Statistics and Data Visualisation with Python Jesus Rogel-Salazar, 2023-01-31 This book is intended to serve as a bridge in statistics for graduates and business practitioners interested in using their skills in the area of data science and analytics as well as statistical analysis in general. On the one hand, the book is intended to be a refresher for readers who have taken some courses in statistics, but who have not necessarily used it in their day-to-day work. On the other hand, the material can be suitable for readers interested in the subject as a first encounter with statistical work in Python. Statistics and Data Visualisation with Python aims to build statistical knowledge from the ground up by enabling the reader to understand the ideas behind inferential statistics and begin to formulate hypotheses that form the foundations for the applications and algorithms in statistical analysis, business analytics, machine learning, and applied machine learning. This

book begins with the basics of programming in Python and data analysis, to help construct a solid basis in statistical methods and hypothesis testing, which are useful in many modern applications.

Additional learning tools: Contains "War Stories," offering perspectives on how data science applies in the real world Includes "Homework Problems," providing a wide range of exercises and projects for self-study Provides a complete set of lecture slides and online video lectures at www.data-manual.com Provides "Take-Home Lessons," emphasizing the big-picture concepts to learn from each chapter Recommends exciting "Kaggle Challenges" from the online platform Kaggle Highlights "False Starts," revealing the subtle reasons why certain approaches fail Offers examples taken from the data science television show "The Quant Shop" (www.quant-shop.com)

Engineering Psychology and Human Performance Christopher D. Wickens, Justin G. Hollands, Simon Banbury, Raja Parasuraman, 2015-08-20 Forming connections between human performance and design Engineering Psychology and Human Performance, 4e examines human-machine interaction. The book is organized directly from the psychological perspective of human information processing. The chapters generally correspond to the flow of information as it is processed by a human being--from the senses, through the brain, to action--rather than from the perspective of system components or engineering design concepts. This book is ideal for a psychology student, engineering student, or actual practitioner in engineering psychology, human performance, and human factors Learning Goals Upon completing this book, readers should be able to: * Identify how human ability contributes to the design of technology. * Understand the connections within human information processing and human performance. * Challenge the way they think about technology's influence on human performance. * show how theoretical advances have been, or might be, applied to improving human-machine interaction

Intelligent Product Management in the Era of Data Democratization: A BI-Centric Approach 2025 AUTHOR-1: SHIREESHA GORGILLI, AUTHOR-2: PROF DR PUNIT GOEL, PREFACE In the evolving landscape of digital product

management, data is no longer a support tool—it is the strategic core. Today’s product leaders are expected not just to build delightful features, but to make rapid, high-stakes decisions informed by real-time data, predictive insights, and collaborative intelligence. The rise of business intelligence (BI) and data democratization has shifted the way organizations think, operate, and scale. This book, “Intelligent Product Management in the Era of Data Democratization: A BI-Centric Approach—serves as a comprehensive guide to this transformation. Whether you’re a product manager navigating cross-functional dynamics, a data engineer embedding predictive analytics into product pipelines, or a business leader scaling governance framework, this book offers the tools, case studies, and frameworks to help you thrive in a BI-enabled world. Each chapter explores a foundational pillar of intelligent product management—from building a data-driven culture and integrating BI across lifecycles, to architecting intelligent metrics systems and deploying automation at scale. Chapter 1 introduces the foundational principles of data democratization, setting the stage for product teams to unlock data fluency and equitable access across roles. Chapter 2 emphasizes cultural transformation, where leadership plays a pivotal role in nurturing a decision-intelligent environment. Chapter 3 dives deep into the BI technology stack, guiding readers through platforms, pipelines, and self-service frameworks essential for modern data operations. Chapters 4 through 6 explore the integration of BI into daily product workflows, visualization best practices, and advanced analytics paradigms—highlighting both centralized and distributed models of control. Chapter 7 ventures into a specialized application of predictive intelligence: battery diagnostics—showing how machine learning revolutionizes lifecycle forecasting and anomaly detection in energy systems. As organizations move from insight to action, Chapters 8 to 10 illustrate the power of collaboration, automation, and role-based governance in driving excellence at scale. These sections provide detailed blueprints for aligning products, engineering, and data teams around shared metrics and objectives, while also reducing operational friction through embedded intelligence and automated experimentation. Finally, Chapter 11 synthesizes the book’s themes through a future-facing lens: designing an intelligent metrics architecture that scales with your product’s complexity and growth. It champions metric thinking not just as a measurement practice, but as a product design principle rooted in continuous learning and impact. This book is designed to be practical yet forward-looking, informed by real-world examples from high-growth companies, backed by research, and structured to serve both new and experienced professionals. In a world where decisions are product features, our aim is to equip you with the mindset and tools to lead boldly with intelligence, empathy, and data.
