Praxis as a Perspective on International Politics Gunther Hellmann,Jens Steffek,2022-04-26 This collection brings together leading figures in the study of International Relations to explore praxis as a perspective on international politics and law. With its focus on competent judgements, the praxis approach holds the promise to overcome the divide between knowing and acting that marks positivist International Relations theory. Building on the transdisciplinary work of Friedrich Kratochwil - and with a concluding chapter from him - this book reveals the scope, limits and blind spots of praxis theorizing. For anyone involved in international politics, this is an important contribution to the reconciliation of theory and practice and an inspiration for future research. EPDFs of Chapters 1, 4, 9, 13, 15 and 16 are available Open Access under CC-BY-NC-ND licence.

Reciprocal Freedom Ernest J. Weinrib,2022 Combining legal and philosophical analysis, Reciprocal Freedom offers a sequenced and legally informed argument for understanding law as necessary to our existence as free beings. Exploring the relationship between private law and the state, this book covers conceptions of corrective justice, rights, ownership, and the role of legal institutions.

The Transnationalized Social Question Thomas Faist,2019 The social question is back. Yet today's social question is not primarily between labour and capital, as it was in the nineteenth century and throughout much of the twentieth. The contemporary social question is located at the interstices between the global South and the global North. It finds its expression in movements of people, seeking a better life or fleeing unsustainable social, political, economic, and ecological conditions. It is transnationalized not only because migrants and their significant others entertain ties across the borders of

national states, staying in touch with family and friends, receiving or sending financial remittances in transnational social spaces. Also of importance are cross-border recruitment schemes for workers and the cross-border diffusion of norms appealed to in the case of migration--for example, the social right to decent work as a human right. Moreover, migration can become an issue of inclusion or exclusion in fields important to life chances in the emigration, transit, or immigration states--a transnationalization of national states. And, as in the nineteenth century, political conflicts arise, constituting the social question as a public concern. In earlier periods class differences dominated conflicts. While class has always been criss-crossed by manifold heterogeneities, not least of all cultural ones around ethnicity, religion, and language, it is these latter heterogeneities that have sharpened in situations of immigration and emigration over the past decades. Casting a wide net in terms of conceptual and empirical scope, this book tackles both the social structure and the politics of social inequalities. It sets a comprehensive agenda for research which also includes the public role of social scientists in dealing with the transnationalized social question.

African Philosophy and the Epistemic Marginalization of Women Jonathan Chimakonam,Louise du Toit,2018-04-20

This book examines the underexplored notion of epistemic marginalization of women in the African intellectual place. Women's issues are still very much neglected by governments, corporate bodies and academics in sub-Saharan Africa. The entrenched traditional world-views which privilege men over women make it difficult for the modern day challenges posed by the neglect of the feminine epistemic perspective, to become obvious. Contributors address these issues from both theoretical and practical perspectives, demonstrating what philosophy could do to ameliorate the epistemic marginalization of women, as well as ways in which African philosophy exacerbates this marginalization. Philosophy is supposed to teach us how to lead the good life in all its ramifications; why is it failing in this duty in Africa where the issue of women's epistemic vision is concerned? The chapters raise feminist agitations to a new level; beginning from the regular campaigns for various women's rights and reaching a climax in an epistemic struggle in which the knowledge-controlling power to create, acquire, evaluate, regulate and disseminate is proposed as the last frontier of feminism.

Fascinatingly Disturbing Alexander Darius Ornella,Stefanie Knauss,2010-04-07 Michael Haneke is one of Europe's most successful and controversial film directors. Awarded the Palme d'Or and numerous other international awards, Haneke has contributed to and shaped contemporary auteur cinema and is becoming more and more popular among academics and cinephiles. His mission is as noble as it is provocative: he wants to rape the audience into independence, to wake them up from the lethargy caused by the entertainment industry. The filmic language he employs in this mission is both highly

characteristic and efficient, and yet his methods are open to criticism for their violence toward and manipulation of the audience. The aim of this book is to analyze critically Haneke's aesthetics, his message, as well as his ethical motivation from an interdisciplinary and intercultural perspective. Contributors to the book come from a variety of academic disciplines and cultural backgrounds-European and North American.
