*Façade Design*, 2024-01-24 Façade design is a challenging task, in which multidisciplinary issues and aspects should be optimally considered and addressed. This is especially the case of building façades exposed to seismic events, impacts, or fire. Special attention and major efforts are required for the detection and application of new technologies in the generation of modern, adaptive façade systems. This book presents a selection of research contributions to provide a comprehensive overview of façade design. It discusses the experimental analysis and numerical investigation of existing or traditional façades, as well as the development and optimal application of new technologies for modern adaptive façades and building envelopes.

*Anime* Rayna Denison, 2015-10-22 Anime: A Critical Introduction maps the genres that have thrived within Japanese animation culture, and shows how a wide range of commentators have made sense of anime through discussions of its generic landscape. From the battling robots that define the mecha genre through to Studio Ghibli's dominant genre-brand of plucky shojo (young girl) characters, this book charts the rise of anime as a globally significant category of animation. It further thinks through the differences between anime's local and global genres: from the less-considered niches like nichijō-kei (everyday style anime) through to the global popularity of science fiction anime, this book tackles the tensions between the markets and audiences for anime texts. Anime is consequently understood in this book as a complex cultural phenomenon: not simply a "genre," but as an always shifting and changing set of texts. Its inherent changeability makes anime an ideal contender for global dissemination, as it can be easily re-edited, translated and then newly understood as it moves through the world's animation markets. As such, *Anime: A Critical Introduction* explores anime through a range of debates that have emerged around its key film texts, through discussions of animation and violence, through debates about the cyborg and through the differences between local and global understandings of anime products. *Anime: A Critical Introduction* uses these debates to frame a different kind of understanding of anime, one rooted in contexts, rather than just texts. In this way, *Anime: A Critical Introduction* works to create a space in which we can rethink the meanings of anime as it travels around the world.

*Safety Protocols in the Food Industry and Emerging Concerns* Giovanni Gurnari, 2015-03-27 This brief reports about safety protocols in the food producing industry. Hygiene, i.e., the prevention of contamination and microbial infections, is of greatest importance in the industry, as are disinfection techniques, to prevent or to fight microbial contaminations and infections, and practical emerging concerns are centered around these fundamental concerns. The first part focuses on the attempts and possibilities to prevent microbial spreading. Part II discusses disinfection techniques and their risks, advantages and disadvantages. Current industry trends, such as the attempts to substitute chlorine in disinfection, are critically reviewed. In all, this brief volume discusses decision procedures and strategies that are being applied to prevent, reduce and fight microbial spreading. In particular, material that comes into contact with the foods, has to fulfill strict requirements. This aspect is explained in detail, and how little details can have great effects. The brief deals with the important question: is disinfection more an ally or an enemy?

**Transnational Musicians** Beata M. Kowalczyk, 2020-12-29 Informed by theories pertaining to transnational mobility, ethnicity and race, gender, postcolonialism, as well as Japanese studies, *Transnational Musicians* explores the way Japanese musicians establish their transnational careers in the hierarchically structured classical music world. Drawing on rich material from multi-sited fieldwork and in-depth interviews with Japanese artists in Japan, France and Poland, this study portrays the structurally – and individually – conditioned opportunities and constraints of becoming a transnational classical musician. It shows how transnational artists strive to conciliate the irreconcilable: their professional identification with the dominant image of ‘rootless’ classical musicianship and their ethnocultural affiliation with Japan. As such this book critically engages with the neoliberal discourse on talent and meritocracy prevailing in the creative/cultural industry, which promotes the common image of cosmopolitan artists, whose high, universal skills allow them to carry out their occupational activity internationally, regardless of such prescriptive criteria as gender, ethnicity and race. Highly interdisciplinary, this book will appeal to students and researchers interested in such fields as migration, transnational mobility, ethnicity and race in the creative/cultural sector, gender studies, Japanese culture and other related social issues. It will also be instructive for professionals from the world of classical music, as well as ordinary readers passionate about Japanese society.

**Cultural Capital and Parental Involvement** Siu-hang Kong, 2023-01-12 This book uses Pierre Bourdieu’s cultural capital model as a theoretical framework for exploring how students in Beijing and Hong Kong perceive parental influences—their parents’ cultural capital and support—on their participation in musical activities. By studying students’ perceptions of their parents’ cultural capital and support for their musical activities, this book revisits the applicability of

Bourdieu's cultural capital model in the contemporary Chinese context and reveals how inequality in terms of parental cultural capital governs parents' support and influences the intergenerational transmission of cultural capital, which in turn contributes to inequality in terms of students' cultural capital.

**Airplanes, the Environment, and the Human Condition** Hans A. Baer, 2019-07-23 The number of airplane flights worldwide continues to grow and is one of the many drivers of climate change. This book examines the aviation industry from an anthropological perspective, focusing on the sector's environmental impact and the challenges facing attempts to shift to more sustainable solutions. Hans Baer outlines how airplanes have become a key component of modern cultural and social life, and how the world system has become increasingly dependent on them to function. He critically examines current efforts to mitigate the climatic impact of the air travel and argues for a significant move away from air transport, suggesting that

such a shift may only be achieved through a more fundamental change in the world system.
