The astral body, by arthur powell Arthur e Powell, 1965

The Etheric Double A. E. Powell, 2007-04-25 According to esoteric teachings we have an energy body of lighter, less dense material that is connected to our physical bodies. Those who can see it call it the aura and can sometimes tell the state of a person's health by the way it appears. Those who use its energy refer to the force as prana, chi, vital force, orgone or a number of other names. There are seven chakras, or energy points, where this energy collects in the etheric body. Working with the chakras and these spiritual energies can play a big part in the psychic development and enlightenment of those sensitive enough to work on these levels. This book shows you how. Subjects include a chapter on each chakra center; also Prana or Vitality, Force-Centres, Kundalini, Healing, Mediumship, Birth, Death, Mesmerism, Magnetisation of Objects, Ectoplasm, and more.

The Causal Body and the Ego Arthur E. Powell, 2013-10 This is a new release of the original 1928 edition.

The Astral Body and Other Astral Phenomena A. E. Powell, 2018-12-05 THE purpose of this book is to present to the student of Theosophy a condensed synthesis of the information at present (1926) available concerning the Astral Body of man, together with a description and explanation of the astral world and its phenomena. The book is thus a natural sequel of *The Etheric Double and Allied Phenomena* published in 1925. As in the case of *The Etheric Double*, the compiler has consolidated the information obtained from a large number of books, a list of which is given, arranging the material, which covers a vast field and is exceedingly complex, as methodically as lay within his power. It is hoped that by this means present and future students of the subject will be saved much labour and research, being able not only to find the information they require presented in a comparatively small compass, but also, with the help of the marginal references, to refer, should they so desire, to the original sources of information. In order that the book may fulfil its purpose by being kept within reasonable dimensions, the general plan followed has been to expound the principles under-lying astral phenomena, omitting particular examples or instances. Lecturers and others who wish specific illustrations of the principles enunciated, will find the marginal references useful as a clue to the places where the examples they seek may be found.—A. E. Powell

The Solar System Lieut.-Col. Arthur E. Powell, 2018-02-27 The aim of the present volume is to give a co-ordinated and

coherent view of the forest rather than to describe in detail each particular tree. The student may then, as his leisure permits, and his tastes impel, study for himself the histories of the separate trees, bushes, thickets, and so on, which, collectively, make up the gigantic forest of lives which populate the amazing world, or rather series of worlds, in which we have our being and evolve. The work is planned in three main sections. First, the field, in which evolution takes place, is described. This involves a study of the various globes, their successive periods of activity and obscurity, the chains, and schemes of evolution. It is the formative of our subject, a description of the places where life evolves. The second section deals with the various streams of life which are poured into the prepared field, and the method by which those streams steadily evolve and pass through the various stages or levels of attainment or growth. These processes are here dealt with in, broad outline only, giving the student a bird's-eye view of the whole stately march of events. The third section describes in much more detail the progress of the component parts of certain of the kingdoms of life, more especially the human races and sub-races. In this section, however, as already stated, full elaboration of detail is avoided, the object being, not so much to give the student an encyclopedic mass of information, as to enable him to perceive and understand the principles determining the mighty plan in obedience to which everything is ordered in this superbly ordered universe, in which not a sparrow falls on the ground save by the will of the Father of the System to which we have the honour to belong. (Lieut.-Col. Arthur E. Powell)

Reading Beyond the Lines: A Treatise on Consciousness, Energy, Spirituality and Healing Liyla S,2022-06-08 On an unsuspecting Friday night, Liyla lost her son to an accident. Lost and disillusioned, all she wanted was a chance to speak to her son again, tell him she loved him and missed him. But death is the end, isn't it? In a mind bending journey through the many planes we humans exist in, Liyla's life changes as she encounters people who help reach across the veil of life and connect her to her son. This event opens a door in her life through which she discovers the meaning of life and beyond. Her studies ranging from contemporary Western sciences to ancient Indian wisdom lead her to understanding what it means to live, and our purpose on this planet along with a clear realization that the universe is just energy. This book will take you on a

journey that answers many questions that have plagued humanity. What exactly is the mind? What is Consciousness? What is destiny? And the biggest one of all-- What happens after our physical forms pass from this life? Liyla looks at these questions with a scientific lens, hoping to bridge the gaps between science and spirituality — for each one of us looks for answers for these same questions within this cosmos. In this book, the spiritual aspects of life are explained with reference to the Panchakosha (five layer) theory of Indian spirituality which is elucidated in the Upanishads and other ancient Indian books. This gives a strong logical basis to understand Consciousness, and life in the physical and subtle planes.
