Fat for Fuel Dr. Joseph Mercola, 2018-12-31 For over a century, we've accepted the scientific consensus that cancer results from genetic disease due to chromosomal damage in cell nuclei. But what if cancer isn't a genetic disease after all? What if scientists are chasing a flawed paradigm, and cancer isn't a disease of damaged DNA but rather of defective metabolism as a result of mitochondrial dysfunction? What if that startling truth could revolutionize our understanding of other diseases as well—and show us a radical new path to optimal health? In this groundbreaking guide, the first of its kind, New York Times best-selling author and leading natural-health practitioner Joseph Mercola explains how nearly all disease is caused by defective metabolic processes. Then he reveals what's really causing your metabolism to go haywire: damage and dysfunction in the mitochondria, thousands of which are at work in nearly every cell in your body, generating 90 percent of the energy you need to stay alive and well. When mitochondria become damaged in large numbers, it is impossible to stay healthy. Dr. Mercola shows you that you can take control of your health simply by giving your body the proper fuel—and it's not what you've likely been led to believe. A ketogenic diet, very low in carbohydrates and high in healthy fats, is the way to optimize the biochemical pathways that suppress disease and support healing. And the benefits can be astonishing—not only in treating or preventing serious illness, but in boosting your brainpower, increasing your energy, helping you lose weight and keep it off, and much more. As you read this book, you'll learn in clear, rational terms how your body works at a molecular level. You'll finally understand the type of fuel it's designed to burn in the most efficient way possible. You'll find detailed guidelines for starting and sticking with a ketogenic eating plan. And you won't have to wait a decade or two for metabolic mitochondrial therapy to make its way into the mainstream. You can build a healthier body and brain at the cutting edge of this exciting new discipline, starting right now.

BELIEVE DR. Susan Monias, 2025-08-04 When I received my MS diagnosis on May 9, 2011, my prognosis was that I would have five years until I was in a wheelchair and probably ten years until I died because of the disease. The disease causes the white brain matter, or the central nervous system, to be damaged or become "stripped," so it can no longer receive the messages of the brain or transfer them to the body. It is much like when an electrician strips a wire to conduct electricity from the outlet in the wall (the brain) to the light or object (the body). As this process in my body progressed, which I was told it would, over time, these would be the lasting effects. Anyone who knows me or how I think knows I would not accept this. I am VERY STUBBORN, believe in the body's ability to heal naturally (thanks to my upbringing), and I believe that if you think about what you want, it must come true (because that is what the Bible says). At the time of the diagnosis, I was 39 years old and just finishing my first year of chiropractic school. It was a second career choice after my husband and I simultaneously lost our jobs in 2008. I knew that if I didn't get back to school now, I never would. It had been a lifelong dream since I left school in 1991. So, I sat in my hospital bed alone after receiving the diagnosis and asked GOD, WHY??? WHY NOW? I finally had my life and career figured out, and now this? I clearly heard at that moment two things: 1. I wouldn't bring you anything you can't handle or get through. 2. You will be your first patient; you have to reverse this so you can help many others who will come to you for the answers. At that moment, I knew the Chiropractic philosophy "If you remove interference from the body, it will heal on its own." It became time to put this belief I had held my whole life to the ultimate test! My journey began with the absolute expectation that I would get through this and help more people once I succeeded! I bring you this story from the book, 'BELIEVE.' People must begin again to trust their bodies and the healing power that lives in them! Nothing on the outside, no medicine or surgery, can heal the body. Only you can. You need to

activate this healing from the inside out! This is the way I successfully reversed the debilitating symptoms and prognosis given to me with my MS diagnosis. On the book's first page, I would like to write a dedication to my family, friends, and doctors who saw me through to the other side. VERSE: Joshua 1:9 Says: "HAVE I NOT COMMANDED YOU? BE STRONG AND COURAGEOUS; be not afraid, neither be thou dismayed; for the LORD thy GOD is with you wherever you go." When you are going through the "desert" or feel like you are all alone in your sickness and that no one understands you or what you are feeling, know GOD (or your higher power) is with you. Keep your thoughts positive and the result clear in your mind, even though you are seeing or experiencing something clearly different. BELIEVE you can and will get better. And lastly, Belief + Action (you have to do the things written in this book) = SUCCESS! Now Go! Get on your path and keep walking each day, step by step, day by day!

Dark Calories Catherine Shanahan,2024-06-11 The New York Times bestselling author of Deep Nutrition explains how eight common seed oils cause the cellular damage that underlies virtually all chronic disease, exposes the corruption that deceives doctors and consumers alike, and gives us a clear roadmap to recovery and rejuvenation. Did you know that consuming a large serving of french fries—cooked in vegetable oil—delivers the toxicity of smoking 24 cigarettes? Cornell-trained biochemist turned family physician Dr. Cate Shanahan introduces us to well-respected scientists who warn that vegetable oils are a public health disaster, wreaking havoc on our bodies' cells by depleting antioxidants and promoting free radical toxicity. Their many effects include: Uncontrollable hunger, so we need drugs to maintain our weight Inflammatory fat buildup under our skin and within our internal organs and arteries Blood sugar swings that promote bad moods and antisocial behavior Disrupted brain energy, concentration problems, and mental illnesses Intracellular oxidative stress that promotes cancer development Gut inflammation, bloating, heartburn, and the runs Americans were enticed into buying these oils based on their cholesterol-lowering property, but the idea that cholesterol-lowering is beneficial was pushed on us without solid evidence to support it. In *Dark Calories*, Dr. Cate reveals the financial entanglements between industry and underhanded academics who created and sustain our 1950s-era, arbitrary dietary rules. As a solution, she proposes a clear, no-nonsense plan that aligns with our genetic needs and nature's laws. Thankfully, recovering our health is simplified by the fact that nutrients that treat one condition also tend to treat all the rest. As an added bonus, we also revive our sense of taste so that our cravings shift to wholesome, nourishing foods instead.
