A COMPENDIUM OF CLASSIC AND POSTMODERN NOVEL SUMMARIES Vivian Siahaan, 2019-08-03 This book is comprised of a compendium of summaries from all novels that I have read for almost twelve years. Obviously, the summaries have been documented on my blog since 2016, and seemingly, in my opinion, it is better bundled in a book form since the statistic views show that the classic fictions are those among most read, so I rose to comply with that demand. The purpose for which I devote myself to compose 85 summaries is to provide quick reading for novel readers and students. Numerous genres are presented because I am quite conscious those will bequeath you an imaginative horizon. As a work of art, many of them transcend their expiatory aspects. And still more important to us than scientific significance and literary worth is the inspirational impact those novels have on serious readers. Finally, happy reading and I hope you will find this book useful.

Ashley, 2022-02-15 Shortlisted for the Locus Science Fiction Foundation Non-Fiction Award 2023 The Rise of the Cyberzines concludes Mike Ashley's five-volume series, which has tracked the evolution of the science-fiction magazine from its earliest days in the 1920s to its current explosion via the internet. This series has traced the ways in which the science-fiction magazine has reacted to the times and often led the way in breaking down barriers, for example in encouraging a greater contribution by women writers and stimulating science fiction globally. Magazines have continued to build upon past revolutions such as the 'new wave' and 'cyberpunk', producing a blend of high-tech science fiction and expansive speculative fiction that has broadened the understanding of science and its impact on society. This final volume, which covers the years 1991-2020, shows how the online magazine has superseded the print magazine and has continued to break down barriers, especially for the LGBTQ community and for writers of colour.
