Informational Environments Jürgen Buder,Friedrich W. Hesse,2017-10-13 This book provides a multidisciplinary view into how individuals and groups interact with the information environments that surround them. Featured topics include: Managing obesity prevention using digital media. Using digital media to assess and promote school teacher competence. Informational environments and their effect on college student dropout. Web-Platforms for game-based learning of orthography and numeracy. Studies in Language and Cognition Mats Andréén,Marlene Johansson Falck,Jordan Zlatev,2008-12-18 Using a plethora of concepts, theories and methods, the theoretical and empirical studies described in this volume are united in their

approach of treating language not in isolation (e.g. as a “module”), but as both based on structures and processes of cognition, and at the same time as affecting the human mind. The book is organized in 7 parts, corresponding to some of the major fields in language research today: (a) linguistic meta-theory and general issues, (b) lexical meaning, (c) metaphor, (d) grammar, (e) pragmatics, (f) gesture and bodily communication, and (g) historical linguistics. At the same time, the non-modular approach to language adopted by the authors is reflected by the fact that there are no strict boundaries between the parts. Thus, the book is a valuable contribution to the growing interdisciplinary field of Language and Cognition.
