*Crime Writers* Elizabeth Haynes, 2011-01-19 This invaluable resource provides information about and sources for researching 50 of the top crime genre writers, including websites and other online resources. *Crime Writers: A Research Guide* is an easy-to-use launch pad for learning more about crime fiction authors, including those who write traditional mystery novels, suspense novels, and thrillers with crime elements. Emphasizing the best and most popular writers, the book covers approximately 50 contemporary authors, plus a few classics like Agatha Christie. Each entry provides a brief quotation that gives some indication of writing style; a biographical sketch; lists of major works and awards; and research sources, including websites, biographies, criticism, and research guides. There are also read-alikes for selected authors. Of special note is the inclusion of websites and other online resources, such as blogs and social networking sites, which are often overlooked in author-reference sources. The book also provides an overview of the genre and subgenres, a timeline, and a comprehensive bibliography. An ideal resource for genre studies and literature classes, this guide will also be

invaluable to readers' advisors, book club leaders, students, and genre fans.

The Burning Forest Nandini Sundar, 2019-04-09 The Burning Forest is an empathetic, moving account of what drives indigenous peasants to support armed struggle despite severe state repression, including lives lost, homes and communities destroyed. Over the past decade, the heavily forested, mineral-rich region of Bastar in central India has emerged as one of the most militarized sites in the country. The government calls the Maoist insurgency the biggest security threat to India. In 2005, a state-sponsored vigilante movement, the Salwa Judum, burnt hundreds of villages, driving their inhabitants into state-controlled camps, drawing on counterinsurgency techniques developed in Malaysia, Vietnam and elsewhere. Apart from rapes and killings, hundreds of 'surrendered' Maoist sympathisers were conscripted as auxiliaries. The conflict continues to this day, taking a toll on the lives of civilians, security forces and Maoist cadres. In 2007, Sundar and others took the Indian government to the Supreme Court over the human rights violations arising out of the conflict. In a landmark judgment, the Court in 2011 banned state support for vigilantism. The Burning Forest describes this brutal war in the heart of India, and what it tells us about the courts, media and politics of the country. The result is a granular and critical ethnography of Indian democracy over a decade.

**Generative AI and the Future of the Humanities** Dana J. Gavin, 2025-12-01 This book offers scholars in the humanities a way to think critically about generative AI and the impact of technocapitalism on foundational, and essentially human, crafts such as reading and writing. The target audience includes educators and scholars in higher education and K-12, as well as anyone interested in how critical thinking and writing will be taught in the future. For those who only know the term ChatGPT, this book is a resource for understanding how pervasive and ubiquitous generative AI already is in our lives; for those familiar with OpenAI and other developers, this book provides greater context for the effects of such technology on our creative functionality.

Critical Approaches for Teacher Residencies Thomas Albright, Stephanie Behm Cross, Camea Davis, 2025-10-22 This book asks whose histories, knowledges, struggles, sorrows, joys, dreams, and expertise matter in teacher education and teacher residencies. It conceives of teacher residencies as a space for the multiplicity of voices and experiences needed to create opportunities for more democratic education and explores how this might be achieved despite the ways in which schools have become both more politicized and standardized in recent years. It argues that this work will not happen in silos but in community. As such, it showcases residency programs and program providers that have embraced a critical turn in residency work, as well as the voices and perspectives of critical community co-conspirators and the youth being served. Chapters examine geo-socio-historical and political contexts, the democratic and participatory nature of residency work, critical theoretical frameworks, and learning as liberation. Advocating for a critical turn in teacher residency programming and research, this book provides research interventions, practical tools, and residency models that emphasize criticality in

teacher preparation. It offers valuable insights for researchers interested in democratizing teacher education.

California Physicians 2002 Kevin Grumbach, 2002 California (CA) has always been a bellwether state for managed care (MC). Analysts anticipated that by the 21st cent., CA would represent a fully mature MC market: most patients would be enrolled in one of a handful of HMO plans, & most physicians would be working in large med. groups. The results of this survey suggest that a different scenario is now playing out in CA. This survey found, among other things, that: physicians are dropping out of MC; the CA Model of loose networks of private practice physicians organized into large MC practice org's. is unraveling; physicians describe the practice environment in their communities as poor; & many physicians recognize that there are social disparities in access to medical care. *Mass Atrocities, the Responsibility to Protect and the Future of Human Rights* Simon Adams, 2021-01-26 This book ambitiously weaves together history and politics to explain all of the major situations where mass atrocities have occurred, or been prevented, over the 15 years since the 'Responsibility to Protect' (R2P) was adopted at the 2005 UN World Summit. The author provides a history of human rights, mass atrocities and the principle of the R2P from the perspective of someone whose day job has been to work with the UN Security Council, various governments and civil society to help ensure the international community does not fail those who face the threat of genocide, war crimes and crimes against humanity today. It examines the implementation of the controversial principle of R2P since 2011 and how we end the politics of impunity, indifference and inaction once and for all. Using case studies from Iraq, Syria, Myanmar and Libya, the book offers a unique perspective regarding how we make 'never again' a living principle, rather than a cliché and how we end the politics of impunity, indifference and inaction once and for all. It will be of especial interest to scholars, students and policymakers working in the fields of international politics or concerned about human rights, atrocities, the United Nations and international justice in the world today.

*Earthlings* Adrian Parr, 2022-07-05 Silver Medal, 2023 Nautilus Book Awards in the category of Ecology and Environment Amid environmental catastrophe, it is vital to recall what unites all forms of life. We share characteristics and genetic material extending back billions of years. More than that, we all—from humans to plants to bacteria—share a planet. We are all Earthlings. Adrian Parr calls on us to understand ourselves as existing with and among the many forms of Earthling life. She argues that human survival requires us to recognize our interdependent relationships with the other species and systems that make up life on Earth. In a series of meditations, *Earthlings* portrays the wonder and beauty of life with deep feeling, vivid detail, and an activist spirit. Parr invites readers to travel among the trees of the Amazonian rainforest; take flight with birds and butterflies migrating through the skies; and plunge into the oceans with whales and polar bears—as well as to encounter bodies infected with deadly viruses and maimed by the violence of global capitalism. Combining poetic observation with philosophical contemplation and scientific evidence, Parr offers a moving vision of a world in upheaval and a potent

manifesto for survival. Earthlings is both a joyful celebration of the magnificence of the biosphere and an urgent call for action to save it.

The Case Against the General Steve Albert, 1993 On December 20, 1989, George Bush, the President of the United States, ordered a military invasion of Panama. One of his stated aims was the capture and return of General Manuel Antonio Noriega, the leader of Panama, to stand trial in the United States. American prosecutors had accused Noriega of trafficking in illegal drugs and money laundering. Not since ancient Rome had one nation launched an invasion of another with the goal of bringing its ruler to justice. But was justice served? The Case Against the General is the full, untold story of Manuel Noriega's capture and trial. Reporter Steve Albert, granted unusual access by both defense and prosecution, brings to life the theatrical dynamics of a court case unique in the annals of American jurisprudence. Was Noriega a criminal, properly subject to trial under American law, or was he a prisoner of war as he claimed? Was the U.S. government right to limit Noriega's access to classified information he believed vital to his defense? Was the United States justified in freezing Noriega's assets? Imbued with a deep understanding of the constitutional issues that this singular trial raises, the Case Against the General is high-stakes courtroom drama at its most compelling.--BOOK JACKET. **Operation Just Cause** Thomas Donnelly, Margaret C. Roth, Caleb Baker, 1991 The authors visited each major battle site to write this authoritative and vivid account of Operation Just Cause--and offer a firsthand account of the planning, execution, and aftermath of the U.S. invasion of Panama, and the fall of General Noriega, in December, 1989. Index.

**What is Legal Education for?** Rachel Dunn, Paul Maharg, Victoria Roper, 2022-09-30 How we interpret and understand the historical contexts of legal education has profoundly affected how we understand contemporary educational cultures and practices. This book, the result of a Modern Law Review seminar, both celebrates and critiques the lasting impact of Peter Birks' influential edited collection, *Pressing Problems in the Law: Volume 2: What is the Law School for?* Published in 1996, his book addresses many critical issues that are hauntingly present in the 21st century, amongst them the impact of globalisation; technological disruption; and the tension inherent in law schools as they seek to balance the competing interest of teaching, research and administration. Yet Birks' collection misses key issues, too. The role of wellbeing, of emotion or affect, the relation of legal education to education, the status of legal education in what, since his volume, have become the devolved jurisdictions of Northern Ireland, Wales and Scotland - these and others are absent from the research agenda of the book. Today, legal educators face new challenges. We are still recovering from the effects of the Covid-19 pandemic on our universities. In 1996 Birks was keen to stress the importance of comparative research within Europe. Today, legal researchers are dismayed at the possibility of losing valuable EU research funding when the UK leaves the EU, and at the many other negative effects of Brexit on legal education. The proposed Solicitors Qualifying Examination takes legal

education regulation and professional learning into uncharted waters. This book discusses these and related impacts on our legal educations. As law schools approach an existential crossroads post-Covid-19, it seems timely to revisit Birks' fundamental question: what are law schools for?

**Criminal Procedure** Wayne R. LaFave, 2007 Major emphasis is placed on the basic premises of criminal law, including its sources and general limitations. This Hornbook provides detailed discussion on the topics of responsibility, justification and excuse, inchoate crimes, accomplice, and liability. Attention is also given to subjects such as causation, insanity, and conspiracy.--Publisher's website.

**Carbon Capture and Storage in the United Kingdom** Marc Hudson, 2024-03-27 This book is a concise but comprehensive guide to the history, present and possible futures of carbon capture and storage policy and action in the United Kingdom (UK). There have been multiple failed starts, promises and "last chances" for carbon capture and storage (CCS) in Europe, North America, China and Australia, but thus far it has repeatedly collided with the political and economic realities that the technology is too expensive and complicated to gain and keep policymakers' support. However, in the UK that might be changing, with explicit government support for CCS to help decarbonise industry. Set within the broader context of global interest in CCS, this book first outlines the technologies involved in the types of capture technology, transport options and storage options in the UK. It then briefly introduces an overarching policy analysis framework (John Kingdon's multiple streams approach) and uses it to give an account of the long history of CCS interest and efforts in three chapters covering the 1970s to 2002, 2003 to 2015 and 2016 to the present day. Marc Hudson focusses on the various arguments made for the introduction of CCS, and the slowly shifting coalitions of actors who make those arguments, while contrasting these with the perspectives of those opposed to CCS. This book will be of great interest to students, scholars and policymakers researching and working in the field, as well as the related areas of energy policy, energy transitions and climate change.

**The Presidencies of George Herbert Walker Bush and George Walker Bush** Glenn P. Hastedt, 2008 The Bush Presidencies represent a unique historical challenge for historians and political scientists alike. Not since John Adams and his

son John Quincy Adams has the nation been led by father and son presidents. The Bushes are different from the Adamses. John Adams and John Quincy Adams ruled a good twenty-four years apart with John Quincy assuming the presidency in 1824 after a controversial election that was settled by the House of Representatives. Although John Quincy did not receive a majority of popular votes or a majority of elector votes he assumed the presidency due to the influence of the House. He was soundly defeated by Andrew Jackson four years later. In contradistinction to John Quincy Adams, George W. Bush was declared the electoral vote winner in the 2000 presidential election after a bitter contested election settled in large measure by the Supreme Court decision Bush v. Gore. Unlike John Quincy, George W. Bush won a second term albeit by the smallest margin in history [1]. George H W Bush was not successful in his re-election quest while John Adams was in his. Psychological insinuations and theories are more rampant today affecting the analysis of the Bush presidencies unlike the Adams' presidencies. However, the Bush presidencies present opportunities for comparing and contrasting father and son presidencies governing within eight years of each other. In addition, the son governs as the father watches. This new and significant book is dedicated to comparing and contrasting this father and son combination. The response to our call has been quite fruitful. There seems to be a conventional wisdom developing about this father and son relationship. It seems to emphasise differences between the father and son. These differences are largely due to the different approaches that father and son took towards Iraq. Thus it has been observed that the father is a bit disappointed in the son for the path taken in Iraq. George H W Bush is concerned for and worries about his son. Our authors find not only differences but great similarities between both presidents. This is as one might expect given blood lines, environmental upbringing, family ties, education and other variables affecting these individuals. The analysis here both adds to and contradicts the conventional wisdom view of the Bushes'. Our authors present a first attempt at analysing this unique relationship in various policy areas. The authors believe that this relationship will provide future scholars with many research questions concerning the nature of the presidency.
