Elie K. Barbour, Thankam Mathew

Animal Chakra Healing Joan Ranquet, 2025-11-18 • Shares the characteristics and common imbalances of the seven main chakras in our animals and ways to harmonize them for optimal health • Explores the 8th chakra, relating to the animal's aura and connective ecosystem, including their household and the collective and cosmic fields • Details the differences of chakra systems among domestic animals, including cats, dogs, and horses by providing case studies, chakra charts, and checklists Little is known about the chakra system of animals, yet the chakras of our beloved companions hold valuable clues for their health and well-being. Chakras can reveal what is at the core of our animal's desires and challenges: why they behave the way they do, how they process negative or traumatic experiences, and where they store these in their body. For each of the seven main chakras, expert animal healer Joan Ranquet discusses key characteristics and chakra-related organs and systems as well as shows how to harmonize common imbalances. Tuning into the animal's aura and connective ecosystem, their eighth chakra, she highlights the effects of household environment and collective and cosmic fields on your animal. Ancestral influences become evident in domestic animals' systems, as Joan traces their descent from wild forebears. When chakra dynamics play out in your household, it's important to know how to release pressure, ground, and balance your companions' chakras, so you become the emotional leader of your home and a healing presence for your animals. *Animal Chakra Healing* offers techniques and resources to understand the subtle energetics of our companions and harmonize with them for increased health and well-being—not only for our animals but ourselves as well.

The Gifts We Receive from Animals Lori R. Kogan, 2022-06-19 *The Gifts We Receive from Animals* is a book guaranteed to brighten a reader's day. Professionals engaged in therapy work as well as those who have companion animals at home will enjoy learning about the many ways in which animals impact people's lives. Through a series of short, true-life stories, written by professionals engaged in animal assisted interventions, *The Gifts We Receive from Animals* reminds readers of the core essence of the human animal bond and the reason behind the growing phenomenon of animal assisted interventions. Readers will learn, for example, about the young child who shares her innermost thoughts with a dog and, as a result, learns how to talk with people; the soldier who feels comfortable and safe with a dog, a feeling he has been lacking since active duty; and the elderly adult who works through difficult physical therapy because of his therapy dog. *The Gifts We Receive from Animals* takes readers on a delightful journey, offering insights into the unique impact animals have in the lives

of those they help.

Animals and War Ryan Hediger, 2012-11-01 *Animals and War* is the first collection of essays to study its topic. Using sociology, history, anthropology, and cultural studies, it analyzes a wide range of phenomena and exposes the often paradoxical contours of human-animal relationships.

White Mask Wesley Shennan, 2014-09-25 Why are so many Natives, First Nations, Indians, Metis, Inuits, Aboriginals, Indigenous People, and Amerindians ashamed of whom they are? Where does this shame come from? Why does it exist today? These questions are the underlying fabric of the memoir but are only alluded to in the first half of the story. About half way through, a flash back to the very first memory initiates the story behind the story, wherein shame is discussed and explored in narratives, interactions, quotations and teachings from childhood to middle age. The author's re-celebration of his First Nation heritage evolves until he feels the same joy as at age 10 when he first learned of his ancestry. Up to five generations of First Nations have been traumatized by residential school and societal racism, but the grasp of shame is becoming weaker.

The Oxford Handbook of Animal Organization Studies Linda Tallberg, Lindsay Hamilton, 2022 This interdisciplinary book lays out the contours of a new academic discipline, Animal Organization Studies, thus answering timely calls for more attention to nonhuman life in traditionally human-centred fields in social science.

Interspecies Communication Gavin Steingo, 2024-04-09 A surprising study reveals a plethora of attempts to communicate with non-humans in the modern era. In *Interspecies Communication*, music scholar Gavin Steingo examines significant cases of attempted communication beyond the human—cases in which the dualistic relationship of human to non-human is dramatically challenged. From singing whales to Sun Ra to searching for alien life, Steingo charts the many ways we have attempted to think about, and indeed to reach, beings that are very unlike ourselves. Steingo focuses on the second half of the twentieth century, when scientists developed new ways of listening to oceans and cosmic space—two realms previously inaccessible to the senses and to empirical investigation. As quintessential frontiers of the postwar period, the outer space of the cosmos and the inner space of oceans were conceptualized as parallel realities, laid bare by newly technologized “ears.” Deeply engaging, *Interspecies Communication* explores our attempts to cross the border between the human and non-human, to connect with non-humans in the depths of the oceans, the far reaches of the universe, or right under our own noses.
