The Ethics and Conduct of Lawyers in England and Wales Andrew Boon, 2023-11-30 The fourth edition of this respected textbook examines the regulation and conduct of lawyers in England and Wales and addresses new developments in the field, including those in international practice, sexual misconduct, and the environment. Focusing on the practice of, and interrelationship between, solicitors and barristers, the book provides background to current arrangements while exploring contemporary rules of conduct, systems of regulation, and controversies. The four main parts cover client duties, wider obligations, key contexts, and regulation. Parts one to three provide an academic introduction to the subject of lawyers' ethics. They are suitable as a core text for a semester course at undergraduate level, providing grounding for vocational training, such as the Solicitors' Qualifying Examination. Comparisons are made with conduct rules applying in other leading common law jurisdictions where relevant. These parts also explore links between the subject of ethics and the development of lawyers' practical skills. Part four applies the general principles to three elements of regulation: practice, admission, and discipline. The approach throughout is socio-legal. While the essential law is described, relevant social science research informs consideration of issues and debates.

The Professional Standards of Executive Remuneration Consultants Calvin Jackson, 2023-05-01 Love them or hate them, executive remuneration consultants are key players in remuneration committees' pay determination processes. This book concerns the professional standards of executive remuneration consultants (and their 'in-house' counterparts; for example, Human Resources Director and Head of Reward) in providing remuneration committee advisory services. The author is a 25-year 'veteran' executive remuneration consultant, having worked around the world in this capacity (particularly in the financial services sector). This book is based on a qualitative empirical doctoral research exercise, involving 53 participants in the UK executive pay scene (including regulators, institutional shareholder bodies, proxy advisors, remuneration committees' chairs/members, executive remuneration consultants and in-house executive reward specialists). The objective

was to formulate conclusions that could be used to the benefit of UK practice and contribute to the relevant academic scholarship on executive remuneration consultants. The research covered 18 aspects, ranging from an examination of the independence of such consultants to whether there might be a specialised accreditation/qualification and/or licence to practise regime covering their services. It provides novel insights into this previously under-researched area of corporate governance/financial regulation. This book will be of interest to those involved in the UK executive remuneration scene, whether government, regulators or any of the other parties mentioned already (plus academics in universities and business schools). It is hoped too that overseas remuneration regimes that have respects in common with the UK's will find this book useful.

Promoting Equity, Cooperation and Innovation in the Fields of Transboundary Waters and Natural Resources Management Stephen C. McCaffrey, John S. Murray, Melvin Woodhouse, 2017-02-20 Promoting Equity, Cooperation and Innovation in the Fields of Transboundary Waters and Natural Resources Management honours the memory and legacy of Dr. David J.H. Phillips, an extraordinary scientist, consultant and friend of the editors and contributors. He was a scientist of exceptional quality, dedicated to the practical study of aquatic environments, be they marine, freshwater or virtual. This volume contains excerpts from his meticulously researched work from a wide range of settings globally. Colleagues' essays provide insights to a man who lived life to the utmost, worked to the highest professional standards and had a unique gift in challenging situations to generate understanding and practical responses through his curiosity, remarkable ingenuity, and sheer hard work. His work opens many new paths of research and continues to inspire scientists and researchers in the fields of marine biology and pollution, fresh water issues, and conflict over transboundary water resources.

HIV and Breastfeeding Pamela Morrison,2022-02-24 In the early 1980s it was discovered that HIV, the virus that causes AIDS, could be passed through a mother's milk to her baby. Almost overnight in the industrialised countries, and later in the African countries most ravaged by HIV, breastfeeding became an endangered practice. But in the rush to reduce transmission of HIV, everything we already knew about breastfeeding's life-saving effects was overlooked, with devastating consequences for mothers and babies. In *HIV and Breastfeeding: the untold story*, former IBCLC Pamela Morrison, an acknowledged authority on HIV and breastfeeding, reveals how women in the world's most poverty-stricken areas were persuaded to abandon breastfeeding as part of a short-sighted and deadly policy that led to a humanitarian disaster. The dilemma that breastfeeding, an act of nurturing which confers food, comfort and love, could be at once life-saving yet lethal, has been called 'the ultimate paradox'. This critical account reveals how vital breastfeeding is, even in the most difficult of circumstances, and examines the lessons that can be learned from the mistakes of the past - which is particularly relevant as we deal with the consequences for mothers and babies of another global pandemic, Covid-19. With detailed information for HIV-positive mothers and their caregivers, and success stories from mothers themselves, this book is essential reading for anyone involved in protecting and supporting breastfeeding, or with a need for evidence-based information about breastfeeding and HIV.
