Educación e Igualdad de oportunidades. José Juan Carrión Martínez,2021-10 Hoy en día, los ecosistemas formativos vinculados a la actual sociedad del conocimiento y de la información deben adaptarse a todas las personas que integran la comunidad educativa con funcionalidades diversas y con capacidades diferentes para evitar la marginalidad y la exclusión social. Derivado de esta intención social y pedagógica se desarrolla esta obra socio-científica titulada: “La educación e igualdad de oportunidades”. La publicación se encuentra constituida por once capítulos, siendo los siete primeros y el undécimo vinculados con el ámbito formativo de la innovación en temática de la inclusividad y educación para todos y todas. En ellos se describen de forma comprensible y didáctica las reflexiones y experiencias realizadas por profesionales de la educación de diferentes universidades para el desarrollo sostenible educativo de la ciudadanía inclusiva global. En última instancia, resaltar que el octavo capítulo se explicita un innovador proyecto igualitario de cooperación y tutorías académicas denominado Friends, entre estudiantes para mejorar aprendizaje de la gramática inglesa. Y los dos siguientes capítulos versan sobre la formación en el contexto competencial. En este sentido, cabe mencionar que, si durante el siglo pasado la competencia prioritaria que se desarrollaba en los educandos era la memorística, en los últimos años y más aún en estos tiempos de crisis sociosanitaria la educación se orienta preferentemente a su vertiente digital. Por ende, el gran reto de las instituciones formativas en tiempos de post-pandemia es lograr que los aprendices se formen en el contexto competencial para enfrentarse con seguridad y creatividad al cambio constante.

Tecnologías para la formación de educadores en la sociedad del conocimiento Manuela Raposo-Rivas,Manuel Cebrián de

la Serna,2020-09-03 Tecnologías para la formación de educadores en la sociedad del conocimiento es una obra que ofrece nociones y tendencias pedagógicas que surgen vinculadas al uso de los recursos tecnológicos en contextos y proyectos educativos innovadores. La alfabetización en la sociedad del conocimiento, los recursos y contenidos educativos digitales, las metodologías activas con tecnologías y las posibilidades didácticas de las tecnologías emergentes, son los cuatro bloques de contenido en que se estructura para dar cobijo a sus dieciocho capítulos. En el libro se abordan cuestiones fundamentales como el papel de las tecnologías para la educación y el uso responsable de Internet en la sociedad del conocimiento; el marco curricular, organizativo y la innovación educativa con tecnologías; la inclusión digital y el diseño universal de aprendizaje para la creación de contenidos; el uso, diseño y distribución de recursos educativos abiertos, objetos de aprendizaje, anotaciones multimedia y vídeo digital, junto con la evaluación educativa con tecnologías y la analítica de los aprendizajes. Igualmente se atiende la incursión en metodologías relacionadas con nuevas formas de aprender y acceder al conocimiento, como el aprendizaje basado en proyectos, la clase invertida, la gamificación educativa y el trabajo colaborativo con computación en la nube, al tiempo que se ponen en valor recursos y medios actuales como el software social, las redes sociales y los cursos virtuales; los dispositivos y aplicaciones móviles; la realidad aumentada, la robótica educativa y el pensamiento lógico. Es una obra que no tiene por qué consultarse linealmente, sino que el lector puede navegar por ella con distintos recorridos y ritmos, sabiendo que además del desarrollo temático, cada capítulo se acompaña de objetivos y competencias que lo guían y de una relación de propuestas de carácter práctico, que permiten tanto la ampliación de contenidos como la transferencia del conocimiento adquirido.
