Strategic Human Resource Management in China Min Min, Mary Bambacas, Ying Zhu, 2017-01-20 This book documents and explains how strategic human resource management (SHRM) and high performance work systems (HPWS) have been adopted among indigenous enterprises, namely state-owned enterprises (SOEs) and domestic private enterprises (DPEs) in China, from both management and employee perspectives. The book examines the mutual relationships between employees and their supervisors/ managers through social exchange theory. It explains how and why employees develop their perceptions and relationships with their immediate supervisors/managers in the working environment and the consequent effects on their attitudes and behaviour at work. Given the importance of the Chinese economy in the world, and the impact of its 'open door' policy and economic and management reforms, this book will provide valuable insight into China's SHRM and HPWS.

U.S. Airline Transport Pilot International Flight Language Experiences, Report 1 O. Veronika Prinzo,2008 In 1998, the International Civil Aviation Organization (ICAO) took a heightened interest in the role of language in airline accidents. Its Air Navigation Commission was directed to complete the task of strengthening relevant ICAO provisions concerning language requirements. Member states agreed to take steps to ensure air traffic control (ATC) personnel and flight crews involved in flight operations in airspace where the use of the English language is required were proficient in conducting and comprehending radiotelephony communications in English. Since then, ICAO developed its English Language Proficiency (ELP) requirements and urged its Members to document their ELP test implementation plans by March 8, 2008. Until all ATC personnel and flight crews involved in flight operations obtain a passing level of ELP, the language-based problems international pilots face is not known. This report is a compilation of written responses and comments by a small focus group of 48 U.S. pilots of their difficulties in international operations.--P. i.
