International Corporate Law - Volume 2 2002 Fiona Macmillan, 2003-05-30 This book contains essays and country reports from across the globe in the area of international and comparative corporate law.

The Conflict of Laws Adrian Briggs, 2019-10-24 This invaluable introduction to the study of the conflict of laws provides a survey and analysis of the rules of private international law as they apply in England. Written to take account of the various possible outcomes of the Brexit process, it goes as far as is possible to make sense of the effect it will have on English private international law. The volume covers general principles, jurisdiction, and the effect of foreign judgments; the law applicable to contractual and non-contractual obligations, the private international law of property, of adults (the increasingly complex law of children is described in bare outline), and of corporations. It does so in a manner which explains and illuminates the principles which underpin the subject in a clear and coherent fashion, as the wealth of literature, case law, and legislation can often obscure the architecture of the subject and unnecessarily complicate its study. This new edition organizes the existing material in light of European legislation on private international law, reflecting the way in which an accurate representation of the topic requires it to be interpreted as European law with a common law periphery, instead of common law with European legislative influences. As at the time of writing - and possibly for some time to come - the consequences of Brexit are a mystery, but the attempt is made to describe the various possible shapes which the subject will assume in the future. The book adopts a pragmatic approach and avoids the more abstract theory; as the theory of the conflict of laws is actually to be found in and by applying the legislation and jurisprudence to the cases and issues which arise in private international litigation and in giving legal advice.

Multinational Enterprises and Tort Liabilities Muzaffer Eroglu, 2008-01-01 This book conducts an interdisciplinary and comparative examination of tort liabilities of multinational enterprises (MNEs). It examines the social, economic, managerial and legal characteristics of MNEs and compares the findings of this examination to the current understanding of MNEs in the way that tort liability is applied to them. Existing laws and principles related to liability of MNEs are explored from a variety of jurisdictions with the aim of assessing whether these laws are adequate for the challenges that modern MNEs create. Muzaffer Eroglu also proposes solutions to the problems of tort liability of MNEs. Comparing the theory of control in existing laws and the theory of control in business management structure, Multinational Enterprises and Tort Liabilities will

be of great interest to academics, researchers, students and practitioners. It will also appeal to NGOs particularly interested with the liabilities of MNEs for their human rights breaches.

Collier's Conflict of Laws Pippa Rogerson, 2013-06-06 This reworked version of Conflict of Laws introduces a new generation of students to the classic. It has been completely rewritten to reflect all the recent developments including the increased legislation and case law in the field. The author's teaching experience is reflected in her ability to provide students with a clear statement of rules which sets out a framework to the subject, before adding detail and critical analysis. Recognising that the procedural aspect of the subject challenges most students, the book explores conflict of laws in its practical context to ensure understanding. Teachers will appreciate the logical structure, which has been reworked to reflect teaching in the field today. Retaining the authority that was the hallmark of the previous edition, this contemporary and comprehensive textbook is essential reading.
