

Was Ist Eine Global City

Saskia Sassen

The Global Cities Reader Neil Brenner, Roger Keil, 2006 This book contains fifty selections from classic writings by authors such as John Friedmann, Michael Peter Smith, Saskia Sassen, Peter Taylor, Manuel Castells and Anthony King, as well as major contributions by other international scholars of global city formation.

The Global City Saskia Sassen, 2025-09-09 In her classic book *The Global City*, Saskia Sassen tells how New York, London, and Tokyo became command centers of the emerging global economy and, in the process, underwent massive and parallel changes. The book reorients the way we think about how cities shape and are shaped by globalization and provides lessons for the future.

Urban World/global City David Clark, 2003 The millennium marked a symbolic transition in the history of human settlement. Over half of the world's six billion people now live in towns and cities. The world is an urban place. This book identifies and accounts for the characteristics of the contemporary city and of urban society. It analyses the distribution and growth of settlements and explores the social and behavioural characteristics of urban living. The latest theoretical and empirical developments and insights are synthesized and presented in an accessible way. Emphasis throughout is placed upon the world scale, urban developments being seen as the geographical consequences of the evolution of capitalism. Individual chapters focus upon populations and places, growth and urbanization, urban development as a global phenomenon, socio-economic consequences of global urban development, urban culture and global urban society, world cities and the urban future. This second edition has been extensively updated and referenced. Each chapter includes sets of learning objectives, annotated readings and topics for discussion.

Global Cities Greg Clark, 2016-11-29 Why have some cities become great global urban centers, and what cities will be future leaders? From Athens and Rome in ancient times to New York and Singapore today, a handful of cities have stood out as centers of global economic, military, or political power. In the twenty-first century, the number of truly global cities is greater than ever before, reflecting the globalization of both economic and political power. In *Global Cities: A Short History*, Greg Clark, an internationally renowned British urbanist, examines the enduring forces such as trade, migration, war and technology that have enabled some cities to emerge from the pack into global leadership. Much more than an historical review, Clark's book looks to the future, examining the trends that are transforming cities around the world as well as the

new challenges all global cities increasingly will face. Which cities will be the global leaders of tomorrow? What are the common issues and opportunities they will face? What kinds of leadership can make these cities competitive and resilient? Clark offers answers to these and similar questions in a book that will be of interest to anyone who lives in or is affected by the world's great urban areas.

Global Cities Anthony King, 2015-03-27 Since the late 1970s the role of key world cities such as Los Angeles, New York and London as centres of global control and co-ordination has come under increasing scrutiny. This book provides an overview and critique of work on the global context of metropolitan growth, world city formation and the theory it has generated. Suggesting 'post-imperialism' as the most appropriate framework for analysis, the author demonstrates the extent to which urban and regional development, both in Britain and elsewhere, were linked to a colonial mode of production, and highlights the effects of its disappearance. Against this background, the author charts the transformation of London from imperial capital in the nineteenth and early twentieth centuries to world city in the capitalist world economy of today.

The Global City Theodore Hermann Von Laue, 1969

Global Cities Zhou Zhenhua, 2020 The pivotal nodes in the world city network are global cities-cities of supreme strategic value in global economy and politics, science and technology, culture, and society. *Global Cities: Past, Present and Future* explores the evolution of global cities-their formation, rise, development and tendencies. This book summarizes and interprets global tendencies and also puts forward a theoretical framework that will help researchers understand these cities better. It also makes a compelling case for understanding every city in terms of evolutionary dynamics. The first eight chapters of the book discuss the ontology of global city evolution and patterns, forms and trends of development. The last two chapters study the case of Shanghai, which aims to build itself into an important global city by 2050. This case study illustrates the shaping of a new type of global city that demonstrates new characteristics of the globalized space.

The Global City 2.0 Kristin Ljungkvist, 2015-08-27 Global cities all over the world are taking on new roles as they increasingly participate directly and independently in international affairs and global politics. So far, surprisingly few studies have analyzed the role of the Global City beyond its already well explicated role in the globalized economy. How is it that local governments of Global Cities claim international political authority and develop what appears to be their own independent foreign and security policies despite the fact that such policy areas have traditionally been considered to be the core function of nation-states and central governments? What does it mean to be and to govern the contemporary Global City? In this book Kristin Ljungkvist claims that we can better understand why local governments find it to be in their Global City's interest to claim international political authority by exploring how the city's role in the globalized world is constructed and narrated locally. A core claim is that Global City-hood as a specific type of collective identity can play a constitutive part in such interest formation. Combining insights from International Relations and Urban Studies scholarship, and with the help

of a case study on New York City, Ljungkvist develops a new analytical framework for studying the Global City as an international political actor. The Global City 2.0 shows that even as the Global City engages in various global issues such as global environmental governance or counterterrorism, such pursuit will be framed and rationalized in terms of the city's economic growth. The quest for growth and global competitiveness are not necessarily the only available meanings attached to the being and governing of the contemporary Global City. However, there seems to be a remarkable persistency and attraction in economistic ideas and an economistic conception of the Global City.

Everyday Lives in the Global City Jörg Dürschmidt, 2013-04-15 Rejecting simplifying notions of globalisation as a macro-economic force, this book provides a grounded picture of the various ways in which people's biographies are tied up with the global cultural economy. The main argument of the book is that the globalisation of lives is experienced by people as the 'extension' of their 'milieux' both spatially and symbolically.

Handbook of Cities and Networks Neal, Zachary P., Rozenblat, Céline, 2021-07-31 This Handbook of Cities and Networks provides a cutting-edge overview of research on how economic, social and transportation networks affect processes both in and between cities. Exploring the ways in which cities connect and intertwine, it offers a varied set of collaborations, highlighting different theoretical, historical and methodological perspectives.

Cities in a World Economy Saskia Sassen, 2018-05-30 Cities in a World Economy examines the emergence of global cities as a new social formation. As sites of rapid and widespread developments in the areas of finance, information and people, global cities lie at the core of the major processes of globalization. The book features a cross-disciplinary approach to urban sociology using global examples, and discusses the impact of global processes on the social structure of cities. The Fifth Edition reflects the most current data available and explores recent debates such as the role of cities in mitigating environmental problems, the global refugee crisis, Brexit, and the rise of Donald Trump in the United States.

The Global City and the Holy City Tovi Fenster, 2016-09-17 The Global City & the Holy City explores the local embodied knowledge of women and men of different national, cultural and ethnic identities and age groups, living in London and Jerusalem. Their narratives focus on the three main concepts of Comfort, Belonging and Commitment to the various spaces in which they live. By deconstructing the meanings of these three notions and analyzing their expression in cognitive temporal maps, The Global City & The Holy City examines the practicalities of incorporating this kind of local embodied knowledge into the professional planning and management of cities in the age of globalization.

Introducing Globalization Matthew Sparke, 2013-02-04 Designed specifically for introductory globalization courses, Introducing Globalization helps students to develop informed opinions about globalization, inviting them to become participants rather than just passive learners. Identifies and explores the major economic, political and social ties that comprise contemporary global interdependency Examines a broad sweep of topics, from the rise of transnational

corporations and global commodity chains, to global health challenges and policies, to issues of worker solidarity and global labor markets, through to emerging forms of global mobility by both business elites and their critics Written by an award-winning teacher, and enhanced throughout by numerous empirical examples, maps, tables, an extended bibliography, glossary of key terms, and suggestions for further reading and student research Supported by additional web resources - available upon publication at www.wiley.com/go/sparke - including hot links to news reports, examples of globalization and other illustrative sites, and archived examples of student projects Engage with fellow readers of *Introducing Globalization* on the book's Facebook page at www.facebook.com/IntroducingGlobalization, or learn more about this topic by enrolling in the free Coursera course *Globalization and You* at www.coursera.org/course/globalization

The Century of Global Cities Andrea Tobia Zevi, 2020-01-24 Cities are gaining importance and influence worldwide. They sustain the global economy, set cultural trends, produce greenhouse gas emissions and consume energy; they attract migration flows and foster new political waves. While cities were supposed to be declining back in the 1980s, the globalised economy has established them as crucial world hubs leading billions of people on every continent, both at the top and the bottom of the social ladder, to move to cities. Today, global cities cry out for a more prominent role. But why and to what extent do they matter? Can they really stand alone in the global arena? How are they interacting with governments and multilateral organisations? From climate change to connectivity, from inequalities to migration: what is their contribution to key global challenges?

Routledge Handbook of Asian Cities Richard Hu, 2023-05-31 This handbook provides the most comprehensive examination of Asian cities—developed and developing, large and small—and their urban development. Investigating the urban challenges and opportunities of cities from every nation in Asia, the handbook engages not only the global cities like Shanghai, Tokyo, Singapore, Seoul, and Mumbai but also less studied cities like Dili, Malé, Bandar Seri Begawan, Kabul, and Pyongyang. The handbook discusses Asian cities in alignment to the United Nations' New Urban Agenda and Sustainable Development Goals in order to contribute to global policy debates. In doing so, it critically reflects on the development trajectories of Asian cities and imagines an urban future, in Asia and the world, in the post-sustainable, post-global, and post-pandemic era. Presenting 43 chapters of original, insightful research, this book will be of interest to scholars, practitioners, students, and general readers in the fields of urban development, urban policy and planning, urban studies, and Asian studies.

The City Reader Richard T. LeGates, Frederic Stout, 2015-07-16 The sixth edition of the highly successful *The City Reader* juxtaposes the very best classic and contemporary writings on the city to provide the comprehensive mapping of the terrain of Urban Studies and Planning old and new. *The City Reader* is the anchor volume in the Routledge Urban Reader Series and is now integrated with all ten other titles in the series. This edition has been extensively updated and expanded to reflect the

latest thinking in each of the disciplinary areas included and in topical areas such as compact cities, urban history, place making, sustainable urban development, globalization, cities and climate change, the world city network, the impact of technology on cities, resilient cities, cities in Africa and the Middle East, and urban theory. The new edition places greater emphasis on cities in the developing world, globalization and the global city system of the future. The plate sections have been revised and updated. Sixty generous selections are included: forty-four from the fifth edition, and sixteen new selections, including three newly written exclusively for The City Reader. The sixth edition keeps classic writings by authors such as Ebenezer Howard, Ernest W. Burgess, LeCorbusier, Lewis Mumford, Jane Jacobs, and Louis Wirth, as well as the best contemporary writings of, among others, Peter Hall, Manuel Castells, David Harvey, Saskia Sassen, and Kenneth Jackson. In addition to newly commissioned selections by Yasser Elshestawy, Peter Taylor, and Lawrence Vale, new selections in the sixth edition include writings by Aristotle, Peter Calthorpe, Alberto Camarillo, Filip DeBoech, Edward Glaeser, David Owen, Henri Pirenne, The Project for Public Spaces, Jonas Rabinovich and Joseph Lietman, Doug Saunders, and Bish Sanyal. The anthology features general and section introductions as well as individual introductions to the selected articles introducing the authors, providing context, relating the selection to other selection, and providing a bibliography for further study. The sixth edition includes fifty plates in four plate sections, substantially revised from the fifth edition.

Global Cities, Local Streets Sharon Zukin, Philip Kasinitz, Xiangming Chen, 2015-07-16 Global Cities, Local Streets: Everyday Diversity from New York to Shanghai, a cutting-edge text/ethnography, reports on the rapidly expanding field of global, urban studies through a unique pairing of six teams of urban researchers from around the world. The authors present shopping streets from each city - New York, Shanghai, Amsterdam, Berlin, Toronto, and Tokyo - how they have changed over the years, and how they illustrate globalization embedded in local communities. This is an ideal addition to courses in urbanization, consumption, and globalization. The book's companion website, www.globalcitieslocalstreets.org, has additional videos, images, and maps, alongside a forum where students and instructors can post their own shopping street experiences.

The Changing Face of the Global Cities Peter Hall, 1992 How some of the world's great cities have fundamentally changed since 1950.

Routledge Handbook of Urbanization in Southeast Asia Rita Padawangi, 2018-10-11 The study of urbanization in Southeast Asia has been a growing field of research over the past decades. The Routledge Handbook of Urbanization in Southeast Asia offers a collection of the major streams and themes in the studies of the cities in the region. A focus on the urbanization process rather than the city as an object opens the topic more broadly to bring together different perspectives. This timely handbook presents these diverse views to build a clearer understanding of theoretical contributions of urban

studies in Southeast Asia and to provide a complete collection of scholarly works that are thematically structured and a useful tool for teaching urbanization in Southeast Asia. Following the introduction by the editor, the handbook is structured along central, emerging themes. It contains six parts, which are each introduced by the editor: Theorizing Urbanization in Southeast Asia Migration, Networks and Identities Development and Discontents Environmental Governance The Social Production of the Urban Fabric Social Change and Alternative Development This handbook will be an essential reference work for scholars interested in Urban Studies, cities and urbanization in Asia, and Southeast Asian Studies.
