Modern Principles: Macroeconomics Tyler Cowen,2011-12-09 In a world full of economics blogs, Cowen and Tabarrok's Marginal Revolution (marginalrevolution.com) ranks is one of the Web's most popular and most respected. The same qualities that make the blog so distinctive are also behind the success *Modern Principles of Economics*—engaging authors, unbiased presentations of essential ideas, and a knack for revealing the “invisible hand” of economics at work. The thoroughly updated new edition of *Modern Principles* again draws on a wealth of captivating applications to show readers how economics shed light on business, politics, world affairs, and everyday life.

Frontier Gavin Serkin,2015-02-10 Get ahead of emerging markets with top-performer picks for up-and-comers *Frontier* helps investors successfully navigate markets that are yet to “emerge,” with expert advice on spotting opportunities and minimising risks. With first-hand insights into frontier markets as we travel with big-name fund managers from Mark Mobius to Morgan Stanley, this practical guide ranks countries, stocks and bonds on a five- to ten-year horizon to steer investors toward the most promising destinations. Written in a compelling and accessible travelogue narrative, each chapter covers a specific country, providing invaluable market analysis and a deep understanding of the political, economic, and social background of those most likely to outperform. The key focus is on fresh ideas, based on the assessments from top performing money managers when meeting challenges, hostilities or adversity, and observations after interviewing high-level government officials and executives. With advanced economies shackled by debt and sluggish growth, investors are increasingly turning to emerging markets for better returns. Yet the money managers who came out on top in China, India, and Brazil are now focusing their attention on markets that have not yet emerged. This book applies the perspective of ten of the most successful fund managers in their field, providing an unparalleled guide to assessing investment potential in places better known for conflict, poverty and corruption. · Discover which markets have the best prospects, and which are potential disasters · Analyse individual markets by metrics including macro data, global relative value comparisons of stocks and bonds, buy/ sell triggers, and more · Learn which industries, stocks and bonds should be considered in each market · Examine each country through real-life on-the-ground assessment of corruption, conflict and other risks as well as inspirational breakthroughs that signal opportunities This is a practical manual for all investors - whether students or professionals - wanting to get to know the most promising new markets while avoiding the pitfalls. A must-read for corporate

executives seeking global capital, Frontier provides a better understanding of the changing international investment dynamic. Robin Wigglesworth, FT: "Invaluable." Mark Mobius, Templeton: "I love it! Beautiful descriptive writing." Aliko Dangote, Wealthiest African: "Captivating tales, masterly woven."

Aspects of Modern Monetary and Macroeconomic Policies Philip Arestis, Eckhard Hein, E. Le Heron, 2007-06-07 Over the last thirty years or so the developments in the area of monetary and macroeconomic policies have been quite substantial. Within the new consensus macroeconomics (NCM), monetary policy is upgraded while fiscal policy is downgraded. This new monetary policy has been the main instrument of policy under the guise of inflation targeting, an approach pursued by a number of central banks worldwide. There are a number of problems relating to this new monetary and macroeconomic policy approach which are raised in this book.

The Nobel Factor Avner Offer, Gabriel Söderberg, 2019-11-19 Economic theory may be speculative, but its impact is powerful and real. Since the 1970s, it has been closely associated with a sweeping change around the world--the market turn. This is what Avner Offer and Gabriel Soderberg call the rise of market liberalism, a movement that, seeking to replace social democracy, holds up buying and selling as the norm for human relations and society. Our confidence in markets comes from economics, and our confidence in economics is underpinned by the Nobel Prize in Economics, which was first awarded in 1969. Was it a coincidence that the market turn and the prize began at the same time? The Nobel Factor, the first book to describe the origins and power of the most important prize in economics, explores this and related questions by examining the history of the prize, the history of economics since the prize began, and the simultaneous struggle between market liberals and social democrats in Sweden, Europe, and the United States. The Nobel Factor tells how the prize, created by the Swedish central bank, emerged from a conflict between central bank orthodoxy and social democracy. The aim was to use the halo of the Nobel brand to enhance central bank authority and the prestige of market-friendly economics, in order to influence the future of Sweden and the rest of the developed world. And this strategy has worked, with sometimes disastrous

results for societies striving to cope with the requirements of economic theory and deregulated markets

Preserving the Promise Scott Dessain, Scott E. Fishman, 2016-10-05 *Preserving the Promise: Improving the Culture of Biotech Investment* critically examines why most biotech startups fail, as they emerge from universities into an ecosystem that inhibits rather than encourages innovation. This Valley of Death squanders our public investments in medical research and with them, the promise of longer and healthier lives. The authors explicate the Translation Gap faced by early stage biotech companies, the result of problematic technology transfer and investment practices, and provide specific prescriptions for improving translation of important discoveries into safe and effective therapies. In *Preserving the Promise*, Dessain and Fishman build on their collective experience as company founders, healthcare investor (Fishman) and physician/scientist (Dessain). The book offers a forward-looking, critical analysis of conventional wisdom that encumbers commercialization practices. It exposes the self-defeating habits of drug development in the Valley of Death, that waste money and extinguish innovative technologies through distorted financial incentives. - Explains why translation of biotech discovery into medicine succeeds so infrequently that it's been dubbed the Valley of Death - Uncovers specific decision-making strategies that more effectively align incentives, improving clinical and financial outcomes for investors, inventor/entrepreneurs, and patients - Examines the critical, early stages of commercialization, where technology transfer offices and Angels act as gatekeepers to development, and where tension between short-term financial and long-term clinical aspirations sinks important technologies - Deconstructs the forces driving biotech, recasts them in a proven conceptual framework, and offers practical guidance for making the system better

Loose-Leaf Version for Modern Principles: Macroeconomics Tyler Cowen, Alex Tabarrok, 2020-09-02

Modern Principles of Macroeconomics Tyler Cowen, Alex Tabarrok, 2017-12-22 The title, *Modern Principles*, refers to a progressive approach to economic modeling and applications that allows for more realistic interpretation of today's world events. Mirroring the authors' successful blog, the text eschews boxed features to focus on the writing behind compelling examples, key concepts, and applications. An emphasis on incentives underscores how economics is about human behavior and how economics helps us understand why we do what we do (in other words, the decisions we make in the face of incentives in the real world). Covers of the franchise titles feature multiple hands to emphasize the power of the Invisible Hand, a key economic concept that refers to the power of incentives (and was coined by Adam Smith).

Modern Principles of Economics Tyler Cowen, Alex Tabarrok, 2024-01-03 Working toward developing your economic way of thinking, Cowen and Tabarrok focus on modern content and modern delivery, teaching economics in a way that makes it more memorable for you.

Modern Principles of Macroeconomics Tyler Cowen,2010

Methods Versus Substance Cristina Fuentes-Albero,2009 Abstract: In this paper, we employ both calibration and modern (Bayesian) estimation methods to assess the role of neutral and investment-specific technology shocks in generating fluctuations in hours. Using a neoclassical stochastic growth model, we show how answers are shaped by the identification strategies and not by the statistical approaches. The crucial parameter is the labor supply elasticity. Both a calibration procedure that uses modern assessments of the Frisch elasticity and the estimation procedures result in technology shocks accounting for 2% to 9% of the variation in hours worked in the data. We infer that we should be talking more about identification and less about the choice of particular quantitative approaches
