Frederick John Teggart

Communicating Across Cultures at Work Maureen Guirdham, Oliver Guirdham, 2017-09-16 This revised and updated fourth edition of this core textbook builds on the text's established success. It provides the basis of knowledge, understanding and practice for developing skilled work communication in an intercultural world. Using many illustrations and international examples, the book analyses culture, cultural diversity and cultural similarities and differences in how we interact at work and in the psychological factors that influence our communication. It shows how to overcome impediments to intercultural communication and interact effectively with different others, whether face-to-face or by email, chat, text, phone or video. It describes cultural differences in negotiating, cooperation, coordination, knowledge sharing, working in groups and leadership, and demonstrates how to perform these activities skilfully in an intercultural setting. This textbook is the ideal companion for students taking undergraduate modules in cross-cultural management or managing diversity on international business or business administration degrees, in addition to MBA courses and specialist postgraduate modules on international and comparative management. New to this Edition: - New and improved pedagogical features, including end of Part exercises, activities and role plays - Topic-by-topic coverage of computer-mediated communication, explaining how it is affected by culture and in turn affects intercultural communication - Discussion of new developments in the field such as the increasing emphasis on language and discourses - Focus on new types of research such as country-by-country studies and reports of realities on the ground

Understanding Culture's Influence on Behavior Richard W. Brislin, 1993 This book was written to introduce students to disciplines that study culture's influence on human behavior; these disciplines include cross-cultural psychology, intercultural communication and international organizational behavior. Because virtually everyone interacts with individuals from different cultures, this book helps them to understand these interactions in their own lives. Written in a lively, engaging style with many examples to illustrate complex concepts, this text covers a range of topics that are of inherent interest to readers, such as schooling, work, gender, socialization of children, and health. This text is used in a variety of departments including psychology, sociology, communications, and business. Reasonable Children Michael S. Pritchard,1996 The public outcry for a return to moral education in our schools has raised more dust than it's dispelled. Building upon his provocative ideas in *On Becoming Responsible*, Michael Pritchard clears the air with a sensible plan for promoting our children's moral education through the teaching of reasonableness. Pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims, as fundamental to learning as the development of reading, writing, and math skills. Reasonableness itself, he shows, can be best cultivated through the practice of philosophical inquiry within a classroom community. In such an environment, children learn to work together, to listen to one another, to build on one another's ideas, to probe assumptions and different perspectives, and ultimately to think for themselves. Advocating approaches to moral education that avoid mindless indoctrination and timid relativism, Pritchard neither preaches nor hides behind abstractions. He makes liberal use of actual classroom dialogues to illustrate children's remarkable capacity to engage in reasonable conversation about moral concepts involving fairness, cheating, loyalty, truth-telling, lying, making and keeping promises, obedience, character, and responsibility. He also links such discussions to fundamental concerns over law and moral authority, the roles of teachers and parents, and the relationship between church and state. Pritchard draws broadly and deeply from the fields of philosophy and psychology, as well as from his own extensive personal experience working with children and teachers. The result is a rich and insightful work that provides real hope for the future of our children and their moral education.

The Making and Unmaking of Differences Richard Rottenburg, Burkhard Schnepel, Shingo Shimada, 2006 This book is about the making and unmaking of socio-cultural differences, seen from anthropological, sociological and philosophical

perspectives. Some contributions are of a theoretical nature, such as when the problem of translation, the enigma of alienity or queer theory are addressed; other contributors throw light on contemporary issues like the integration of Muslims in Norway, identity-forming processes in Creole societies or neo-traditionalist movements and identity in Africa. Moreover, the book deals with strangers looked at from an anthropology of the night. Special emphasis is placed on how globalization and the rapid spread of ever new technologies of information have generated ever new patterns of inclusion and exclusion, and how these can be theorized.
