The Musical World of Halim El-Dabh Denise A. Seachrist, 2003 Egyptian-born composer Halim El-Dabh has studied with the giants of 20th-century musical composition and conducting, including Leopold Stokowski, Irving Fine, and Leonard Bernstein. In the late 1950s El-Dabh worked with electronic music pioneers Otto Luening and Vladimir Ussachevsky at the Columbia-Princeton Electronic Music Center. He was commissioned by choreographer and modern dance innovator Martha Graham to write the music for Clytemnestra and Lucifer. Although this biography focuses on his career from his arrival in the US in 1950 to his retirement from the faculty of Kent State University in 1991, his life in Egypt, its influence on him musically, and his creative life after retirement is also covered. In March 2002 El-Dabh presented a concert of his electronic and electro-acoustic works and three concerts of his orchestral chamber music in collaboration with the Bibliotheca Alexandrina String Orchestra at the Bibliotheca Alexandrina (the famous Library of Alexandria of antiquity). The accompanying CD features excerpts of this programme.

Climate and Anthropogenic Impacts on Earth Surface Processes in the Anthropocene Achim Beylich, Daniel Vázquez Tarrío, Dongfeng Li, Marc Oliva, Mario Morellón Marteles, 2024-10-03 *Climate and Anthropogenic Impacts on Earth Surface Processes in the Anthropocene* outlines our current understanding of the effects of ongoing and accelerated environmental changes on Earth surface processes and details the systematic and quantitative methodology on the actual drivers of these processes. This book covers various geomorphological process domains and a wide range of terrestrial surface environments on Earth. It provides a broad spectrum of advanced techniques and methods of data collection and generation, together with various approaches and methods of data analysis and geomorphologic modelling. This book is a valuable resource for upper-level undergraduates, graduates, and academics studying Earth surface processes, as well as researchers and professionals in needing a comprehensive overview of Earth surface process change and influence during the Anthropocene - Comprehensively covers climatic and anthropogenic drivers of earth surface processes, including detection and quantification techniques - Includes the latest research and suggestions for adapted and sustainable mitigation and

management strategies - Includes worked examples and case studies of anthropogenic and climate influences on Earth surface processes

American Arabesque Jacob Rama Berman, 2012-06-11 Part of the American Literatures Initiative Series American Arabesque examines representations of Arabs, Islam and the Near East in nineteenth-century American culture, arguing that these representations play a significant role in the development of American national identity over the century, revealing largely unexplored exchanges between these two cultural traditions that will alter how we understand them today. Moving from the period of America's engagement in the Barbary Wars through the Holy Land travel mania in the years of Jacksonian expansion and into the writings of romantics such as Edgar Allen Poe, the book argues that not only were Arabs and Muslims prominently featured in nineteenth-century literature, but that the differences writers established between figures such as Moors, Bedouins, Turks and Orientals provide proof of the transnational scope of domestic racial politics. Drawing on both English and Arabic language sources, Berman contends that the fluidity and instability of the term Arab as it appears in captivity narratives, travel narratives, imaginative literature, and ethnic literature simultaneously instantiate and undermine definitions of the American nation and American citizenship.

The Blues Chris Thomas King,2021-06-08 A fresh new perspective that will be a true revolution to readers and will open new lines of discussion on . . . the importance of the city of New Orleans for generations to come. —Dr. Michael White, jazz clarinetist, composer, and Keller Endowed Chair at Xavier University of LA An untold authentic counter-narrative blues history and the first written by an African American blues artist All prior histories on the blues have alleged it originated on plantations in the Mississippi Delta. Not true, says author Chris Thomas King. In *The Blues*, King present facts to disprove such myths. This book is the first to argue the blues began as a cosmopolitan art form, not a rural one. As early as 1900, the sound of the blues was ubiquitous in New Orleans. The Mississippi Delta, meanwhile, was an unpopulated sportsman's paradise—the frontier was still in the process of being cleared and drained for cultivation.? Expecting these findings to be controversial in some circles, King has buttressed his conclusions with primary sources and years of extensive research, including a sojourn to West Africa and interviews with surviving folklorists and blues researchers from the 1960s folk-rediscovery epoch.? New Orleans, King states, was the only place in the Deep South where the sacred and profane could

party together without fear of persecution, creating the blues.

Principles of Water Resources Thomas V. Cech,2018-04-03 Proper management of water resources can take many forms, and requires the knowledge and expertise to work at the intersection of mathematics, geology, biology, geography, meteorology, political science, and even psychology. This book provides an essential foundation in water management and development concepts and practices, dissecting complex topics into short, understandable explanations that spark true interest in the field. Approaching the study of water resources systematically, the discussion begins with historical perspective before moving on to physical processes, engineering, water chemistry, government regulation, environmental issues, global conflict, and more. Now in its fourth edition, this text provides the most current introduction to a field that is becoming ever more critical as climate change begins to threaten water supplies around the world. As geography, climate, population growth, and technology collide, effective resource management must include a comprehensive understanding of how these forces intermingle and come to life in the water so critical to us all.
