Leading for the Future: Alignment of AACC Competencies with Practice Pamela L. Eddy,2012-11-15 The AACC competencies were initially developed to help provide guidance in developing community college leaders because of predictions of a leadership crisis in the two-year college sector. Since their creation, the competencies have been used to direct topics in leadership development programs and to guide future leaders about what skills are critical to master. Yet scant research exists on the use of the competencies in practice or on analysis of the competencies within the changing higher education climate. This issue provides a review of the research on the competencies in the field and posits several strategies for the future use of the competencies and potential changes to the competencies. This is the 159th volume of this Jossey-Bass quarterly report series. Essential to the professional libraries of presidents, vice presidents, deans, and other

leaders in today's open-door institutions, *New Directions for Community Colleges* provides expert guidance in meeting the challenges of their distinctive and expanding educational mission.
