Descartes: An Intellectual Biography Stephen Gaukroger, 1995-03-30 René Descartes (1596-1650) is the father of modern philosophy, and one of the greatest of all thinkers. This is the first intellectual biography of Descartes in English; it offers a fundamental reassessment of all aspects of his life and work. Stephen Gaukroger, a leading authority on Descartes, traces his intellectual development from childhood, showing the connections between his intellectual and personal life and placing these in the cultural context of seventeenth century Europe. Descartes' early work in mathematics and science produced ground breaking theories, methods, and tools still in use today. This book gives the first full account of how this work informed and influenced the later philosophical studies for which, above all, Descartes is renowned. Not only were philosophy and science intertwined in Descartes' life; so were philosophy and religion. The Church of Rome found Galileo guilty of heresy in 1633; two decades earlier, Copernicus' theories about the universe had been denounced as blasphemous. To avoid such accusations, Descartes clothed his views about the relation between God and humanity, and about the nature of the universe, in a philosophical garb acceptable to the Church. His most famous project was the exploration of the foundations of human knowledge, starting from the proof of one's own existence offered in the formula Cogito ergo sum, 'I am thinking therefore I exist'. Stephen Gaukroger argues that this was not intended as an exercise in philosophical scepticism, but rather to provide Descartes' scientific theories, influenced as they were by Copernicus and Galileo, with metaphysical legitimation. This book offers for the first time a full understanding of how Descartes developed his revolutionary ideas. It will be welcomed by all readers interested in the origins of modern thought.

The Greek Anthology in Italy to the Year 1800 James Hutton, 1935

Descartes' Meditative Turn Christopher J. Wild, 2024-03-19 Why would René Descartes, the father of modern rationalist philosophy, choose meditations—a term and genre associated with religious discourse and practice—for the title of his magnum opus that lays the metaphysical foundations for his reform of all knowledge, including mathematics and sciences? Why did he believe that the immortality of the soul and the existence of God, which the Meditations on First Philosophy set out to demonstrate, can only be made self-evident through meditating? These are the questions that Christopher Wild's book answers. Descartes discovered the foundations of a marvelous science through a dramatic conversion in southern Germany in the winter of 1619. The spiritual and cognitive exercises, derived from ancient philosophy and the Christian meditative

tradition, which Descartes deployed in the *Meditations*, enable readers to discover metaphysical truths with the same degree of self-evidence with which Descartes did during his own conversion. Descartes' meditative turn, Wild argues, brings to a culmination a lifelong preoccupation with the practice or craft of thinking, known as Cartesian method. By joining meditation to method the *Meditations* becomes the founding document for a Cartesian art of turning, a new practice of both thought and life.

The Deepest Human Life Scott Samuelson, 2022-12-22 This accessible and thought-provoking introduction to philosophy shows how the eternal questions can shed light on our lives and struggles. These days, we generally leave philosophical matters to professional philosophers. Scott Samuelson thinks this is tragic, for our lives as well as for philosophy. In *The Deepest Human Life*, he restores philosophy to its proper place at the center of our humanity, rediscovering it as our most profound effort toward understanding, as a way of life that anyone can live. Exploring the works of some of history's most important thinkers in the context of the everyday struggles of his students, Samuelson guides readers through the most vexing quandaries of existence—and shows just how enriching the examined life can be. Samuelson begins at the beginning: with Socrates, and the method he developed for approaching our greatest mysteries. From there he embarks on a journey through the history of philosophy, demonstrating how it is encoded in our own personal quests for meaning. Through heartbreaking stories, humanizing biographies, accessible theory, and evocative interludes like *On Wine and Bicycles* or *On Zombies and Superheroes*, Samuelson invests philosophy with the personal and vice versa. The result is a book that is at once a primer and a reassurance—that the most important questions endure, coming to life in each of us. Winner of the 2015 Hiett Prize in the Humanities

Woman and Nature Susan Griffin, 2016-08-22 In this famously provocative cornerstone of feminist literature, Susan Griffin explores the identification of women with the earth—both as sustenance for humanity and as victim of male rage. Starting from Plato's fateful division of the world into spirit and matter, her analysis of how patriarchal Western philosophy and religion have used language and science to bolster their power over both women and nature is brilliant and persuasive, coming alive in poetic prose. Griffin draws on an astonishing range of sources—from timbering manuals to medical texts to Scripture and classical literature—in showing how destructive has been the impulse to disembodify the human soul, and how the long separated might once more be rejoined. Poet Adrienne Rich calls *Woman and Nature* perhaps the most extraordinary nonfiction work to have merged from the matrix of contemporary female consciousness—a fusion of patriarchal science, ecology, female history and feminism, written by a poet who has created a new form for her vision. ...The book has the impact of a great film or a fresco; yet it is intimately personal, touching to the quick of woman's experience.

Ausonius Decimus Magnus Ausonius, 1919

The Blank-Verse Tradition from Milton to Stevens Henry Weinfield, 2012-06-28 Blank verse, unrhymed iambic

pentameter, has been central to English poetry since the Renaissance. It is the basic vehicle of Shakespeare's plays and the form in which Milton chose to write *Paradise Lost*. Milton associated it with freedom, and the Romantics, connecting it in turn with freethinking, used it to explore change and confront modernity, sometimes in unexpectedly radical ways. Henry Weinfield's detailed readings of the masterpieces of English blank verse focus on Milton, Wordsworth, Shelley, Keats, Tennyson and Stevens. He traces the philosophical and psychological struggles underlying these poets' choice of form and genre, and the extent to which their work is marked, consciously or not, by the influence of other poets. Unusually attuned to echoes between poems, this study sheds new light on how important poetic texts, most of which are central to the literary canon, unfold as works of art.

Thirteen satires of Juvenal Juvenal, 1889

On Modern Origins Richard Kennington, 2004-01-01 Richard Kennington (1921-1999), a professor for many years at Pennsylvania State University and the Catholic University of America, was renowned for his insight in reading and teaching early modern philosophy. Although he published articles and spoke widely, never before have his writings been collected in a book. *On Modern Origins* deftly shows how modern thinkers assessed the errors of the classical tradition and established in its place a philosophy that fuses a new meaning of nature and of theory with humanitarian goals. This volume is an essential source for scholars seeking to understand the contemporary significance of the dawning of the modern era.

Ausonius: Introduction Decimus Magnus Ausonius, 1919 The surviving works of Ausonius (c. 310-c. 395 CE) include much poetry, notably *The Daily Round* and *The Moselle*. There is also an address of thanks to Gratian for the consulship. The stated aim of *Eucharisticus* by Paulinus Pellaueus (376-after 459 CE) is to give thanks for the guidance of providence in its author's life. Ausonius (Decimus Magnus), ca. 310-ca. 395 CE, a doctor's son, was born at Burdigala (Bordeaux). After a good education in grammar and rhetoric and a short period during which he was an advocate, he took to teaching rhetoric in a school which he began in 334. Among his students was Paulinus, who was afterwards Bishop of Nola; and he seems to have become some sort of Christian himself. Thirty years later Ausonius was called by Emperor Valentinian to be tutor to Gratian, who subsequently as emperor conferred on him honours including a consulship in 379. In 383, after Gratian's murder, Ausonius retired to Bordeaux. Ausonius's surviving works, some with deep feeling, some composed it seems for fun, some didactic, include much poetry: poems about himself and family, notably *The Daily Round*; epitaphs on heroes in the Trojan War, memorials on Roman emperors, and epigrams on various subjects; poems about famous cities and about friends and colleagues. *The Moselle*, a description of that river, is among the most admired of his poems. There is also an address of thanks to Gratian for the consulship.

The Dream of Descartes Gregor Sebba, 1987 The late Gregor Sebba was fond of describing his monumental *Bibliographia Cartesiana: A Critical Guide to the Descartes Literature, 1800-1960* as a by-product of his research begun in 1949 for an article he had in mind titled *The Dream of Descartes*. The bibliography has been indispensable to Descartes scholars since its appearance in 1964. When Sebba died in 1985, his manuscript for *The Dream of Descartes* was still unfinished. Here, with materials provided by Aníbal A. Bueño, Richard H. Popkin, and Helen Sebba, Richard A. Watson presents the completed work based on a 1973 draft, letters, outlines, and other manuscript material. The result is a fascinating analysis of Descartes' dreams as seminal in the creative process of genius.
