Nicene and Post-Nicene Fathers: First Series, Volume IV St. Augustine: The Writings Against the Manichaeans, and Against the Donatists Philip Schaff, 2007-05-01 The Council of Nicaea in 325 AD marked the beginning of a new era in Christianity. For the first time, doctrines were organized into a single creed. The Nicene and Post-Nicene Fathers did most of their writing during and after this important event in Church history. Unlike the previous era of Christian writing, the Nicene and Post-Nicene era is dominated by a few very important and prolific writers. In Volume IV of the 14-volume collected writings of the Nicenes and Post-Nicenes (first published between 1886 and 1889), readers will find Augustines writings defending the Catholic church against the Manichaeans and the Donatists. Manichaeism was a religion developed in Persia by the prophet Mani. According to this religion, creation has two parts: darkness and light. Light is God and has ten attributes. Opposing this, and coeternal with it, is darkness and its five attributes. Saint Augustine was originally a Manichaean, so his defense of Christianity against this religion comes from a deep understanding of its nature. Donatists were a group of believers who refused to forgive those who had renounced their faith during a time of persecution, which caused a schism in Christianity. In opposing these men, Augustine attempted to mend the rift. Those with an interest in ancient religions will find Augustines writings on Manichaeism one of the most important historical records of that religions practices.

Fools' Gold Philippa Gregory, 2014-02-11 All that glitters may well be gold in the third book in the Order of Darkness

series from #1 New York Times bestselling author Philippa Gregory. Tasked to expose a coin counterfeiting scheme, Luca and Isolde travel to Venice just in time for Carnival. Amid the masks, parties, and excitement, the romantic attraction between the two reaches a new intensity that neither can deny. Their romance is interrupted by the arrival of the alchemist, who may be the con artist they've been looking for. But as Luca starts to investigate the original charge, the alchemist reveals his true goal—he plans to create the Philosopher's Stone, a mystical substance said to be capable of turning base metals into gold and producing the elixir of life. With pounds of undocumented gold coins and an assistant who claims to be decades older than she appears, all evidence points to the possibility that the alchemist has succeeded in his task. But as Luca and Isolde get closer to the truth, they discover that reality may be more sinister than they ever could have imagined.
