**Foundations of Intellectual Assessment** Robert J. Gregory,1999 In most discussions about intellectual development and assessment, the focus is on children. Rarely do assessment practitioners focus on cognitive impairments and other intellectual development issues pertaining to adults. On the cutting edge of assessment issues, Gregory's book includes adults as his primary focus, attempting to answer such important questions as: When is an intellectual assessment appropriate? How do professional and ethical standards inform the practice of assessment? This book responds to a void in the field of assessment following the recent release of the WAIS-III (Wechsler Adult Scale) test, which is now the cornerstone for adult intellectual assessment. Until the publication of this book, there has been no extensive information available about the effective use and interpretation of this and other important assessment tests. This single volume contains comprehensive information, including test norms and standards for effective use of the WAIS-III and many other tests (mental status, attention/concentration, sensory/perceptual, psychomotor, memory, language, drawing, higher cognitive functions, intelligence). Readers will understand the context of psychological assessment, the importance of personal background and mental status in assessment, and the shifting professional standards and ethics of today. A Guide to Textbook Project Design and Preparation Anthony Read,World Bank. Education and Training Department,1986 This paper is primarily a checklist of issues in the design and preparation of textbook projects. It demonstrates how production decisions relate to a variety of other project decisions, and provides key alternatives in the

decision-making process. The guide is divided into four sections. The first consists of questions that project designers and ministers of education are likely to ask when confronting the problem of textbook provision. For example, should there be a textbook project? If so, what financial arrangements are required to ensure continuing book provision as a result of the project? The second section provides checklists for every key activity likely to be involved in a textbook project. The third is a set of documents and calculations which illustrate some of the references made in the second section. The last section is a glossary of professional terms which are either used in the text or which might be used in discussions of project design.
