Fire and Snow Marc DiPaolo,2018-07-11 Fellow Inklings J. R. R. Tolkien and C. S. Lewis may have belonged to different

branches of Christianity, but they both made use of a faith-based environmentalist ethic to counter the mid-twentieth-century's triple threats of fascism, utilitarianism, and industrial capitalism. In *Fire and Snow*, Marc DiPaolo explores how the apocalyptic fantasy tropes and Christian environmental ethics of the Middle-earth and Narnia sagas have been adapted by a variety of recent writers and filmmakers of climate fiction, a growing literary and cinematic genre that grapples with the real-world concerns of climate change, endless wars, and fascism, as well as the role religion plays in easing or escalating these apocalyptic-level crises. Among the many other well-known climate fiction narratives examined in these pages are *Game of Thrones*, *The Hunger Games*, *The Handmaid's Tale*, *Mad Max*, and *Doctor Who*. Although the authors of these works stake out ideological territory that differs from Tolkien's and Lewis's, DiPaolo argues that they nevertheless mirror their predecessors' ecological concerns. The Christians, Jews, atheists, and agnostics who penned these works agree that we all need to put aside our cultural differences and transcend our personal, socioeconomic circumstances to work together to save the environment. Taken together, these works of climate fiction model various ways in which a deep ecological solidarity might be achieved across a broad ideological and cultural spectrum. Reimagining Science Fiction Gary Westfahl, 2025-10-31 In the first decades of the twenty-first century, science fiction literature has been transformed in many ways, as the genre has reacted to the dominating influence of films, television, and video games, the growing popularity of fantasy, the rise of young adult science fiction and graphic novels, the impact of the internet and social media, and the increasing diversity of the authors, characters, and often non-Western settings. The essays making up this volume address these and other changes in two ways. Some consider new critical approaches to science fiction in response to changing circumstances, including analyses of how evolutionary psychology explains today's science fiction, the emerging subgenre of cli-fi exploring the effects of climate change, the use of science fiction in different areas of the college curriculum, and a statistical method for identifying works of science fiction. Others examine significant new authors such as Nalo Hopkinson, Charles Stross, Paolo Bacigalupi, Suzanne Collins, Mira Grant, John Sandford, and David Mura. Contributors include science fiction author Howard V. Hendrix and experts in the fields of Chinese studies, gender studies, literature, philosophy, and religion.

Promotional Screen Industries Paul Grainge, Catherine Johnson, 2015-03-27 From the trailers and promos that surround film and television to the ads and brand videos that are sought out and shared, promotional media have become a central part of contemporary screen life. *Promotional Screen Industries* is the first book to explore the sector responsible for this

thriving area of media production. In a wide-ranging analysis, Paul Grainge and Catherine Johnson explore the intermediaries – advertising agencies, television promotion specialists, movie trailer houses, digital design companies – that compete and collaborate in the fluid, fast-moving world of promotional screen work. Through interview-based fieldwork with companies and practitioners based in the UK, US and China, *Promotional Screen Industries* encourages us to see promotion as a professional and creative discipline with its own opportunities and challenges. Outlining how shifts in the digital media environment have unsettled the boundaries of ‘promotion’ and ‘content’, the authors provide new insight into the sector, work, strategies and imaginaries of contemporary screen promotion. With case studies on mobile communication, television, film and live events, this timely book offers a compelling examination of the industrial configurations and media forms, such as ads, apps, promos, trailers, digital shorts, branded entertainment and experiential media, that define promotional screen culture at the beginning of the twenty-first century.

Science Fiction, Fantasy, and Politics Dan Hassler-Forest, 2016-07-21 From Tolkien to Star Trek, from Game of Thrones to Battlestar Galactica, and from The Walking Dead to Janelle Monáe’s Afrofuturist concept albums, transmedia world-building offers us complex and immersive environments beyond capitalism. This book examines the ways in which these popular storyworlds offer tools for anticapitalist theory and practice. Building on Hardt and Negri’s theory of global capitalism, *Science Fiction, Fantasy, and Politics* shows how transmedia world-building has the potential of offering more than a momentary escape from capitalist realism in the age of media convergence and participatory culture. The book features eight fantastic storyworlds that offer vivid illustrations of global capitalism’s contradictory logic. Approaching transmedia world-building both as a cultural form and as a political economy, it demonstrates the limitations inherent in fandom and fan culture, which is increasingly absorbed as a form of immaterial labor. But at the same time, the book also explores the productive ways in which fantastic storyworlds contain a radical energy that can give us new ways of thinking about politics, popular culture, and anticapitalism.
