10 Pieces of Music You Should Listen to at Least Once in Your Life Jacopo Caneva, 2015-07-30 Welcome to this ramble through music: background notes unfold, little by little, amazingly and touchingly. Our guide is the young Jacopo Caneva, who puts forward a personal selection of musical extracts for a first listening experience, analysing them with the passion and competence of a teenager who loves and practises music. This is where authors meet, with different styles and historical backgrounds, sharing the will to be revolutionary and ahead of their time. A journey that winds from Mussorgsky to Berlioz, from Debussy to Handel, Danny Elfman and Joe Hisaishi, some of the most beloved composers of two great film directors of our time, Tim Burton and Hayao Miyazaki. *10 Pieces of Music You Should Listen to at Least Once in Your Life* is a book you will take with you as an essay on music. Enjoy the read and the listen.

Joe Hisaishi's Soundtrack for My Neighbor Totoro Kunio Hara, 2020-02-06 *My Neighbor Totoro* is a long-standing international icon of Japanese pop culture that grew out of the partnership between the legendary animator Miyazaki Hayao and the world-renowned composer Joe Hisaishi. A crucial step in the two artists' collaboration was the creation of the album, *My Neighbor Totoro: Image Song Collection*, with lyrics penned by Miyazaki and Nakagawa Rieko, a famed children's book author, and music composed by Hisaishi. The album, released in 1987 prior to the opening of the film, served not only as a promotional product, but also provided Miyazaki with concrete ideas about the characters and the themes of the film. This book investigates the extent to which Hisaishi's music shaped Miyazaki's vision by examining the relationship between the images created by Miyazaki and the music composed by Hisaishi, with special emphasis on their approaches to nostalgia, one of the central themes of the film.

The Green Hill Sophie Pierce, 2023-03-02 In 2017, Sophie Pierce's life changed forever when her twenty-year-old son Felix died suddenly and unexpectedly. Thrown into an unimaginable new reality, she had to find a way to survive. By writing letters to Felix – composed during walks and swims taken close to his burial place by the River Dart – Sophie gradually learned how to live in the landscape of sudden loss, navigating the weather and tides of grief. *The Green Hill* collects these letters alongside Sophie's account of the years following Felix's death, into which she weaves poignant memories of his life. What results is a deeply moving, beautifully captured record of how – amid the rivers and rocks of Dartmoor, and in the sea off the South Devon coast – Sophie was able to hold on to and nurture her bond with Felix, both in her mind and through a

physical engagement with the landscape: actively mourning, rather than grieving. This book is a celebration of the natural world and the role it plays in our lives and relationships, as well as an examination of how beauty, a sense of place and the passing seasons can help us contend with our own mortality. Above all, *The Green Hill* is one woman's story of navigating through trauma and loss, and towards a fragile, complicated kind of joy. 'In *The Green Hill*, Sophie Pierce writes about the sudden death of her son Felix with an aching and gentle honesty. Struggling to come to terms with the loss not only of the young man he was, but everything that he would eventually become, she finds herself overwhelmed not only by grief, but also by love. Her writing is illuminated by a remarkable attention to the beauty and consolation of the natural world, and by the wisdom and tenderness which has been so painfully acquired. This is a book that will be a great comfort to those who need it' Sarah Perry, author of *The Essex Serpent* and *Melmoth* 'Unforgettable, necessary. This beautiful book is a map, compass and ration of courage for anyone arrived in the landscape of sudden loss. Full of love and learning' Tanya Shadrick 'The Green Hill is an extraordinary book... I thought of the fairy tale in which a captured princess must weave clothes from stinging nettles: Sophie Pierce has wrought something beautiful and useful from the darkest pain' Cressida Connolly, novelist and critic

Persistent Homology and Discrete Fourier Transform Victoria Callet-Feltz, 2025-07-02 This book proposes contributions to various problems in the field of topological analysis of musical data: the objects studied are scores represented symbolically by MIDI files, and the tools used are the discrete Fourier transform and persistent homology. The manuscript is divided into three parts: the first two are devoted to the study of the aforementioned mathematical objects and the implementation of the model. More precisely, the notion of DFT introduced by Lewin is generalized to the case of dimension two, by making explicit the passage of a musical bar from a piece to a subset of $\mathbb{Z}/t\mathbb{Z} \times \mathbb{Z}/p\mathbb{Z}$, which leads naturally to a notion of metric on the set of musical bars by their Fourier coefficients. This construction gives rise to a point cloud, to which the filtered Vietoris-Rips complex is associated, and consequently a family of barcodes given by persistent homology. This approach also makes it possible to generalize classical results such as Lewin's lemma and Babitt's Hexachord theorem. The last part of this book is devoted to musical applications of the model: the first experiment consists in extracting barcodes from artificially constructed scores, such as scales or chords. This study leads naturally to song harmonization process, which reduces a song to its melody and chord grid, thus defining the notions of graph and complexity of a piece. Persistent homology also lends itself to the problem of automatic classification of musical style, which will be treated here under the prism of symbolic descriptors given by statistics calculated directly on barcodes. Finally, the last application proposes an encoding of musical bars based on the Hausdorff distance, which leads to the study of musical textures. The book is addressed to graduate students and researchers in mathematical music theory and music information research, but also at researchers in other fields, such as applied mathematicians and topologists, who want to learn more about mathematical

music theory or music information research.

Essential Cinema Jonathan Rosenbaum, 2004-04-27 A cogent and provocative argument about the art of film, Essential Cinema is a fiercely independent reference book of must-see movies for film lovers everywhere.

Jacopo Caneva's Miyazaki Jacopo Caneva, 2014-08-04 Now the readers can enjoy a monograph about one of the most amazing authors of the contemporary era, Hayao Miyazaki, and written by a great fan and expert of his cinema and his art. After his review on Tim Burton's work, the young Jacopo Caneva faces the cinema and the music by Miyazaki and the most important production house for animated movies (called anime in Japanese) of the world, Studio Ghibli. This team has produced masterpieces such as Spirited Away, Howl's Moving Castle and My Neighbour Totoro. Its last production Kaze tachinu (The Wind Rises) surprised the audience at the Venice Film Festival and made a whole country talk about topics like peace and war. Miyazaki's cinema is a combination of ecologism, pacifism, anti-fascism, strong female characters and considerations about the future of humanity: a mix that could be found only in works by great authors, such as Charlie Chaplin. The young Jacopo Caneva present his peculiar style in describing the movies thorough the music, which has been mostly composed by Joe Hisaishi. The music is mainly based on piano compositions and emotional orchestra music that hangs between West and East, minimalism and romanticism. Music confers a new dimension to the extraordinary visions of Miyazaki and the other directors from Studio Ghibli; this dimension can live and triumph only in the animated world, which represent the cinematic form par excellence. A book you can't miss if you are a fan of one of the directors who marked the history of cinema.
