomb vessels, 129 men and three years' worth of provisions. None were seen again until nearly a decade later, when their bleached bones, broken instruments, books, papers and personal effects began to be recovered on Canada's King William Island. These relics have since had a life of their own--photographed, analyzed, cataloged and displayed in glass cases in London. This book gives a definitive history of their preservation and exhibition from the Victorian era to the present, richly illustrated with period engravings and photographs, many never before published. Appendices provide the first comprehensive accounting of all expedition relics recovered prior to the 2014 discovery of Franklin's ship HMS Erebus.

***Maritime Claims and Underwater Archaeology*** Mariano J. Aznar, 2021-10-25 To what extent can underwater archaeology and underwater cultural heritage support a State's maritime claim? Many States have plausibly extended their maritime legislative and executive jurisdiction to the outer limit of the contiguous zone to better protect underwater cultural

heritage. However, some States—such as Canada in the Arctic, China in the South China Sea, or Russia in Crimea—are going further, claiming sovereignty over disputed maritime areas or even the high seas. *Maritime Claims and Underwater Archaeology*, aimed at internationalists and archaeologists, critically assesses these recent practices, reviewing this search for buried sovereignty from a legal, historical, and ethical perspective.
