Taj Mahal Giles Tillotson, 2010-10-01 'Marble enigma, most photographed of structures, the Taj Mahal lends its name to a prime brand of Indian tea bags and stands too as the world's great, extravagant monument to eternal love. This wry, brisk book is a delightful and fascinating excavation of the Taj Mahal's many layers of meanings. Giles Tillotson deploys his formidable knowledge of India's artistic and cultural history to create a kaleidoscopic interpretation of the Taj - revealing what it meant to the Mughal world that conceived and built it; to the British colonists who cavorted amidst its grounds and minarets, then set about to preserve it; and to the many millions who now come every year to gawp and touch and click. With delicacy, creation, and yet succeeds in keeping its unworldly aura intact.' Sunil Khilnani, author of *The Idea of India*

Architecture of Mughal India Catherine B. Asher,1992-09-24 In *Architecture of Mughal India* Catherine Asher presents the first comprehensive study of Mughal architectural achievements. The work is lavishly illustrated and will be widely read by students and specialists of South Asian history and architecture as well as by anyone interested in the magnificent buildings of the Mughal empire.

Taj Mahal and Its Conservation D. Dayalan,2009 A miracle in marble! A dream in marble! A poem! Lavishly praised by countless critics, connoisseurs and commoners, the Taj Mahal has stayed as one of the world's architectural wonders ever since the day of its completion in 1648. And is unmistakably one of the outstanding creations in the whole spectrum of Islamic architecture in India. For its richness, evocative aesthetic appeal and prodigiousness, it counts among man's proudest creations. This magnificent mausoleum, built by the Mughal Emperor Shahjahan to memorialize his love for the queen, took seventeen years to complete. Even if the contemporary sources refer to this most exquisite specimen of human architecture as *Illuminated Tomb* (*rauza-i-munavvara*), it is popularly known as Taj Mahal, obviously deriving its name from the title of the queen: Mumtaz Mahal. The Taj is not just architecture, but, in Sir Arnold Edwin's word, the proud passion of an Emperor's love. It is love made tangible, crystallized. Volumes have been written on the monument. And language has been almost exhausted in its praise. This book, yet another addition to the numerous writings on the Taj, is one of the very few scientific, at once authentic documentation of the art, architecture and conservation of this truly impressive creation. It is the first systematic account of the Taj Mahal and its conservation since mid-17th century. Focusing, simultaneously, on the diverse architectural components of this unique mausoleum, it examines the tradition and style adopted by its architects. The outcome of the author's close, personal observation of the monument, the book also brings out various scientific studies relating to its structural stability, the nature of its foundations and building materials, verticality of its minarets, and several other aspects. The book is enriched with many exquisite photographs all in colour. Dr D. Dayalan is Superintending Archaeologist, Archaeological Survey of India, Agra Circle, Agra.

The Taj Mahal Lesley A. DuTemple,2003-01-01 Recounts the history of the creation of the Taj Mahal, built as a tomb and memorial for the wife of the Mughal emperor Shah Jahan.

Taj Mahal Mohan C. Joshi,Amina Okada,1993-10-19 A sumptuously illustrated portrait of perhaps the most fascinating architectural marvel of all time. Built between 1632 and 1643 by the Mughal emperor Shah Jahan in honor of his deceased wife Mumtaz Mahal, the Taj Mahal is unquestionably the most renowned mausoleum in the world. Now this legendary monument to love can be seen as no visitor to the site has ever viewed it. On the pages of this exquisitely illustrated volume, the Taj Mahal is revealed detail by detail. Starting inside the mausoleum, a sequence of closeups show the semiprecious stones, inlaid in white marble, that form the interior's Koranic calligraphy and floral patterns. The next sequence of images presents the octagonal plan of the structure, emphasizing both its perfect symmetry and its subtle variations. The final

sequence is devoted to the decorative patterns carved in the walls of the mosque and entrance gate. In addition, four lavish fold-out photographs show the entire Taj Mahal complex from different perspectives. In their informative texts, authors Amina Okada and M.C. Joshi provide historical and architectural analyses of the Taj Mahal. Quotations from the Koran and from the journals of travelers as diverse as Jean-Bapiste Tavernier, Pierre Loti, and Aldous Huxley complete a breathtaking tribute.

The Taj Mahal Ajay Nath, Prof Nath, 2020-05-31 It studies history, architecture, art, archaeology and aesthetics of the Taj Mahal. Attempt has been made to give almost complete facts and figures related to its site, land, environment, lay-out, placement, foundation, plan, design, garden, water-devices, drainage, architecture and ornamentation, inscriptions, constructional modes and techniques, polish, measurements, builders, material and costs, in separate chapters. Chapters on 'Third set of Real Graves, ' 'Taj Mahal is sinking into the river ?', 'Taj Mahal was offered for sale ?' and 'Chastity of the Taj Mahal' deal with other important aspects of its history and architecture. Visual as is the subject, the text is illustrated by 52 figures (drawings, diagrams and sketches) and 10 + 47 plates (photographs and digital images). A list of technical terms, unavoidably used in the text, and a chronology of the events related to the Taj Mahal have also been given. Though based on a life-time's study of the subject, and essentially a research work, it is written in a simple readable form without diacritical marks, or other research jargon, for the laymen, tourists and the general readers, as well as for the scholars, historians, archaeologists and practising architects for whom too it has useful and authentic data which may not be available otherwise. We fondly hope, this shall be a standard work on the Taj Mahal which all those interested in this subject will not only read, but will also like to possess, for a life-time. Through meticulously researched chapters, the book examines the historical context in which the Taj Mahal was conceived, highlighting the fusion of Persian, Islamic, and Indian influences that defined Mughal architecture. It also tells the story of Ustad Ahmad Lahauri, the visionary architect behind the Taj Mahal, whose genius shaped one of the greatest architectural feats in history. The book delves into the painstaking details of the craftsmanship involved in the Taj Mahal's construction, from its intricate inlay work to its perfect symmetry and geometric precision. It also explores the symbolism of the monument's layout and gardens, which reflect Islamic visions of paradise. Moreover, it traces the Taj Mahal's transformation from a personal tribute to an enduring global symbol, following its journey through the decline of the Mughal Empire, periods of neglect and restoration, and its place in popular culture today. *Monument of Love: The True History behind the Taj Mahal* is a rich and engaging exploration of one of the world's greatest monuments.
